Thomas calculus 13th edition answers

domain: $\mathbb{R}$ range: $[1,\infty)$ The domain of the function is all values of $x$for which we have a value of y (for which the function exists). Because the function is a polynomial and there are no excluded points from the X axis, the domain is $\mathbb{R}$ (all real numbers). The scope of the function consists of all the values $y $ that correspond to the items in the domain. That is, all values of $1 + x^2$ through all real numbers $x \in \mathbb{R}$. Now, $x ^ {2} \ge 0 $, and then $ 1 + x ^ {2} \geq 1 $. Thus, the range is $[1,\infty)$. You can help us by revising, improving, and updating this response. Update this response When you claim a reply, you have 24 hours to submit a draft. An editor reviews the submission and either publishes your submission or provides feedback.
