For Bladers there are 2 Build Paths it now depends on you if you go to STR build or DEX build. STR (Blades) DEX (Katanas) SKILL BUILD PASSIVE SKILLS ACTIVE SKILLS Attack Skills (Note from left to right) Hawk Hunter Level 20 Lightning Slash Level 20 Death Tempest Level 20 Infinity Blaze Level 20 Blade Scud Level 20 Twin Moon Slash Level 20 (optional) Mirage Grind Level 20 (optional) Force Kick Level 20 Level 20 Double Slash Level 20 Impact Stab Level 20 Buff Skills Intuition Level 20 Intensive Blade Level 20 Art Fierceness Level 20 Deadly Level 20 Regeneration Level 20 Resistance Barrier Level 20 Curse Dodge Level 20 Debuff Skills Field Of Fear Level 20 Skills Dash Fade After Setting Up His Skills Now to Have a Guide to Agriculture. How to use BM 2 (Grappler) Just hit BM2 then choose a way to attack based on the BM2 Attack Modifier How to use BM 3 (Knucklet Striker) for PVE Combo I suggest these. A - A - B - Frontal Attack A - A - B - Frontal Attack B - B - A - B Payback Lethality How to use BM 1 (Illusionist) This BM is best for massive mass groups, so use it and since it gives a good boost in critical speed you can change your rings or helmets for pure damage to the elements. The last thing to consider now is the hardware (its for beginners) Note that the starting characters has default settings for critical speed and critical damage 5% Critical rate 25% Critical damage Rings Recommended: Destructive Ring of Fortune No 3 / Ring of Fortune - 4 Destructive Critical Ring No. 3 / Critical Ring 2020 So, about the statistics I only have to put a point in STR or DEX? Not both? So, about statistics should I just put points in STR or DEX? Not both? Not both, if you go with the blades, then go full str If katanas go full type Dex Dex has the best attack speed and def speed I have a question about F1-F4 tabs. When Im using F2 combo and when is F3? My main combo on F2 yup? Sorry about that question. Im back to Cabal after years and Im confused lil'bit I have a question about F1-F4 tabs. When Im using F2 combo and when is F3? My main combo on F2 yup? Sorry about that question. Im back to Caballe after years and I'm confused lil'bit F1 combo, usually on pve While the F2 combo is on pvp Hello, do you have an updated beginner's guide for WA and FS? I don't understand about AABAA.... Sorry I'm new, please explain to me Hello, I just got back from the game Caball. What are the 6 skills that you have chosen on your Blader? Thank you! Hello, I just got back from playing Cabal. What are the 6 passive skills that you have chosen on your Blader? Thank you! There's already a picture above to give you Ok thanks. How about Gladiator? in your tab, what's your pve? Pvp? can I point it out a little more. DEX - More Def/Atk Rate so enemies skip more often and you click more often STR and more ATK/DEF Pvp wise is the best choice conclusion if you go to DEX enemies to skip more often, but with combo regardless of your def bet won't miss out. Here def is not much but reduces the incoming dmg. So PVE I would consider DEX if you are solo and STR for PVP and group games. Blade or Katana. Blade PVE wise deal is more attack as you are unlikely to miss anyway. Katana may be the reason for considering a better attack rate for bm2 and bm3, but most PPL take blades anyway to maximize there dmg. what passive skills to get in the early 90s because I can't get to know them all at once..... not enough slots yet...
