Paul van Lange (1961) has been Professor of Social Psychology, at VU since 2000 (and special professor at leiden University in 1999-2008). He has published more than 100 articles on topics closely related to human trust and collaboration in journals such as the Annual Review of Psychology, in the journal Personality and Social Psychology, and psychological newsletter, and currently conducts research on topics such as (a) aid and altruism, (b) rewards and punishments, (c) aggression, hormones and sports, (d) violation of norms and dishonesty, (e) social care, and (f) trust and non-representation In addition, with various colleagues he has edited or authored a number of books such as Atlas of Interpersonal Situations (Cambridge, 2003), Overcoming Social Psychology (Erlbaum, 2006), Handbook of Theories of Social Psychology (Sage, 2012). He is currently working on social dilemmas: understanding human cooperation (Oxford), power, politics and paranoia (Cambridge), and how to publish high impact studies (American Psychological Association). He has served or served various editorial roles (for, among other things. Over the years, his research has been supported by various scientific foundations around the world, including the Dutch Research Organization, the European Uninion, the private sector, and grants from scientific foundations in China, Finland, Germany, Portugal and Switzerland. Since 2009, he has been the Head of the Department of Social and Organizational Psychology and Head of the Research Program trust, Leadership and Cooperation This two-volume handbook is a study of the major developments of social psychological theories and models developed in this field. Written by leading international experts, each chapter is a personal and historical narrative about the development of teaching theory, including inspiration, critical moments and efforts to solve problems that influence of each of them on the canon of social psychology. Unique to this guide, these narratives provide a rich background for understanding how theories are created in general; How they are nurtured and formed over time; and how we can better understand their unique contribution to society as a whole through expertise.
