These books have been produced in recent years, each covering the world (Aircraft) of different Magic, where certain expansion is set. As a bonus, these are really lovely hardcover books with lots of giant illustrations with art that you usually see only on a smaller scale in the card itself. As a book it is a non-fiction guide to the fictional world, it explains the social work of ravnica aircraft with a particular focus on the 10 associations taking on different roles in the world. It works well, letting you understand the philosophy behind the cards you use to play your game and add depth to the game itself. Actually the book is so beautiful that you don't need to know anything about Magic to enjoy it, just look at all of the pretty pictures! ... Over this is a beautiful book, filled with some of the most beleacon art from Ravnica. I'm glad that they included some stuff from past Ravnica blocks as well as the current ones, although some of my favorites are gone. There are a very surprising amount of feathers on the plane as well. Between these and the D&D Guide Plus Guildmasters to Ravnica, the great city is a very deep world, and the ones I love are playing around. More accurately before I started the D&D campaign; D Ravnica I saw this book, but it was in a shrinking parcel. I thought, I Am get that and use some art in some sort of 'this is what you see' way. My boy was surprised, I didn't know that it would be a busana lore that it was. I think this book has more fluff information than D&D books; D Ravnica and of course the art is fantastic. I started playing MTG shortly after it came out in the early 90s- In the last 20 years, I've probably played 3 or 4 times. I always thought it would be cool to use ideas from it to D&D; D. Because I've been so out of touch with the game I don't know it has a huge amount of backstory going on. Very cool thing. I read part of the novel (it was put in parts) and loved it, but unfortunately the reviews of other MTG novels were all bad enough, so not sure I'd be strolling to them. more Nostalgia. Happy. Dreaming. Even gods will wrap up. —David BolasCenturies of Scheming has yielded at the end. Meet Throat Balls: Old Dragon, Planeswalker, God-Pyraun. He is the ultimate mastermind, which plots to dominate twists through countless world history. Now the plots are shattered on the shattered streets of Ravnica, with unsuitable troops marching on his command and dozens of Marshaled Planeswalkers to oppose it. In these lavishly portrayed sites, featuring carefully selected art from more than two decades of Magic: Assembly®, the full scope of Nicol Bolas' plans is revealed in the end. It all leads to this. Multiverse's biggest heroes made their stance against the ultimate villain in the Spark War! Sparks!
