SHOP TULLE Hey, this is my first instructible, I know I've left out some things like pictures for certain steps, but I never thought of making it an instructible at the moment so I'm going to try to explain what I've done to the best of my fitness and I hope you enjoy it.:D What did I do? So my school holds a sport every year where we get dressed up in our Home colors and either compete in events or viewing. When I'm in 12 years I thought that would put some effort into what I was going to put on that day. I was at Wolverton House which is the Red House of Schools so it seemed to supply to come as Hellboy for the day and make my best suit possible with little to no budget. I would like to say a big thank you to my girlfriend Stephanie for helping me put this together! How did I do it? Most of this suit is made from cardboard I was lying around plus a hot gun and paint, the other thing I used I either already had, borrowed, got for free or bought for cheap goods. for instance, I had my father's horse raising clothes so he no longer used and he listened to me only cost me a few dollars. Where did I do it? I did all the suit at my house and at my girlfriend's house, every time I was there we'd have both worked on the part of the circuit within a week. What have you learned? I managed to get away from money for most parts of this build in asking others to help get old things that could be modified to suite what I needed it for, it just required some imagination and effort. and also the courtyard of eyes and getting it in your hair is not very nice. This instructible will be divided into the main parts of my suit. - Right Arm in Doom – The Samaritan – Horn - Tail - Make up – Put the whole thing together p.s. This is not precise in the film because I didn't want to spend any money or not much but I think it comes out pretty well. good.
