

play! 2-Digit \div 1-Digit Number: **Part 1**

1. Complete:

a) $30 \div 3 =$ _____ because _____ \times _____ $=$ _____

b) $60 \div 6 =$ _____ because _____ \times _____ $=$ _____

c) $40 \div 4 =$ _____ because _____ \times _____ $=$ _____

2. To calculate $26 \div 2$:**Step 1:** Think of 26 as $20 + 6$.*Let's picture it:***Step 2:** Divide both 20 and 6 by 2.**Step 3:** Add up to get the final answer.

20

6

Now that we know the steps,
we can do the writing out:

$26 \div 2$

Using a division bracket:For division, we **do not** start with the units first...

3. Complete:

a) **$36 \div 3$**

b) **$48 \div 4$**

4. Calculate $42 \div 3$.

Let's picture it:

Option 1: $42 =$ _____

40 cannot be divided by 3 easily.

30

12

Option 2: $42 =$ _____

30 (and 12) can be divided by 3 easily.

$42 \div 3$

Using a division bracket:

5. Complete:

a) **$52 \div 4$**

b) **$48 \div 3$**

6. Calculate $54 \div 3$:

Option 1: $54 =$ _____

Option 2: $54 =$ _____

Option 3: $54 =$ _____

$$54 \div 3$$

Using a division bracket:

7. Complete:

a) $75 \div 5$

b) $84 \div 6$
