Since the tables aren't available and the forum is mostly unavailable at the moment, I thought I'd re-download it here. I didn't make that table. Unfortunately, I don't remember which members were really creating it (there were three or four recent contributors, iirc). I just made a little adjustment for the recent version of steam game, since the player struct moved a little, and so is the layout. But it was. So don't credit me because I'm just leeching with the mind. Enjoy :) How do I use this cheat table? Set the Cheat Engine double-click . The CT file to open it. Click the PC icon in the cheat button to select the gameplay process. Save the list. Activate the trainer settings, by checking the boxes or setting a value from 0 to 1 Attachment isaac-ng.ct (96.93 KiB) Downloaded 41634 times Force Expert Cheater Message: 116 Joined: Fri 03 Mar 2017 6:12 pm Reputation: 13 Post by Forces » Sat 04 Mar 2017 4:35 pm Here is a list of items. Post: 4 Joined: Thu 02 Mar 2017 11:54 pm Reputation: 0 Post herpaderpa40 » Sun 05 Mar 2017 7:58 pm From what I last checked on the table you downloaded, movement in player statistics was duplicated to be luck instead; so there are two luck in player statistics. Although, with a bit of tinkering with the old version of the cheat table I had some time ago, the movement slot for player statistics from the old table still works in the new version and in the new table; which I just copied and pasted the working movement of player statistics from the old table to the current one. It's not that cool and I don't know how to fix it to be in another player statistics, but at least it's better than nothing. EDIT: Come to indicate that the Pedestal script works. My bad! Isaac-ng_ withmovementfix.ct attachment read table that has player movement statistics running, along with all the other things in the table that was placed in OP. All you have to do is activate the script, pick up the item from the pedestal, and then you'll be able to change the pedestal element to whatever you like. The graphics won't change, the pedestal will still appear blank (unless you use a fashion description that will show the correct description). Just kick against an empty pedestal and you got your point. Also, if you're not convinced, take the usage element while you already have the usage element on you, you'll see that the pedestal gets the item ID of what you just swapped. I was looking at the hack statistics, but I wasn't able to easily fix it by a landslide, and I'd prefer not to screw around with my actual statistics, trying to find it, sorry. herpaderpa40 What is cheating? Things involving player pointers don't work, but things like endless bombs work. He also has a script for guaranteed wins with bums! I know someone was looking for one, so there. I also haven't tested it, but I doubt it works. Hopefully someone can fix this table so it works. CTAB+ attachments.
