Arris tv guide

Be announced The message on your guide indicates that no programming information is being provided by the broadcaster or your cable box has not downloaded programming information for this date/time. This usually happens after you rearrange your cable box by electrical inploggang. Generally, after you rearrange the cable box, the programming information will start downloading. Normally it takes 10-30 minutes before the channel starts to reveal guide information and up to 2 hours to download the full programming guide. If you are still watching messages for more than a day on each channel to be announced, power cycle by cable box for inplogging it 30 seconds for the power cable and then plogging it back. If no program information has appeared within 30 minutes, please contact any of our customer care representatives for further assistance.
