PMBOK Sixth Edition - Are you ready for a new exam from January 2018? No! Project management practices are evolving in today's dynamic environment. PMI was able to keep up with the pace of these changes and was flexible to adopt new practices like Agile. Keeping up with this trend, there have been several amendments to the PMBOK Sixth edition. Here are the major changes that PMP applicants should know as they prepare for the exam based on the sixth edition. Each area of expertise will contain a section called Approaches to Flexible, Iterative and Adaptive Environment, which will describe how these practices are integrated into project settings. 2. Re-signed chapters - Several chapters are re-driven in front (chapter 1 to 3). Information from Chapter 1-3 will be presented in two chapters, namely chapters 1 and 2. 3. The new chapter 3 will focus on the role of project manager, where many aspects of the project manager's role will be specifically displayed on P MI Talent Triangle. Process tailoring will be created, which involves analysing the project to determine how much attention should be paid to each process (depending on the size and size of the project). 5. There will be various notations in the new PMBOK® Differentiation Guide processes that are continuous (continuously performed) compared to non-current processes. This concept will be emphasized for the first time in the sixth edition. The concept of project coverage and product scope will also be underlined over the course of fir time. The earned-value toolkit will now include Earned Schedule Management. 8. There will be a distinction between communication (communication between two people) and Communication (artifacts such as published emails). The new Lesson Register is now part of the ITTO set. Project managers will now be asked to prepare updates on a regular basis (not just at the end of the project). In some areas, the standard has a more voluntary rather than binding tone. For example, for a collection of requirements, they can now say something about that here is a list of possible tool options. Choose which one that works best for your current project. Tools and methods will be grouped into common headlines. More attention will be paid to strategic and business knowledge, including discussion of business documents on project management. Each area of expertise includes four new sections: Key Trends: Concepts and New - Consideration of Adaptation Practices - Considerations for Flexible/Adaptive Environment 14. Instead of the previous 47 processes, there will now be 49 processes. Three new processes will be added and one process will be removed. New processes: Project Knowledge Management and Control Resources and Risk Response 16. Remote Processes: - The Close Procurement Process has been removed because its functionality has been combined into the Close Project or Phase 17 process. Some processes have been renamed: Ensuring the quality of execution has been renamed Quality Management The Human Resources Management Plan has been renamed Plan Resource Management Acquire Project Group has been renamed Acquire Resources Control Communications Control Communications Was renamed Monitor Communications Control Risks have been renamed Monitor Risks - Plan Stakeholder Management has been renamed The Stakeholder Engagement Plan - Control Engagement Stakeholder has been renamed The Stakeholder Monitor Engagement These changes reflect the PMI's determination to ensure that the standard confirms a changing business environment. The expected result is an increase in the number of successful projects. If you plan to appear in the exam before December 2017, you are advised to follow the fifth edition of PMBOK. However, going ahead, you should prepare with the PMBOK sixth edition.
