It is used in some schools, workplaces and around the world to help group members introduce themselves through their writing. They are usually about a long and easy to read page. The writer should keep the essay short and simple to make it the most effective for the reader. This essay serves as a basic introduction to a person's history with an object (if it were assigned by a math class, a person writes about a person's experiences in mathematics) and insight into a person's ability and personality. Depending on who assigned the essay, the writer will want to consider different things: They can mention where they come from, their age, and whether they are in school for something. Take socialization habits into account — does a person like to work with people? Is socialisation difficult? The writer should talk about what they hope to get out of the program of classes and why they joined. Another topic is likes and dislikes about it. Writers should stick to anything particularly personal, which can be difficult or too much information for the reader. Don't include anecdotes. Since the essay is supposed to be short and sweet, the writer should go through writing and take out any foreign information or run-on sentences. When was the last time you came across a really good prostitute? This is Stephen King's term for opening sentence in a short story or essay — knock-you-dead first line that forces you to read. In Great Hookers I Have Known, King says that an effective hooker-sentence offers readers the pleasure of instant gratification (Secret Windows, 2000). The opposite of a prostitute can be called a chaser — the introduction of bore-you-to-death, which recoups readers. At best, the chaser may indicate delayed gratification. More often it provides little more than an excuse to stop reading. Here are 10 examples of such boring or surprising opening lines - chasers you'll want to avoid when composing your own essays. The examples are italic and the explanations are bold. According to my dictionary . . . Avoid leads [or ledes] that quote Webster's-Jim Belushi openings, according to Annie Edison in The Community. It achieves nothing, but everyone still uses it. When you gave us this task to describe in detail a place you know well, my first thought was to write about my bedroom closet. . . . As a general rule, avoid opening this comment to the writing assignment itself. One dark and turbulent night, general Oglethorpe's ghost grabbed me by the goolies and threw me up the castle stairs . . . Don't be too burdened to shock or amaze, especially if you can't maintain that level of excitement. Sometimes you need to hold your neck to your limbs and hold your nose to grindstone. . . . Avoid platitudes and mixed metaphors. In this essay, after giving the topic a lot of thought, I'm going to write about . . . Stop announcements. Life is like a box of chocolates, my mother used to say, quoting Forrest Gump . . . Don't get too cute. Your mom has terrible opinions about writing essays . . . Don't get belligerent. Framed fantastically against the expansive cerulean sky was a growing wedge of gossip, goose gabbling, shiny V-colored cocaine haloed in the sun and dusted off from the enduring dreams of earthly warriors . . . Avoid excessive alliteration, unnecessary modifiers, and Thesaurus.Wikipedia Rogeta says . . . Challenge questionable facts and steer clear of questionable sources. It is a melancholic facility for those who walk around this big city or travel the country when they see the streets, roads and cabin doors, crowded with female beggекers, followed by three, four or six children, all in rags and importing every passenger for alms. \* . . . No matter what else you do, you never plagiarise. \* This is the opening sentence of Jonathan Swift's satirical essay A Modest Proposition. Now it is time to take a more positive approach. For examples of fresh and convincing opening lines, that is, some really good prostitutes, see these two articles: Personal essay is a short work of autobiographical nonfiction characterized by a sense of intimacy and conversational manner. Called personal statement. Type Type Creative nonfiction, personal essay is all over the map, according to Annie Dillard. There is nothing you can't do. No object is prohibited, no structure is prescribed. Each time you can create your own form. (To Fashion a Text, 1998). Personal essay is one of the most common types of writing tasks – and not just in composition courses. Many employers, as well as graduates and vocational schools, will ask you to submit a personal essay (sometimes called a personal statement) before even considering an interview. The ability to compose a coherent version of yourself in words is, of course, an important skill. What qualities does a personal essay reveal about you? Here are just a few: Communication skillsHow effective are your communication skills? Do you write clearly, concisely and correctly? Keep in mind that many employers place communication skills at the top of the list of basic qualifications. Critical Thinking SkillsHow fresh and imaginative are you in your thinking? Is your writing littered with platitudes, or is it obvious that you have original ideas to contribute? MaturityWhat specific lessons have you learned from your experience and are you ready to apply these lessons to the work or academic program you are considering? Please note that it is not enough to be able to tell a personal experience; be prepared to interpret it. Self and Subject in Personal Essays[W] here the well-known essay is characterized by its daily theme, the personal essay is defined more by the personality of the writer, which takes precedence over the subject. On the other hand, the personal essayist does not put himself firmly in the spotlight, as does the autobiographical essayist; the autobiographical element of a personal essay is much less calculated... Persona essayistSo personal essayists from Montaigne were fascinated by the variability and plasticity of the materials of the human personality. Starting with self-description, they realized that they could never make everyone at once all the complexity of personality. So they decided to follow the strategy of the supplement, offering incomplete shards, one mask or persona after another: eager, skeptical, sympathetic, gentle, curmudgeonly, antic, gloomy. If we need to remove the mask, then only replace another mask ... Antigen: An alternative to academic prose[T] a more personal essay offers an escape from the limits of academic prose. Using this form of antigen, which in contemporary essays embodies many types of writing, many essayists find freedom of expression in their writings of spontaneity, self-reflection, accessibility and rhetoric of sincerity. Teaching a personal essay Taking into account the ability to speak your own authority as writers, given the phrase in the conversation, students Claim their stories as the primary source material and turn their experiences into evidence... Essay Forms Despite the habit of anthologists presenting essays as models of organization, it is a loose structure or apparent shapelessness of an essay

that is often emphasized in standard definitions. . . . Samuel Johnson described the essay as an irregular, undigested piece, not a regular and orderly performance. And certainly, many essayists (Hazlitt and Emerson, for example, after montaigne fashion) are easily recognizable by the wayward or fragmentary nature of their explorations. However, each of these writers adheres to certain distinctive rules of organization (or disorganization) of their own, thus charting wandering and form shaping. As Jeanette Harris notes in an expressive discourse: Even in the case of a personal essay that may seem informal and loosely organized, the writer carefully crafted the same appearance of informality (122).
