Deltran Battery Tender 6V/12V 4Amp 5 and 10 Bank Battery Control System Designed for six-cell and three-cell flooded /AGM/GEL lead-acid batteries and four-cell lithium-iron phos (LiFePO4) ESSENTIAL SAFETY INSTRUCTIONS 1) SAVE THESE INSTRUCTIONS - This guide contains important safety and operation instructions for the P/N 021-013 021-013 charger models. 2) Do not charge the charger with rain or snow. 3) The use of a mount not recommended or sold by the manufacturer of the charger can lead to the risk of fire, electric shock or injury to people. 4) To reduce the risk of damage to the electrical fork and cord, pull the fork rather than the cord when the charger is turned off. 5) The extender should not be used if absolutely necessary. Using improper lengthening can lead to the risk of fire and electric shock. If the extension cord should be used, make sure that: a) That the pins on the fork extender the same amount, size and shape as that of the fork on the charger; b) That the extension cord is properly wired and in good electrical condition; and c) This wire size is large enough for the ac ampere rating charger, as indicated in table 1 TABLE 1 Cord length, AWG leg cord size 6) Do not operate charger with damaged cord or fork - replace the cord or connect immediately. 7) Do not work with the charger if it has been hit sharply, discarded or otherwise damaged; take it to a qualified soldier. 8) Don't disassemble the charger; Take it to a qualified military member when maintenance or repair is required. Incorrect assembly can lead to the risk of electric shock or fire. 9) To reduce the risk of electric shock, disconnect the charger from the socket before attempting any maintenance or cleaning. Turning off controls won't reduce this risk. 10) WARNING - RISK OF EXPLOSIVE GASES. (a) WORKING IN THE VICINITY OF A BATTERY IS DANGEROUS. BATTERIES GENERATE EXPLOSIVE GASES DURING NORMAL BATTERY LIFE. FOR THIS REASON, IT IS IMPERATIVE THAT YOU FOLLOW THE INSTRUCTIONS EVERY TIME YOU USE THE CHARGER. b) To reduce the risk of battery explosion, follow these instructions and those published by the battery manufacturer and manufacturer of any equipment you are going to use in close proximity to the battery. View cautionary markings on these products and on the engine. ⬆ 25 50 100 150 18 18 18 16 Guide P/N 392-0386-R0 1 11) PERSONAL PRECAUTIONS a) Consider making someone close enough to come to your aid when you're working next to a battery. b) There is a lot of fresh water and soap nearby in If the battery acid contacts the skin, clothing or eyes. c) Wear full eye protection and clothing protection. Avoid touching your eyes while working next to the battery. d) If the battery acid comes into contact with the skin or clothing, wash immediately with soap and water. If the acid enters the eye, immediately flood the eye with running cold water for at least 10 minutes and immediately get medical attention. (e) NEVER smoke or smoke spark or flame in close proximity to the battery or engine. (f) Be especially careful to reduce the risk of a metal instrument falling on the battery. It can spark or short-circuit the battery or other electrical part that can cause an explosion. (g) Remove personal metal items such as rings, bracelets, necklaces and watches when working with the battery. The battery can produce a short circuit current high enough to weld a ring or similar metal, causing severe burns. (h) Use the charger only to charge lead-acid/AGM/Lithium Iron Phosphate. It is not designed to supply electricity to a low-voltage electrical system. Do not use the charger to charge uncharged batteries, which are commonly used with household appliances. These batteries can burst and cause harm to people and damage property. (i) NEVER charge a frozen battery. 12) PREPARING TO CHARGE a) If necessary, remove the battery from the car for charging, always remove the ground terminal from the battery first. Make sure all the accessories in the car are off so as not to cause an arc. b) Make sure the area around the battery is well ventilated while charging the battery. c) Clean battery terminals. Be careful not to corrode with the connection with the eyes. d) Add distilled water to each cell until the battery acid reaches the level indicated by the battery manufacturer. Don't overcrowd. For a battery without removable cell caps, such as valve-adjusted lead-acid batteries, carefully follow the manufacturer's instructions. (e) Examine all battery manufacturers with specific precautions, such as removing or not removing the cell lid while charging and recommended charge rates. (f) Identify the battery voltage by referring to the car owner's manual and make sure the voltage selector switch is installed at the right voltage. Do not use a charger if the battery voltage does not match the charger's output rating. 13) CHARGER LOCATION a) Find the charger as far away from the battery as dc cables allow. b) Never unprop the charger directly over the charged battery; battery gases corrode and damage the charger. c) Never let the battery acid drip onto the charger while reading the electrolyte of a specific gravity or filling the battery. d) Do not work with the charger in a closed area and do not limit ventilation in any way. (e) Do not install the battery on top of the charger. 14) DC CONNECTION PRECAUTIONS a) Connect and disable D.C. weekend clips only after installing charger switches on ~~X~~off~~X~~ and removing the AC cord from the electrical outlet. Don't let the clips touch each other. b) Attach the clamps to the battery and chassis as indicated in 15 (e), 15 (f) and 16 (b) through 16 (d). 2 view large photos of Swipe Photos to view more details

Each paper sample in the SSC Stenographer Class C and D 2020 has a assigned weight, so don't miss any paper. Prepare and question the paper and online test for SSC Stenographer in the English language exam and check the test results. Sr. Paper Action Title 1. SSC Stenographer Exam - English Free Test We Run Combo Offers ! with heavy discounts and cost savings. Combo Packages includes - Online Mock Test Series - Important Important Issues or MC's - Documents of the previous year with an answer. Subjectwise / Section mock Test - MC / Important Questions - Documents of the previous year's SSC Stenographer Issue Documents 2020 - Some coaching institutes release SSC Stenographer 2020 question documents for Class C and D on exam day. Candidates can check the paper drawing and SSC stenographer curriculum by checking the question documents of the SSC stenographer's 2020 exam. Resolving last year's SSC Stenographer 2020 questions is the best practice to prepare for exams. These SSC Stenographer articles from the previous year help applicants to better understand the exam process, i.e. the sSC stenographer exam template, difficulty level, type of questions, etc. Candidates preparing the SSC stenographer 2020 exams must download from the article the sSC stenographer questionnaire. The Latest: New SSC Stenographer exam dates announced by SSC Stenographer 2019 exam commission October 7, 2020 The question documents will be uploaded to the main GSK website. Visit the official SSC website - ssc.nic.inClick at SSC Stenographer Stenographer Paper and answer key' tabEnter asked for details and click on The SendSSC stenographer's question Document 2020 with the answer key to be displayed on the screenit can be downloaded, as well as in the PDFDownload format links to SSC Stenographer in the previous year's documents were also presented in the table below. Download the SSC Stenographer Previous Years PDF Documents (Grade C and D)Benefits Solution SSC Stenographer Previous Year Documents (Grade C and D) Candidates are advised to decide as many SSC stenographers in last year's issue documents as possible to get the overall cost of the exam. Solving previous years of SSC stenographer issue documents helps the candidate as follows. Gives them the overall cost of expertise After a candidate's quick resolution of the problemThis them to better evaluate the questionnaire and develop a strategy to address the issue of paperHelps in the self-assessment of applicantsBoots the level of confidence of applicants during the examinationTech applicants about the management of time and its importance in Solving the issue of paperMake applicants are aware of their weaknesses and where they can improve SSC Stenographer Issue Documents 2020 - Paper PatternDecision SSC stenographer of previous question paper helps applicant learn more about SSC stenographer exam curriculum and template Check the tables below for more information about the stenographer's exam pattern.
