Should be used when the economy is in Or recession. When the economy is growing, its leaders should cut back spending and raise taxes. This conservative fiscal policy ensures that economic growth will remain sustainable. A nation's central bank could also spur growth with monetary policy. It can increase the supply of money by reducing interest rates. Banks make loans for autos, schools and homes less expensive. They also reduce credit card interest rates. All these boost consumer spending and economic growth. evolution.
