

play! 20×30 and 60×40 etc

1. We know that: Ten 10s = or $10 \times 10 = \dots\dots\dots$

2. Let's count in 20s to see what 10×20 equals:

	1	2	3	4	5	6	7	8	9	10
$\times 20$										

3. This means that: Ten 20s = or $10 \times 20 = \dots\dots\dots$

4. Let's fill in the following answers.

- a) $10 \times 20 = \dots\dots\dots$ b) $10 \times 50 = \dots\dots\dots$ c) $10 \times 80 = \dots\dots\dots$
 $20 \times 10 = \dots\dots\dots$ $50 \times 10 = \dots\dots\dots$ $80 \times 10 = \dots\dots\dots$

5. Without counting, we can calculate 20×30 as follows:

$$20 \times 30 = \dots\dots\dots \quad \textit{Remember } 10 \times 10 = 100$$

$$\text{and } 30 \times 20 = \dots\dots\dots$$

6. Let's fill in the following answers.

- a) $20 \times 20 = \dots\dots\dots$ b) $40 \times 20 = \dots\dots\dots$ c) $30 \times 30 = \dots\dots\dots$

7. We know that $3 \times 5 = 15$.

Let's calculate 30×50 :

$$30 \times 50 = \dots\dots\dots \quad \text{and} \quad 50 \times 30 = \dots\dots\dots$$

8. Let's fill in the following answers.

- a) $40 \times 30 = \dots\dots\dots$ b) $40 \times 40 = \dots\dots\dots$
c) $50 \times 60 = \dots\dots\dots$ d) $70 \times 60 = \dots\dots\dots$
