Increase the power of the Shikigames or the strength of the squad as you know that you can deploy certain characters on the board/battlefield. And if you want to increase the chances of winning - you need to become stronger. There are two ways to become stronger - deploy more Shikigames or upgrade existing Shikigames. To deploy more Shikigames, you will need to increase the size of the squad. And to do this, you have to raise the level of the board. Spend coins to provide EXP and level to deploy more characters. It takes a long time - it takes a lot of turns to save so many coins. But you should try to take it at least 7-8 sizes. Shikigami Update - You can fuse three identical Shikigames and increase the power. For example - you can fuse 1-star Yuki (x3) into a 2-star Yuki (x1). This means that (3) Yuki will fuse and you will get (1) top class/level Yuki. Pay attention to the tile box and grab identical units if you want to get stronger this way. If you have (3) units of a certain class, you can use the pong option on the screen to fuse. We recommend increasing the number of squads so that you can deploy more Shikigames. And, focus on just one or two Shikigami updates. 2.) Apply the bond effects in the guide part above, we explained how to activate the communication effect. Make sure to buy Shikigames depending on their type and position to activate the bond effect. For more information, read the guide to the bond effect above. 3.)
