Series 3 series of metal slugs shooting the game. The game with a fairly simple gameplay, like any other series. The player must shoot at the enemy that comes, continuing to move forward. Typically, the player moves from the left side to the right side of the screen before meeting the boss at the end of the stage. It is usually much more powerful and larger, with more and more lethal weapons and hard to avoid. In each battle, the player will meet a lot of POWs, namely a skinny beard figure, which when nearby will give you items that are basically special bullets. Bullets are described with letter icons such as H for Handy machine gun, L for laser, S for shotgun and so on. We can say that their role is very important. Without a beard, we will fight against enemies with many rescue bars such as the boss of the hehee scene. Background story: In the previous series, the ruthless General Morden failed in his coup attempt at world governments. This time he returned to action with the same purpose, but with an alliance of invading an alien race. Of course, this makes all four of our brave characters in action again, but with a difficult battle because the enemy has the technology of intervening from aliens.
