## **New social distancing measures to help you shop safe and shop local**

**We're developing plans to make it easier and safer for people to shop local in their neighbourhoods. We're using the same approach in district shopping centres as we have in the city centre.**

A number of social distancing measures will be introduced into busy local shopping centres to help people access their local shops safely and to meet the rising demand for better walking and cycling facilities in neighbourhoods as well as improving public transport links to the city.

Measures will be installed to manage the flow of people walking and queuing at local shopping centres including the introduction of one-way pedestrian systems and markings on the ground to indicate recommended physical distance between people, walkways and queuing areas.

### **Adelaide Terrace – Key Points**

- Temporary widening of some pavements and a one-way system to aid social distancing, some parking removed to enable this
- 20 mph speed limit introduced
- New cycling facilities to tie-in with cycle lanes on Elswick Road

Please visit our web site - <https://newcastledistrictshoppingcentres.commonplace.is/> to find out more about the measures in your area and have your say.

**You can also email us [transport@newcastle.gov.uk](mailto:transport@newcastle.gov.uk) or phone 0191 277 7681 to leave a message and request a call back or information in another language or format.** Further information is also available at [www.newcastle.gov.uk/ournewcastlerecovery](http://www.newcastle.gov.uk/ournewcastlerecovery)

### **Coronavirus Business Support**

We're here to support businesses through the coronavirus pandemic.

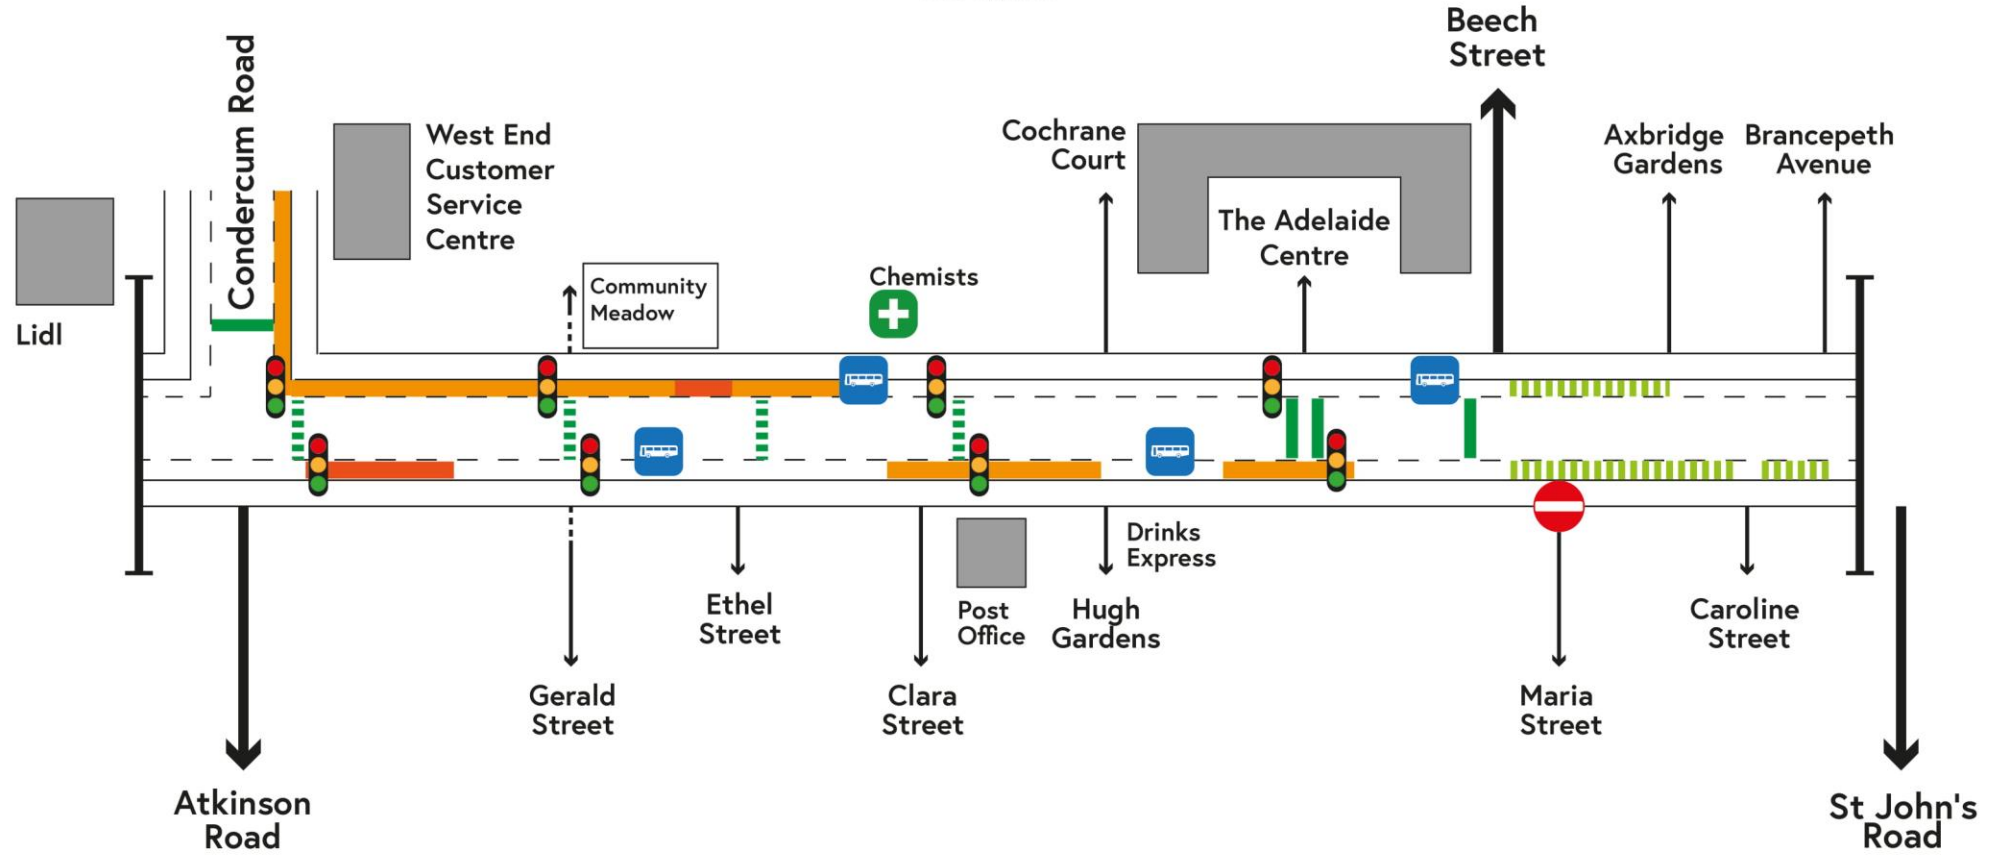

There are a number of grants available to provide financial support for businesses. Go to
