

# WHY M-FILES ONLINE?

BE INTELLIGENT.  
BE AUTOMATED.

## M-Files®

M-Files Online is a **seamless and intelligent Document Management System (DMS)** that allows organizations to **manage information from different business systems or repositories** – an innovative upgrade from traditional ECM systems.

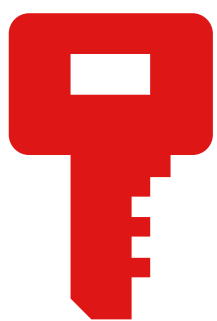

### Who Needs M-Files Online?

Institutions that **receive and manage large volumes of documents** and data that requires efficient and **automated storage, sorting, and access.**

Companies that **store large volumes of text and image files** that require classification and **automated meta data suggestion.**

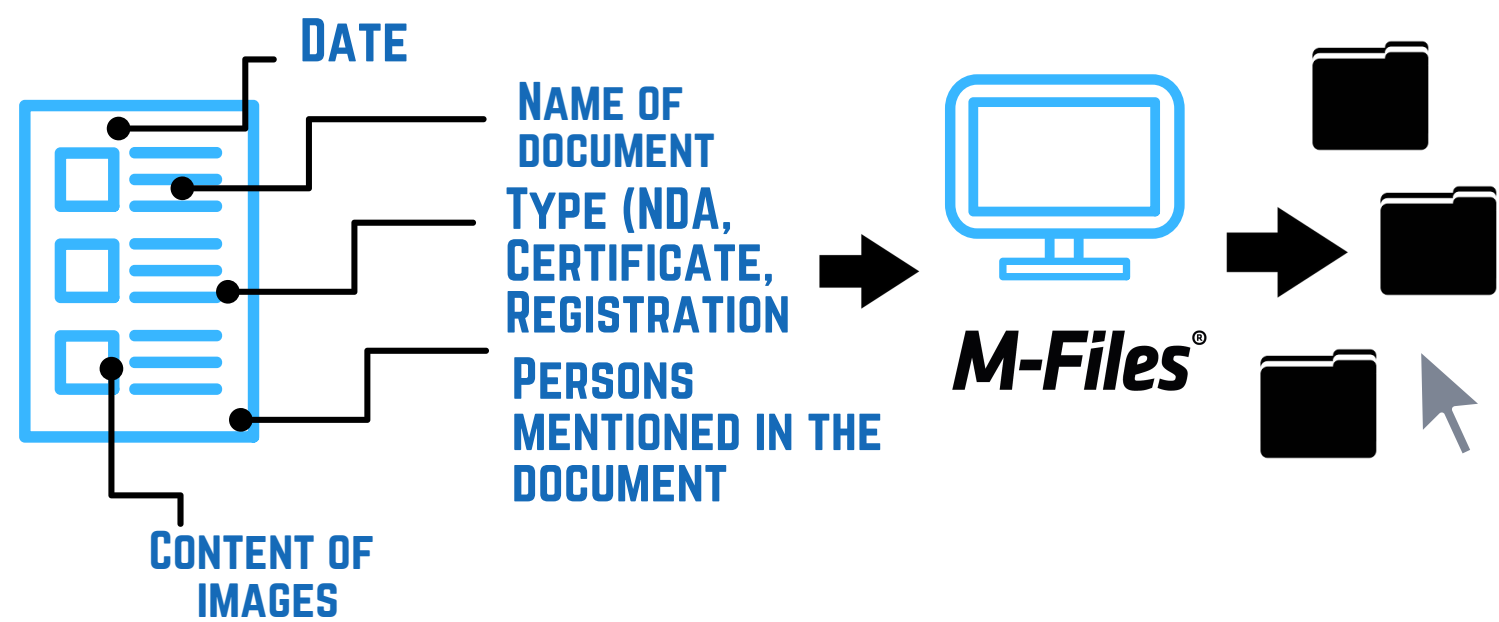

Organizations that require **automated restriction and regulation** in managing documents for confidentiality purposes.

Large industries in need of **automated workflow solutions** due to its **wide-scale operations** and industry-to-industry transactions.

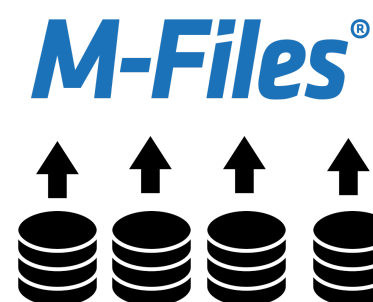

## Intelligent and Efficient

### 1. Intelligent Metadata Layer (IML)

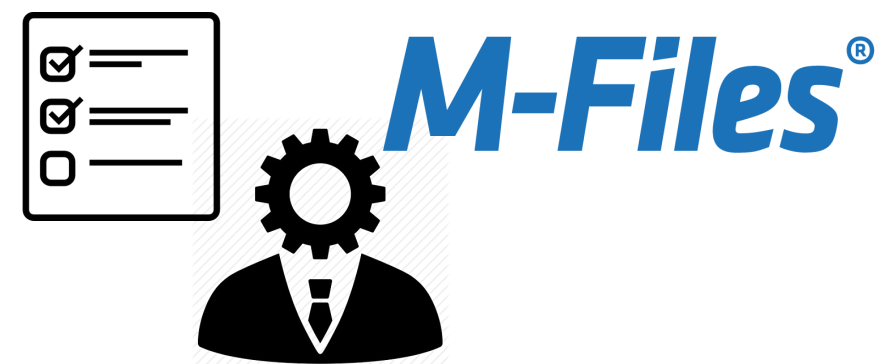

Through its **out-of-the-box AI**, M-Files Online automatically categorizes and manages documents by **scanning its contents** and **suggesting metadata** that is both accurate and correct.

### 2. Unified Repository Experience

M-Files Online now **connects all repositories (Sharepoint, Exchange, Salesforce)** in the cloud, on-premise, and hybrid installations with the same license. Further, M-Files Online **can now be viewed with one unified user interface.**

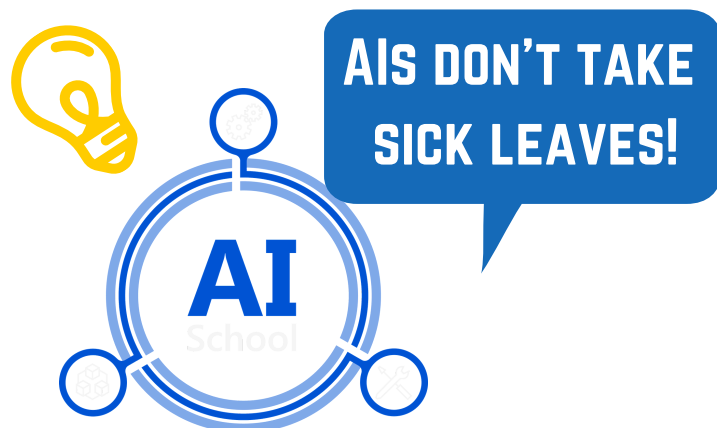

### 3. Automatic Updates

M-Files Online now has a **self-updating system for new features, fixes, and security updates.** This removes the headaches of doing manual updates, creating an even more **seamless experience.**

# INTELLIGENT SERVICES

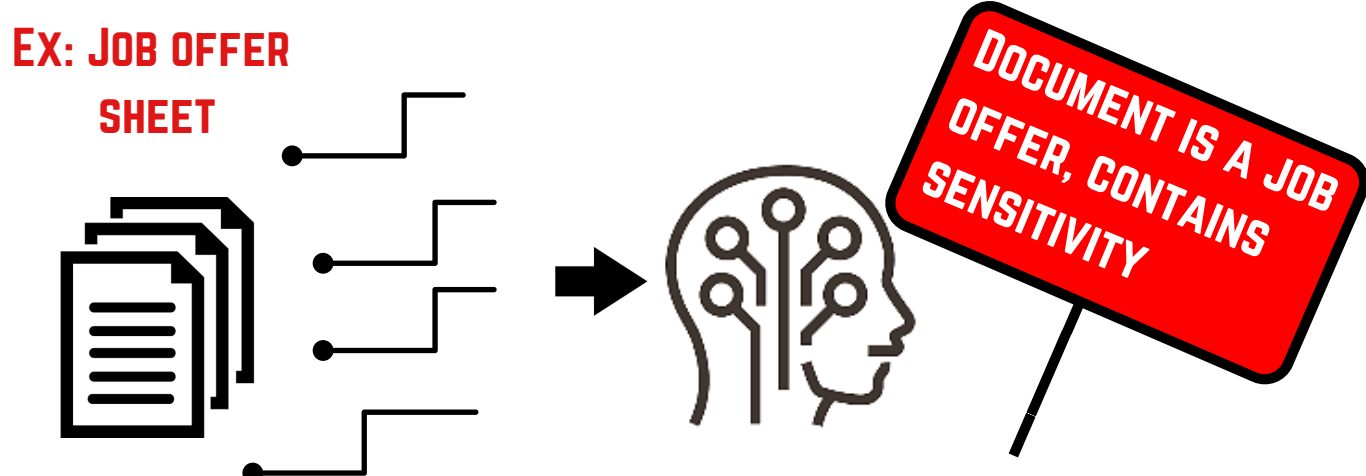

## M-Files Smart Classifier

Document classifications are now based on machine and AI-learning using a dedicated M-Files web service that comes with the package.

**Benefits:** This reduces cost while increasing accuracy of small and large-scale document classifications over time.

## M-Files Information Extractor

M-Files Text Analytics and Matcher scans the content of documents and provides metadata suggestions based on existing information within the vault or one provided by Microsoft Cognitive Services.

**Benefits:** This intelligently automates content management and information extraction through accurate metadata suggestions.

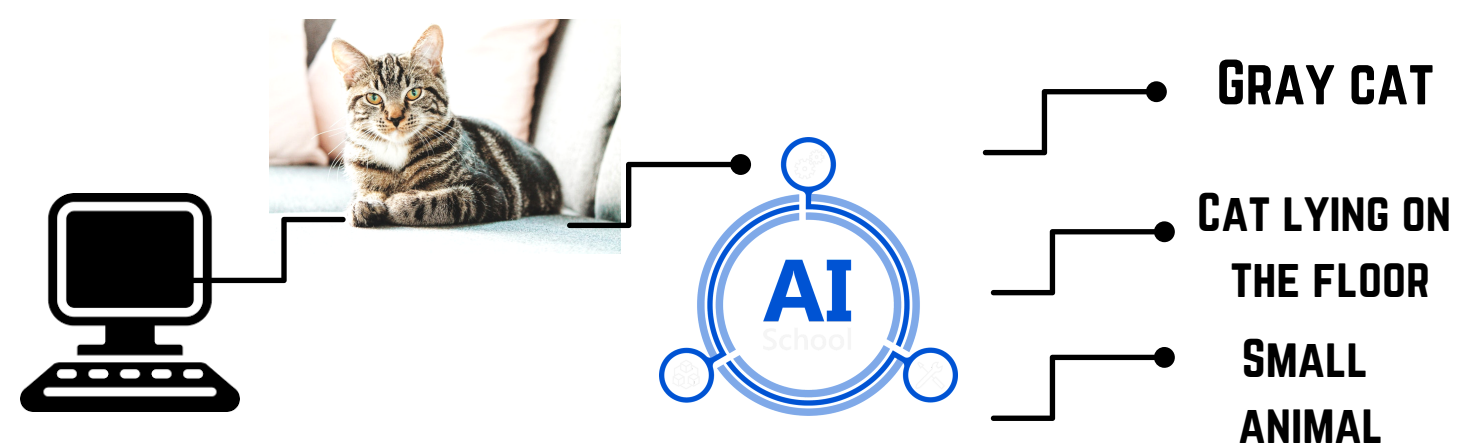

## M-Files Repository Sensor

Examines the M-Files vault and other external repositories to identify sensitive and significant information and automatically apply access restrictions.

**Benefits:** An efficient repository for tracking and identifying confidential documents containing national identification, bank account, passport numbers, etc.

## M-Files Image Analysis

Creates metadata suggestions based on image recognition using the AI services of Microsoft Azure.

**Benefits:** Great for image-heavy databases, this scans images which allows the AI to intelligently determine the content and description of the image.

## Free Inclusions in M-Files Online Subscription:

- ✓ Automatic updates to M-Files Server, M-Files Desktop and M-Files Cloud Vault
- ✓ Intelligent Metadata Layer
- ✓ Network Folder Connector
- ✓ S100 Cloud Vault (5GB index server & 200GB storage)

## Why the S100 Cloud Vault?

- ✓ Increases efficiency through migration of non-sensitive documents to the cloud vault instead of storing them on-premise
- ✓ Work from anywhere using M-Files Desktop and M-Files Mobile App without the need of a VPN Client or publicly exposing the company server.
- ✓ Provides a seamless and free opportunity for organizations to be cloud-ready
