More Toyota Tacoma is a pickup truck produced by the U.S. Japanese automaker Toyota as 1995. The initial generation of Tacoma, model years 1995 - 2004, was listed as a compact pickup truck. The second generation, model years 2005 - 2015, and the third generation, in adoption as 2015, are rated as average pickups and built in the U.S. and Mexico. Tacoma was launched in the U.S. in 1995 as a hilux follower, which before was sold under the name Toyota Pickup. Faced with Hilux, Tacoma is designed with a higher priority for ride quality, handling, safety and comfort over payload. Tacoma is available in six sets: SR, SR5, TRD Sport, TRD Off-Road, Limited and TRD Pro. Although SR is the cheapest Tacoma, it's not just bare bones. It can be provided with an extended cabin (Access Cab) with a 6.1-foot bed or a crew cabin (Double Cab) with a 5-foot bed. It is powered by a 2.7-liter four-cylinder engine with 159 horsepower and 180 pound-feet of torque and is equipped with a six-speed automatic transmission. Preheat and turn off the engine, wait more than 5 minutes, and check the oil level on the dipstick. Choosing Toyota Motor Oil Genuine Motor Oil is used in your Toyota car. Use Toyota-approved Toyota Genuine Motor Oil or equivalent to meet the next class and viscosity. Oil grade: ILSAC GF-5 multi-degree motor oil Recommended viscosity: 2.7 litre 4-cylinder (2TR-FE) SAE 0W-20 SAE 0W-20 engine is the best choice for good fuel economy and a good start in cold weather. If SAE 0W-20 is not available, SAE 5W-20 oil can be used. However, it should be replaced by SAE 0W-20 the next time the oil changes. Oil viscosity (0W-20 is explained here as an example): 0W in 0W-20 indicates the characteristic of the oil that allows cold start-up. Oils with a lower value to W make it easier to start the engine in cold weather. 20 in 0W-20 indicates the viscosity characteristic of oil when the oil is at a high temperature. Oil with higher viscosity (with a higher value) may be better suited if the vehicle is operated at high speeds, or in extreme load conditions. The 4.0 L V6 (1GR-FE) SAE 5W-30 SAE 5W-30 engine is the best choice for good fuel economy and good starting with cold weather. If SAE 5W-30 is not available, SAE 10W-30 oil can be used. However, it should be replaced by SAE 5W-30 the next time the oil changes. Oil viscosity (5W-30 is explained here as an example): - 5W in 5W-30 indicates the characteristic of the oil, which allows a cold start-up. Oils with a lower value to W make it easier to start the engine in cold weather. 30 to 5W-30 indicates the viscosity characteristic of oil when the oil is at a high temperature. Oil with higher viscosity (with a higher value) may be better suited if the vehicle is operated at high speeds, or in extreme load conditions. How to read the oil container label: The International Advisory Committee on Grease Specification (ILSAC) Certification sign is added to some oil containers to help you choose the oil you should use. Ignition syste NOTICE cooling system (only with iridium-tipped ignition candle (2.7 litre 4-cylinder engine)2TR-FE) Use only iridium-tipped ignition candles.
