Download Pokemon Go and you find yourself dealing with the same premise - you need to catch them all. However, this time, you will do so by walking the streets of your city. Pokemon Go is a smartphone game that lets you catch Pokemon in the augmented real world using your phone's maps and GPS. With GPS, phone cameras and mapping technology, this game changes the real world as you see it. The premise is simple - catch all the creatures around you. Without time limits and consequences, if you don't, Pokemon Go relies on its addiction to keep you going. There are 151 different Pokemon to catch, and the nearest one will be popping up on your phone. When you approach one, throw a Pokeball on it - if you're lucky, you'll catch it. The idea of the game is to make children notice the world around them. Since its release, it has sent hundreds outside to play. Although the graphics of the game are not perfect, though, with wide, softly drawn characters, with such exciting gameplay that hardly matters. The game uses real locations to entice players to go out in search of Pokemon. You can download it for free, but there are also specific in-app purchases to enhance your experience with power-ups and extra items. Note that this game will eat up your data and batteries - make sure you have enough as if you're moving outside the WiFi range and charger. Another problem is that Niantic, the company behind the game, gets huge access to your personal information. Where can you run this program? When it comes to Android devices, this game works on OS versions 5.0 and above. Apple devices 12.1.2 and above also support it. Is there a better alternative? No, Pokemon Go is, for the moment, one of a kind. However, if you are looking for similar games, Geocaching, Ingress, and Mobbles offer similar excitement and make you move to get through the gameplay. Pokemon Go is a game that provides certain hours of fun 100% free. However, be careful while playing and mind your actual environment. Should you download it? Yes, if you've heard about the game and felt drawn to the hype. It provides a unique gaming experience that is completely addictive - and healthy! So, there are a ton of games like Pokemon out there. We will focus on the two main types for this list. Beast collecting RPGs as you see on portable consoles and card game as you see in real life. Of course, there are actual Pokemon games on your mobile phone now along with some Pokemon apps as well. Click on the links for these lists. Here are the best games like Pokemon (but not Pokemon Games) for Android.Beastie BayBulu MonsterClash RoyaleDigimon ReAriseEmulatorsEvoCreoLegends from RuneterraMonsterCrafterMonster Hunter StoriesNeO MonstersRead more:5 best calculators Pokemon Go IV for Android15 best RPG for AndroidBeastie BayPrice: Free to play This game is a mixture of monster catching and sim so you'll have quite a bit to do. The modeling side is you to build a city, plant crops, and manage all your resources. Then you go out into the desert, catch the beasts, trade them and fight them. There is a ton of games here and it should keep you busy for a long time. It's free to play the game, so there are some unwanted items. By and large, Kairosoft is doing good with this. Bulu MonsterPrice: Free to playBulu Monster is something a little closer to the actual Pokemon experience. You set out to capture different creatures and then pit them against other players. The game boasts over 150 monsters in total along with 50 NPC monster trainers, 14 different maps to explore, and a storyline for players to follow. It has online PvP under the norm, but it can be a bit of a dubious experience. It's free to play the game, but it's nice for a decent amount of time. Clash RoyalePrice: Free to playClash Royale is a duel game and it fits more according to the Pokemon card game option. Players create a collection of monsters from the Clash of Clan Universe and fight them in online PvP against another player. You can earn different cards by filling the games and ranking up. There are also a few arenas, clan mechanics for you social people out there, and more. The game is also insanely popular, so there's a ton of Twitch and YouTube content as well. Hearthstone is another excellent, popular duel games as well. You can choose any of them. Digimon ReArisePrice: Free to playDigimon is one of the biggest competitors of Pokemon and Digimon ReArise is mobile game in the Digimon universe. This one has a storyline, a lot of Digimon to collect, and a lot of online players to duel. This happens outside of the typical Digimon universe and focuses more on digimon-trainer relationships. The game was a rough go when it first started due to optimization problems. Most of these issues are gone and the game is actually pretty good. EmulatorsPrice: FreeThere has a bunch of old Pokemon games on portable consoles you can't buy anymore. So it makes sense to try them on the emulator. There are some decent ones such as John GBAC for Game Boy Color and DraStic DS Emulator for Nintendo DS. Recently, Citra (still in beta) launched for the Nintendo 3DS as well. Just get those emulators, find games, and play. Most emulators have basics such as fast-moving modes, save and download states, cheat code support, and more. It's been the only way to actually play Pokemon on your mobile phone for a long time and it's still a great way to play the classics. In this JRPG title, players start by collecting monsters, battling with other evokers (trainers), and making their way through history. Developers boast a 40-hour campaign and about 130 monsters to capture and develop. It also has cross-platform multiplayer and the ability to customize your monsters according to any strategy you cook. It's a paid in-app shopping game, but in-app purchases are optional. Legends RuneterraPrice: Free to playLegends Runeterra is a duel game riot games, developers of League of Legends. This game is similar to Clash Royale and Hearthstone. Players collect cards and build decks around their favorite champion. From there, you can fight people online, improve your strategies, collect more maps, and even duel your friends. There are 24 total champions and the game puts less risk to RNG than most games in the genre. It's newer, but it's pretty good. MonsterCrafterPrice: Free to playMonsterCrafter is one of the more unique games like Pokemon. This game allows you to create your own monsters instead of giving you a set number to collect. It uses the same graphic style as Minecraft, and it gives players many options for modular designs when it comes to their monsters. You just build a creature and then fight it against other players. It's a free game, but it's definitely a neat premise with lots of potential customization options. Monster Hunter StoriesPrice: Free Demo / \$19.99Monster Hunter Stories kind of like Adults. It's a full name for JRPG with a narrative storyline, excellent mechanics, and tons of things to do. It's a pretty sure port version of 3DS 3DS he doesn't miss a single important part of the game. The free demo is actually a prequel to the main game and you can port your save in the main version if you decide to buy it. It's pretty expensive at \$19.99, but there are no extra in-app purchases to gum up to work. Most complaints are minor, especially with the latest updates to fix many problems. We have a demo tied to the button below. Neo MonstersPrice: \$0.99 with in-app purchasesNeo Monsters is another Pokemon clone. The game boasts six different worlds and a bunch of things to do. The developers say there is almost 60 hours of play here. Combat features up to four against four battles with up to 16 total monsters. This quote is little more than a standard Pokemon game. There are also over 1000 monsters to collect, different evolutions to get, and six leagues to win. This is one premium game with some additional. optional in-app purchases. Thanks for reading!
