

TBS[®]

QUALITY INSTRUMENTS

U.S.

PATENTED

TBS Surgical Instruments

The innovative and groundbreaking TBS line of instruments has changed the way dentistry is practiced around the world. Constructed from superior German steel and crafted with the utmost precision, each instrument offers incomparable performance and durability. For the past 40 years, TBS Instruments has been manufacturing the finest dental instruments through rigorous research and development. We're so confident in our products that we offer a lifetime warranty to all of our valued clients.

Surgical Serrated Curettes

Our award-winning fine serrated curettes are optimal for curettage, granular tissue removal, and tooth socket debridement.

The blue titanium coating provides a harder, smoother surface proven for better edge retention and enhanced lubricity. The coating also promotes prolonged durability of the fine serrated tips.

The patent-pending shark handle offers maximum comfort, which further reduces hand fatigue and provides better control during any dental procedure.

FINE SERRATION on the blade is optimal to cut the periodontal ligament.

SHARK HANDLE™ exclusive design to provide optimal grip.

38001: 12 Miller Surgical Curette, Large
Miller 12 R/L titanium serrated curette designed with long 23mm shanks 4mm wide serrated spoon shaped blades

38002: 10 Miller Surgical Curette, Small
Miller 10 R/L titanium serrated curette designed with long 24mm shanks and 3mm wide serrated spoon shaped blades

38003: 11 Miller Surgical Curette, Medium
Miller 11 R/L titanium serrated curette designed with long 24mm shanks and 3.5mm wide serrated spoon shaped blades

FRINGS®

forceps with spring

FRINGS®, Forceps with spring, deliver a brand new, never before seen technology with a spring-driven "auto-retractable" design that entirely replaces the concept of opening forceps with your fingers. In other words, a simple dentistry approach has been completely revolutionized and will never be the same again! Apart from the innovative automation of forceps, FRINGS® are constructed with the finest serrated beaks, designed to grip any tooth perfectly and reduce the risk of tooth fracturing. The lightweight, sleek models feature trademarked two-tone blue titanium finish with the most optimal handles, and available in a wide range of designs. Created with the ergonomics of dentistry in mind, FRINGS® are forceps like no other.

Micro Universal Roots,
Cross Serrated Beaks

elvatome®

All five styles in a cassette

38100

Elvatome® Kit

Elvatomes combine the sharpness and precision of a periotome and the strength and sturdiness of an elevator. The spade shape features a fine and sharp point, ideal for entering the tightest spaces and cutting the periodontal ligament. Each Elvatome® is crafted from a single rod of 100% German steel to provide optimal strength and longevity.
