GECKO delivers a giant leap of sound quality at the St. Stephen's High School multi-purpose hall

The St. Stephen's High School, an Episcopal school, is in the Binondo district of Manila. The school's multi-purpose hall, also known as Stephenian Hall, recently made an upgrade of its sound system to GECKO®.

In replacement to their old system, they have decided to install two REVELATION SR 615RF 15" C.R.I.S.T.A.L.® Audiophile long-throw loudspeakers for the front-of-house (FOH) plus two REVELATION SR 612RF 12" C.R.I.S.T.A.L.® Audiophile long-throw loudspeakers for time-alignment to the 1000 seating capacity hallway.

Driving these loudspeakers is the GECKO® EXODUS ATOM MXR 1208A 12-channel active C.R.I.S.T.A.L.® Audiophile mixing console, while connection of all the loudspeakers to the GECKO® EXODUS AT-OM MXR 1208A are done using the GECKO® TRUTH T2 audiophile-grade speaker cable terminated by the GECKO® OLYMPIAN series audiophile-grade connectors.

On top of the above, the St. Stephen's High School also acquired one set of the GECKO® PASSION MP 6000W/RP 6000 wireless handheld microphone system along with one set of GECKO® TRUTH T3AL audiophile-grade interconnects to further enhance the sound quality of the venue. Now, students, faculty, staff, and guests can truly enjoy a world-class sound system with uncompromising sound clarity and coverage.
