

New social distancing measures to help you shop safe and shop local

We're developing plans to make it easier and safer for people to shop local in their neighbourhoods. We're using the same approach in district shopping centres as we have in the city centre.

A number of social distancing measures will be introduced into busy local shopping centres to help people access their local shops safely and to meet the rising demand for better walking and cycling facilities in neighbourhoods as well as improving public transport links to the city.

Measures will be installed to manage the flow of people walking and queuing at local shopping centres including the introduction of one-way pedestrian systems and markings on the ground to indicate recommended physical distance between people, walkways and queuing areas.

West Road – Key Points

- Four-metre-wide pavements and one-way system to aid social distancing
- Extended bus lane to aid bus priority heading towards the city centre
- 20 mph speed limit introduced
- Cycling infrastructure to be added in Phase 2

Please visit our web site - <https://newcastledistrictshoppingcentres.commonplace.is/> to find out more about the measures in your area and have your say.

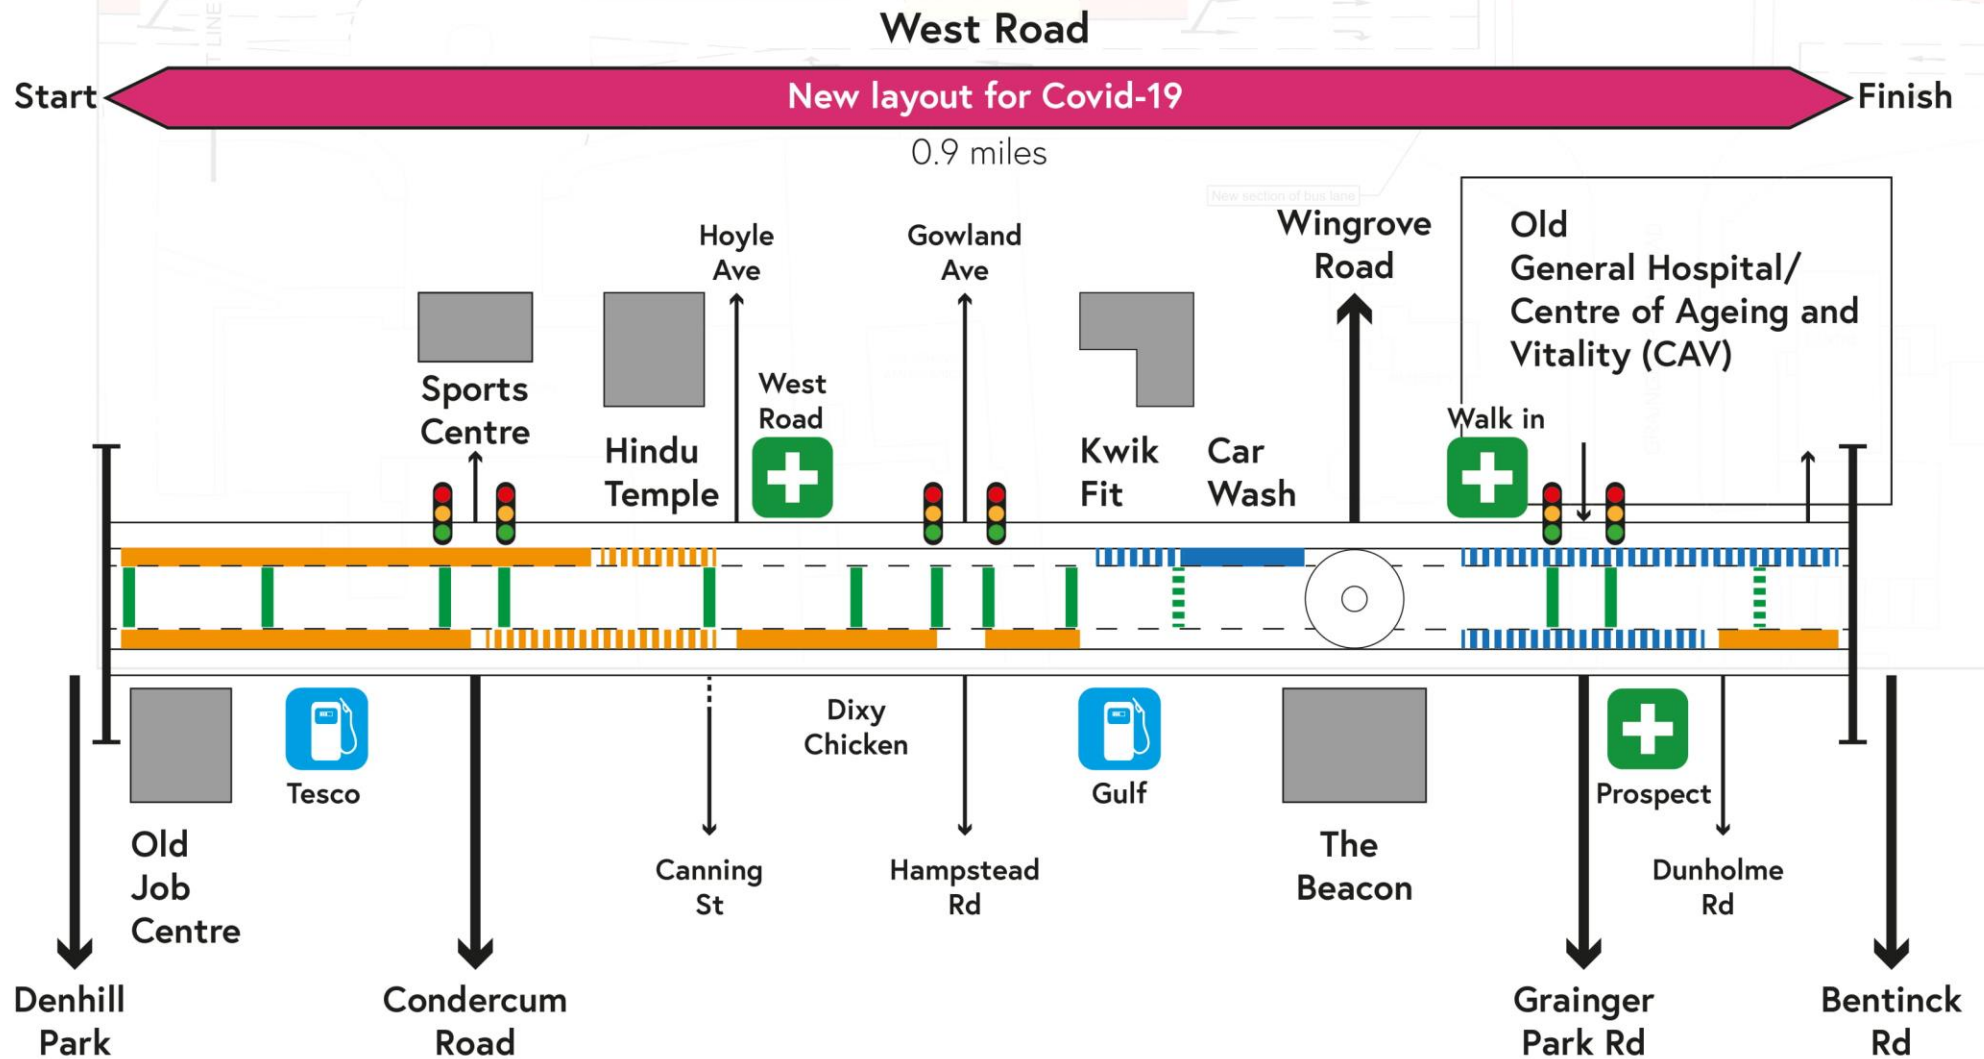

You can also email us transport@newcastle.gov.uk or phone 0191 277 7681 to leave a message and request a call back or information in another language or format. Further information is also available at www.newcastle.gov.uk/ournewcastlerecovery

Coronavirus Business Support

We're here to support businesses through the coronavirus pandemic.

There are a number of grants available to provide financial support for businesses. Go to

www.newcastle.gov.uk/covidbusinesssupport

Key					
	Traffic light junction		Petrol station		Doctors
	Pavements widened (any parking and bus stops moved in)		Bus lane- existing		Crossing- existing
	Parking removed for wider pavement		Bus lane- extension		Crossing- updated
