We can rewrite your location in an entertaining way, and any app you want to try will do so or anywhere else in the world anywhere. Read our frequently asked questions before sending an email or leave a review: - Internet: to show map presentation.- Access to rough and thin place.- Allow layout locations in developer settings (apps) - Write and read external storage for export and import settings and KML files. Installation:- For older versions, lollipop (5.1) and below should be NewGPS! The Joystick system application (needed access to ROOT only for this action can be removed later). And layout seats should be disabled.- For Android versions 6 and 7, ROOT is not necessary, but you should install it as an application for simulated locations and put GPS in device sensors only, but if you need simulated locations without installing a simulated location app in settings from the developer, NewGPS! The joystick should be a system application (ROOT access required only for this action can be removed later). and the layout of the seat should be turned off. Walk, in The Sniper, the ability to walk to a specific coordinate without making teleportation. Copy the coordinates by clicking on the red coordinates in the bottom right corner. Static Mock Location: Android 6 and 7 with a security patch (No Joystick). Mock updates the timer (the option of choice every few milliseconds that simulates the location). Import and export options (WRITE_EXTERNAL_STORAGE permits). Minor error fixes. Find nearby players to trade We can rewrite your location in an entertaining way, and any app you want to try will do so or anywhere else in the world anywhere. The joystick should be a system application (ROOT access required only for this action can be removed later). And places should be turned off. Walk, in The Sniper, the ability to walk to a specific coordinate without making teleportation. Copy the coordinates by clicking on the red coordinates in the bottom right corner. Static Mock Location: Android 6 and 7 with a security patch (No Joystick). Mock updates the timer (choice option every few milliseconds, simulating export parameters (WRITE_EXTERNAL_STORAGE permits). Minor error fixes. Find nearby players to trade After VMOS officially stated that they no longer developed VMOS for Pokemon GO Spooof many VMOS users were looking for an alternative VMOS Fully Loaded. Now they can no longer fly easily anymore. Yes, VMOS is the easiest and easiest way to fly Pokemon GO. But now it is impossible to use VMOS. To be able to spoof Pokemon Go the most important app is the Pokemon GO Joystick App. There are many Pokemon Go Joystick apps that are on the Play Store. But there are also many of them that cannot be used or are not compatible with Pokemon GO (can be used other than Pokemon GO). The best Pokemon GO Joystick app, which is suitable for swapping Pokemon Go on non-root smartphones, is FGL PRO. What is the best Pokemon GO Joystick App for a non-root phone? The FGL Pro is the best Pokemon GO Joystick app that can be used to spoof Pokemon GO on non-root android smartphones. With features that have been adapted to the game Pokemon GO. The FGL Pro is one of the best alternatives to VMOS. As you install the FGL Pro if you want to install the FGL Pro you must first make sure that you have the android smartphone specs needed in order to be able to operate the FGL Pro. Please note that not all Android smartphones can run FGL Pro.Mandatory RequirementsOnly Android smartphones with Android Security Patch until June 2018. Here's how to find out Android Security Patch.Open Settings.Select About PhoneLook for Android Security Patch Level until June 2018.Android Marshmallow (Android 6). There are some Android 7 and 8 that can, but it is still recommended to use Android 6 for stability. Google Play services 12.6.85 (you should downgrade if your version of the Google Play Store is higher than Google Play Store 12.6.85). As you install the FGL PRO if your Android smartphone meets the three conditions above, you can continue at this stage. Follow the steps correctly Downgrad Google Play Service to 12.6.85Make sure you check the version of Google Play Services first, if you already have version 12.6.85 or below, then you don't need to downgrade the Google Play Services version. Follow the steps correctly to check out the Google Play service. Open Settings Choose Control Apps/AppsSearch for Google Play services (Make sure the app system isn't hidden). Choose Google Play ServicesCheck version of Google Play services. BLUE MARKER (20.09.14) is the Google Play Services Version and the red MARKER BUILD NUMBER (100400 each phone has a different BUILD NUMBER to make sure you download the correct versions). Turn off the Google Play Store and never use the Google Play Store again (required) your version of Google Play services above 12.6.85, please follow this step. Delete Google Play Services UpdatesOpen Settings Select Device AdministratorDeactivate Find My Mine To customize, choose apps/ AppsSearch for Google Play services (Make sure the app system isn't hidden). Select Google Play Services Delete Updates Installation Google Play Services 12.6.85Install FGL ProOpen Google Play StoreSearch for FGL PROInstall FGL Pro. Follow the guidelines below so that the FGL PRO can run smoothly. Open SettingsUblish about PhoneTap 7x on BUILD NUMBER. The developer's options will be included. Open The Options.Select Mock App Location developer. Choose FGL Pro.DoneNow you can fake Pokemon GO with your old phone. ConclusionsIf you have an old android smartphone, then FGL Pro is the best Pokemon GO Joystick app. It is highly recommended to use FGL PRO if you do not want to eradicate your android. The FGL Pro is the best and most reliable Pokemon GO Joystick app for older smartphones. Download PGSHARP APK for Android! PGSHARP APK is a model of the Pokemon Go app with the Pokemon Go joystick installed. PGSharp v1.0.2 is an adaptation of Pokemon Go v0.171.4 (Update 18, 2020 update). Only if we install this will we be able to destroy Pokemon Go directly. You no longer need to install any support applications. In other words, install and run. PGSharp is similar to the iSophore and logo that works on the iPhone (iOS), but PGSharp works on Android.PGSHARP APK features Unlike the sphere on the iPhone, PGSHARP APK offers some features with many features. Here are some PGSharp featuresEmbedded Fake GPS Joystick App Fake GPS Location Installation (Embedded) We don't need to reinstoruin it. AutoToWowWallock (still under development, insects may appear) Running AutoToWallock to lay eggs in Pokemon Go is a very useful task. With this feature, our characters can play automatically without moving the joystick. However, this work continues, and there are still errors. Custom and King Speed is a feature that allows us to adjust the walking speed of our character when introducing Pokemon Go joysticks. The teleport is only available by selecting a location on the map, and you (Teleport) can go to the right place. Select a location based on a map. PGSHARP APK RequestTo play Pokemon GO with PGSharp, make sure you have a Pokemon GO PTC account. Because PGSHARP APK can only be used with PTC accounts. You can't log in using the Google label. If you want to get the most out of pgSharp, consider using an alternative account. Don't use your own Account. Advantages and disadvantagesAdvantagesNo root required: You don't need an Android smartphone with root advertising. The Pokemon Go Joystick app is pre-installed. You don't need to install the LossOnly app to work on PTC PTC Can I install PGSHARP APK on my Android phone? You can download PGSHARP APK by clicking on the button above to start downloading. Once the download is complete, you'll find THERK in your browser's Downloads section. Before you can install it on your phone, you need to make sure that third-party apps are allowed on your device. To make this possible, the steps are basically the same as below. Open Menus and security and check for unknown sources so that your phone can install apps from other sources than the Google Play Store.Once you have completed the above step, you can go to download in your browser and click the file after downloading. An installation tip will appear asking for permission and you can complete the installation steps. Once the installation is complete, you can use the app as normal. Frequently asked questions: How ApkResult.com APK guarantee 100% security for PGSHARP APK? A: If someone wants to download an APK file from ApkResult.com, we check the corresponding APK file on Google Play and allow users to download it directly (of course, they are cached on our server). If the APK file doesn't exist on Google Play, we'll find it in our cache. The question: Can I update the PGSHARP APK from the Play Store when I install APK from ApkResult.com?A: Yes, of course. The Play Store installs downloads from Google's servers, except for downloading and installing your service (page loading), and downloading pages from websites such as ApkResult.com is the same. The update will begin as soon as you receive the Play Store version of the new version of the Play Store. A: Apps need access to some of your device's systems. When you install the app, you'll be notified of all the permissions you need to run the app. ConclusionPGSHARP APK Is currently the only app that allows us to spend Pokemon GO on Android smartphones without roots. PGSHARP Apk is the best Pokemon Go joystick app for non-native Android smartphones. Please note that we only publish the original and free version of APK PGSHARP APK without any changes.
