Televend 

Televend Smart Vending – System Overview

TELEVEND – SMART VENDING SOLUTION

- Televend is **IoT solution** that transforms vending machine into the point on internet
- Televend Cloud is a **vending dedicated cloud platform** that solves:
 - operations optimization based on real time informations and prediction
 - mobile payment for private and public vending
- The Televend vision and business model have already been **recognized and used** by premium customers in EU and Asia.

TELEVEND – PAYMENT ENABLER

- **White label mobile payment** scheme
- Communication with end customer (**CRM**) via Customer Mobile Application
- **Loyalty Programs and Marketing Campaign** management in backend
 - configurable Rule Editor and Rule engine turned into user friendly tool for program and campaign management
- **Cloud storage and analysis** of all customer account details, activities and transactions

TELEVEND Box - IoT device for vending

IoT REAL TIME REMOTE CONTROLLER

- Transactions, errors and cash data in real time
- Remote price change and machine setup
- Remote firmware update
- 3G/4G ROUTER mode - internet connection for vending machine or bank card terminal

MASTER VENDING DEVICE

- Master mode in MDB, EXE, BDV, CSI and CCI - generating own DTS/DEX
- Slave mode EXE and MDB – read out 3rd party DTS/DEX
- Machine failure detection in real time or periodically (DEX & DDCMP)
- Multiple pricelists per payment device type
- Age verification per product

4 in 1

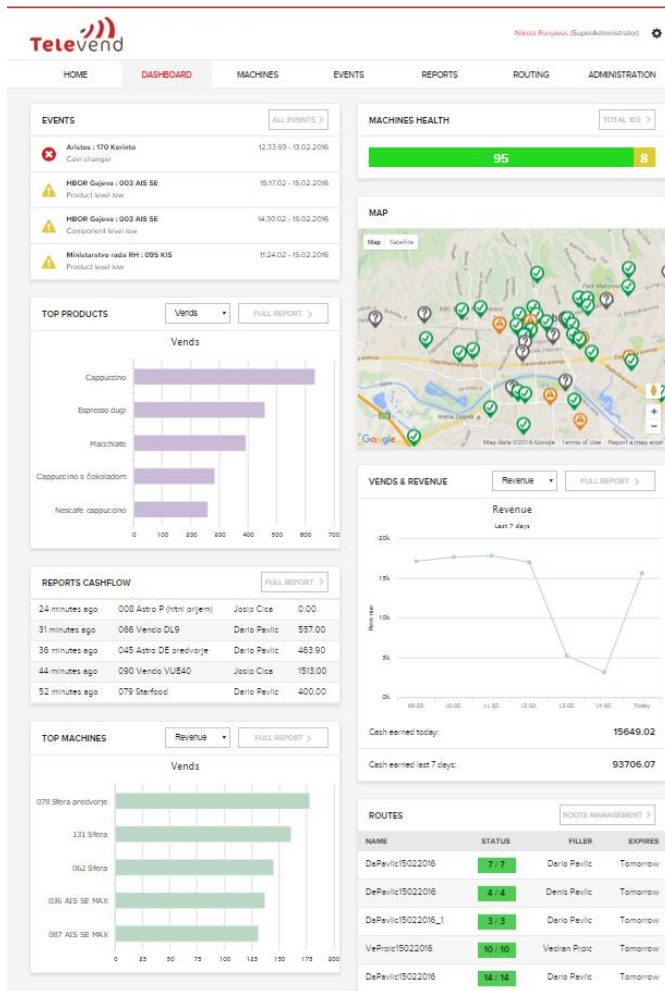

CASHLESS PAYMENT DEVICE

- Own closed loop payment – T Wallet
 - Mobile payment via bluetooth / QR code
 - RFID card payment with simple RFID reader
- Easy 3rd party payment integration – SMS or any online mobile wallet
- Preselection mode - select and tap NFC card

OFFLINE MODE

- All functionalities available also in offline mode (in case of internet connection blackout)
- Bluetooth statistics readout (DTS format)
- Bluetooth payment (using customer mobile phone connectivity)

Televend Cloud - *Overview*

- Multilevel map overview of whole vending network & regions
- Real time sales and stock levels monitoring
- Real time errors & events list – alarm management
- Cash collection management
- Smart Route optimization – by urgency factor calculation
- Expiry date management
- Dynamic planogram analysis & optimal product placement
- Rentability analysis - per machine, customer, product...
- User role based concept – restrictions on widgets per user
- Reporting editor with detailed filtering and export possibilities
- Remote configuration
- Bulk machine creation from excel
- Multilingual concept
- Data integration to third party systems
- & much more....

- Detailed analysis of each product
- Sales cycle show how fast the product is sold out
- Share in revenue shows how important the product is
- Basis for smart routing and urgency calculations

Televend Cloud: *Smart routing* overview

Types of route creation:

1. **MOBILE ROUTING – by fillers:**
Routes created on Televend Mobile application by fillers
2. **CENTRALIZED – by filler manager:**
 - A. **Pre Kitting** - routes created on Televend Cloud application (1 box 1 machine)
 - A. **Live Pickup** - routes created on Televend Cloud application (pickup list refreshed live on mobile app)

Televend Cloud: *Dynamic Routing* – prediction based

Visit urgency factor calculation using machine learning

- Days since last refill compared with how often it is really necessary to refill (sales cycle)
- Current sales cycle – based on ARM data predictive analysis
- Method used in stock market analysis
- Configurable limit of loss if products are sold out
- Integrated in Televend Mobile and Web App

RESULT: Urgency factor from 4 to 1 - sorts the machines by visit priority

Televend Cloud: *Types of visit triggers*

MACHINE	URGENCY	STOCK	FILLING	CASH COLLECTION	DETAILS
✓ Metal Product BH	3				
135 Snakky Max	3 REFILL	75.53%			⌵
084 Astro SE kantina	1	78.26%			⌵
025 Astro SE	1	86.33%			⌵
✓ ACG Lukeps	2				
058 AIS SE MAX	2 REFILL	73.41% 72.05%			⌵
030 Starfood	2 LOCATION	61.67%			⌵
3 ✓ Wam product	1				

3

- **REFILL** - Urgent because popular products are on low stock / are empty
- **OTHER VISIT TRIGGERS:**
 - **SCHEDULED** – Urgent because this machine has a scheduled visit in its settings (Machine > Settings > Days until urgent)
 - **LOCATION** – Urgent because other machine on this location has higher urgency level
 - **FACING** – Urgent because there are more products completely out of stock (empty facing) then allowed. Number of allowed empty facings can be customized.
 - **EXPIRY** – Urgent because expiry date is close.

TELEVEND – Staff Mobile App

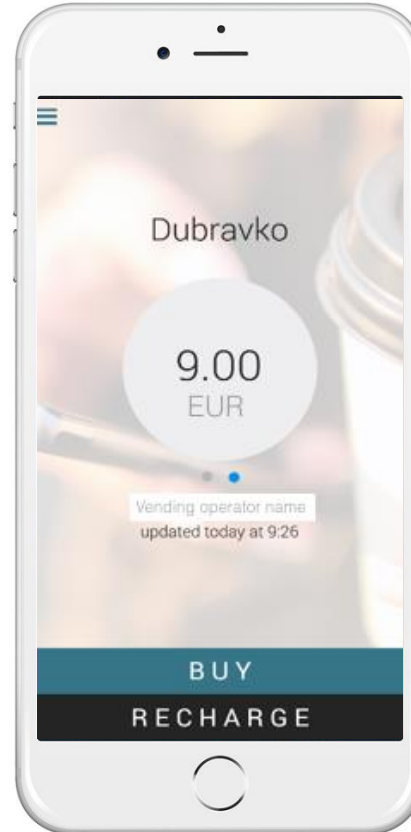

- Data automatically updated/synchronized with the web app
- List of machines per filler/technician
- Machines status, address, distance and products status
- Navigation with integrated map
- Active daily route list
- Real time information of goods needed for each machine according to route model used
- Product inventory list – pick up list
- Scan cash bag
- Make orders with app
- Bluetooth Offline data readout via Service Mobile App
- Filler/technician can add notes and edit the product qty data

TELEVEND – Wallet cashless payment

CUSTOMER RELATIONS

- **Customer management**
 - Customer feedback tracking
 - Customer segmentation
- **Loyalty**
 - Rule based fidelity programs
 - Customer retention
- **Marketing campaigns**
 - Targeting customer segments
 - Brand sales improvement
- **Rules**
 - Rule Editor
 - Rule Engine

CLOSE LOOP PAYMENT

- Bluetooth
- QR code

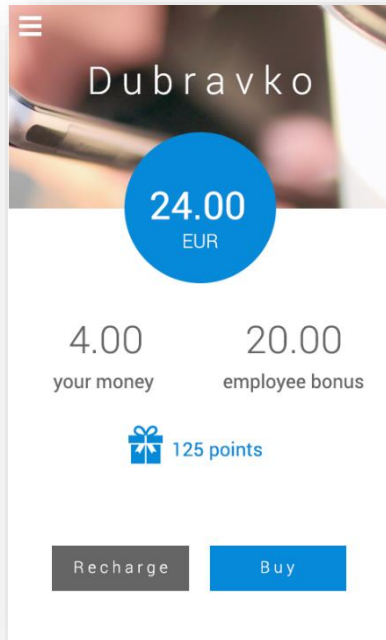

Provide consumers with payment tool but use app to communicate with them

WALLET MOBILE APP

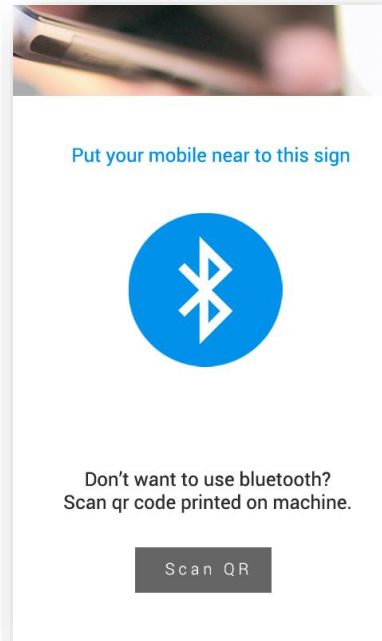

Vending Wallet

Engage

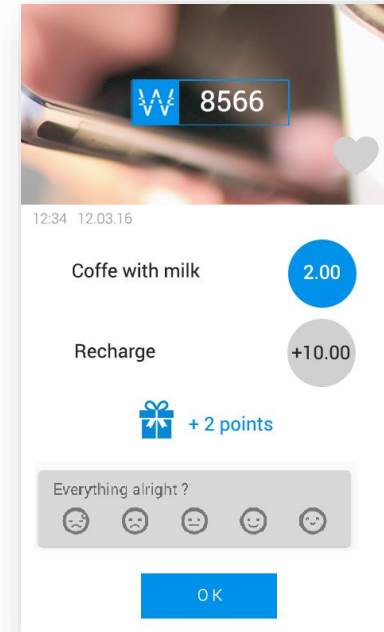

Select product on VM

Tap to approve

Provide feedback

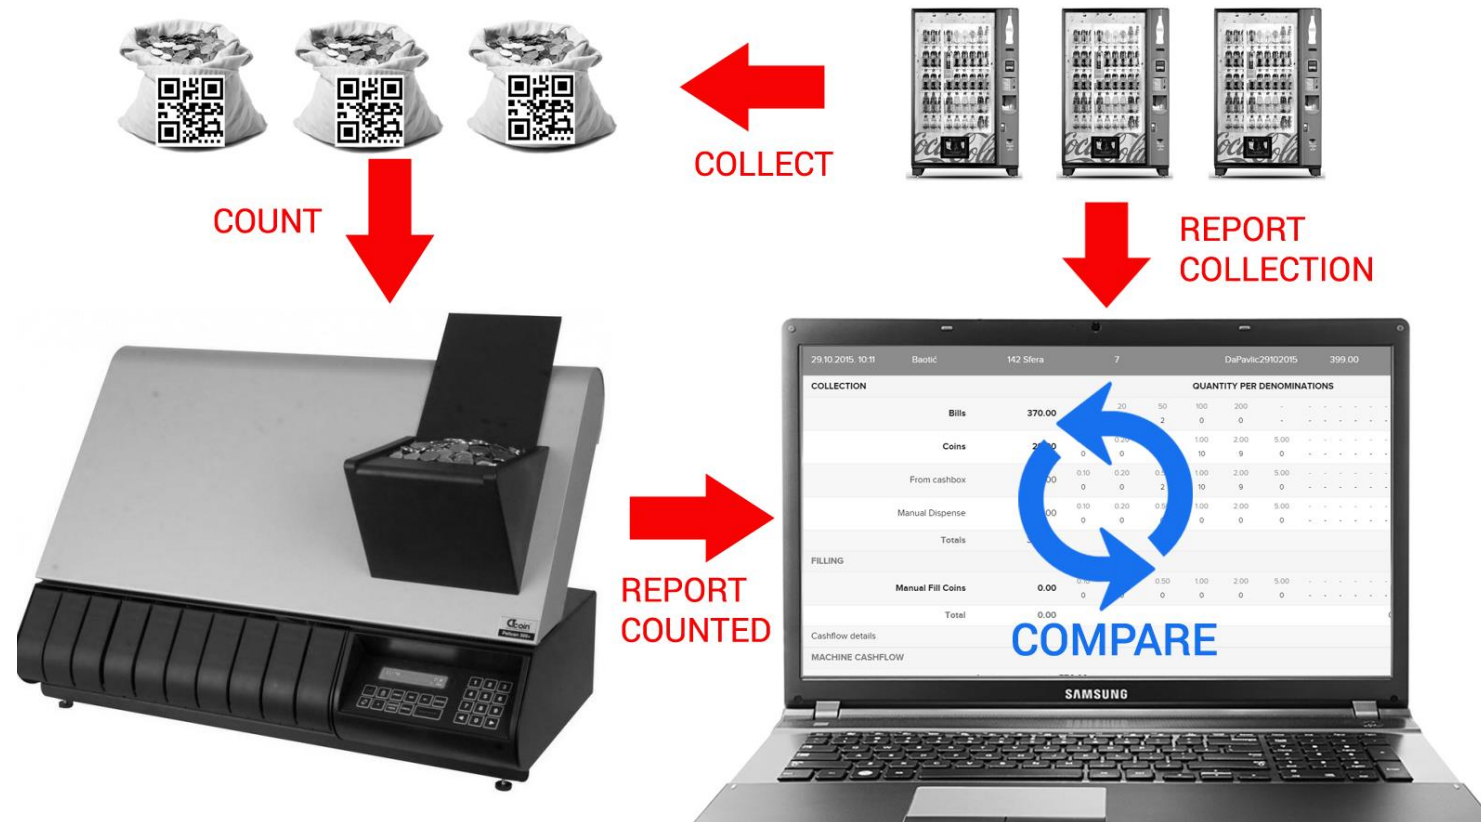

Wallet mobile app is used by consumers to easily buy products, collect rewards and provide feedback

CASH CENTER

Televend cloud can receive information from cash counting machines where counted data, and audit reported from the Televend device can be compared.

NEXT STEPS - suggestion

Phase 1 – STARTER PACK

- Lab testing on 2 devices
- Setting basic operation mode – „Brain”, „Mdb Brain”...
- Connection and testing with all payment and other peripheral

Phase 2 - PILOT

- Identification of current operations
- Implementation on Cca 200 pcs or 2 routes
- Pilot project measurements – visit frequency, planogram analysis, errors encountered, cash collection analysis, etc.

Phase 3 – SMART VENDING

- Implementation of new daily operations processes to whole vending network
- Implementation of modern & interactive payment methods
