

Terraria thorium class guide

 I'm not robot  reCAPTCHA

Continue

For cosplay installations, see Guide: Ideas and Cosplay. Terraria does not have a formal player class or alignment system. However, weapons can be grouped into four (and in the case of console versions, five) different categories depending on their type of damage - melee, range, magic, and call. Each class has its strengths and weaknesses and has a wide range of weapons to choose from. Melee is a sport of the highest defense in average and decent crowd control, but many melee weapons have a short range of attack, and those that attack from a distance tend to be below the dps average. Ranged is a powerful class with very high single-purpose damage power from a typically long distance. Users must collect materials to make ammunition or buy them from an arms dealer. Magic is fragile, but very diverse in attack style, often using special mechanics such as homing, vitality and damage impact areas. It is concealed by dependence on mana, which recovers very slowly if the positive effect of Mana regeneration does not work. Magical users must create or buy mana potions if they want to use high cost mana weapons for long periods of time. The call is good for agricultural enemies, but most calling armor have low defenses, and the challenge is often inaccurate against enemies who move very fast. Whips are the main weapon for further addition to their arsenal. Each class acquires more complex abilities as the game progresses, allowing for more strategic diversity in combat. Players are encouraged to try out every weapon they find to help determine what works best for them. It is also recommended to use buff potions and healing potions to increase efficiency and survivability in combat (especially during events and boss fights). In general, it is recommended to focus on the same class. Many armor, accessories and buffs only benefit a particular class, especially later in the game. However, even if you do not specifically use a hybrid kit, a backup weapon from another class can be useful if the situation requires another weapon. In addition, each class has at least one minion slot, so it is recommended that it be used at all times. Pre-bosses edit the source Prior to meeting with the boss, install bonuses from wooden and ore armor will almost exclusively provide additional protection, and accessories will not distinguish by the type of weapon when providing bonuses. Combined with the general shortage of weapons and the need to survive, there is no point in sticking to the class early on. For these reasons, players are advised to use whatever they can get their hands on. (Note that Shadewood and Ebonwood are the best wooden equipment options, and better than cactus equipment.) Pre-Hardmode (edit the source of editing) Once you start to defeat the first bosses, new options become available. In addition, you must have enough mana to use a magical weapon. However, however, Armors still only give small bonuses, so you can still safely mix class styles without much loss of damage. Dedicated conscripts are still quite weak at the moment, although their call elements can be used by any class. At the moment, at the moment, it becomes almost mandatory to choose a certain class. Many accessories only benefit a certain class, and armor kits begin to benefit only certain types of damage. However, the hybridization of the appeal remains not only viable, but also extremely powerful due to the presence of a powerful Sangin headquarters. At this point, you can also start working on getting good modifiers for your equipment. Pre-Plantera (edit the editing source) This is the point where the mixed class becomes quite weak compared to one class, mainly because there are separate armor sets for each class. You can of course still play in a mixed class, although it is recommended to have a backup armor set (such as in vanity slots), so you can quickly switch for some extra damage or defense. Consecrated armor may be preferable for additional survivability. Pre-Golem (edited source editing) With Hardmode Dungeon and Pumpkin Moon now available, players have access to a variety of new equipment. In addition, any Biome keys you receive can now be years to use. Terraprisma, while very difficult to get with Pre-Golem gears, is extremely powerful through the rest of the game. Pre-Lunatan events (edited by source editing) Equipment from Golem, the Martian invasion and the final tier of the Old Army is now available. The challenge to the Duke of Fishron, empress of Light and Frosty Moon is also now feasible. Endgame (edit the editing source) At the moment you can start using mixed class settings again, since you can kill everything easily. (except for the moon lord). The multiplayer edit source these setups sacrifice part of their own damage to make the boss struggling smoother for the entire team. Tank keeping bosses in one place should, depending on the size of your group, cause the overall batch of DPS to be higher, due to fewer deaths, ease of aiming, and no situations where one player runs away with the boss while everyone else is chasing them. The healer helps to increase survivability for his team, but sacrifices a lot of his own damage and defense. Other sets of equipment are not intended for combat, but for other activities such as fishing, construction and exploration. All equipment is optional and makes it easier to complete the task, but otherwise just what's at hand. From Terraria Mods, Wiki The Thorium Mod significantly expands the number of options available for four vanilla classes - Melee, Ranged, Magic and Summon. In addition to this, mod adds a completely revamped Thrower class with mechanics unique to the Thorium Mod, as well as two brand new classes for the player to play play Healer and bard. As with vanilla, the versatility, capabilities and power of each class increase as the game progresses. This, as well as the existing selection of vanilla, means it can be overwhelming for the first time a player to decide what to use. This guide will provide potential weapons, armor, accessories and other options for each class at multiple points of the game. Please note that this guide will only apply to Thorium equipment. For a list of Terraria vanilla equipment, please refer to this guide. For more detailed guidance for the Healer class, please refer to this guide. If you want, use bombs to immediately access Shadow Orbs/Crimson Hearts and Meteors. Take on an army of goblins or explore the jungle if you are willing to face a lot of danger. Bosses in this section of Grand Thunder Bird, King Slim, and Chulhu's Eye. Pre-Skeleton (edited source editing) This section assumes that the player has visited all relevant bios, and defeated all previous bosses and intrusions before Skeleton. Preliminary Wall of Flesh (edited by editing source) This section assumes that the player has visited all relevant bios, and defeated all previous bosses and intrusions in front of the Wall of Flesh. Pre-mechanical bosses edit the source This section assumes that the player has visited all relevant biomes, and defeated all previous bosses and intrusions to Gemini, Destroyer, and Skeleton Prime. Pre-Plantera (edited by the source of editing) This section assumes that the player has visited all the relevant bios, and defeated all previous bosses and intrusions before Plantera. Pre-Golem (edited by the source of editing) This section assumes that the player has visited all the relevant bios, and defeated all previous bosses and intrusions to Golem. Pre-Editing Events (edited by editing source) This section assumes that the player has visited all relevant bios, and defeated all previous bosses and intrusions to The Heavenly Pillars. Pre-Primordials (edit source) This section assumes that the player has visited all relevant biomes, and defeated all previous bosses and intrusions to the original. Endgame edit source This section assumes that the player has visited all relevant bios, and defeated all the bosses and intrusions provided by Vanilla and Thorium Mod.
