Dophi™ N3000
ELECTROPORATION SYSTEM

Dophi™ N3000 Electroporation System is designed for soft tissue ablation with more precision, safety and reliability. Powered by Irreversible Electroporation (IRE) technology, Dophi™ N3000 can ablate tumors with complex anatomical environment. “IRE is a promising method for treatment of tumors near blood vessels, nerves, bile ducts, and connective tissues as these structures remains intact with IRE.”

**Advanced Ablation Technology**

- No Heat-sink Effect
- Important Structures Such As Tissues, Vessels And Nerves In Ablation Zone Are Well Preserved
- Clear Ablation Boundary Under Medical Imaging System
- Treated Area Resumes Normal Function Quickly
