What's more, these apps also allow you to unsubscribe themes on your phone. You can even customize your notes, save it in different formats, and even share them with colleagues. You can also check out: 11 best speech apps to text for Android and iOS These apps can make you way more productive as you can take quick notes in a hurry. Here's a list of the best handwriting conversion apps for Android and iOS users. Check it out! Pen to Print - Transforming handwriting into text Let's start with an app called Pen to Print - Convert handwriting to text. According to its name, you can already predict what tools it contains - it turns any handwritten text into digital. To begin with, let's look at how you can use this app. First of all, this app is a must for every person who somehow works with numerous text files and notes. What's more, the app can also be very useful for students - imagine a world where there is no need for hours to find out incomprehensible words in your friend's program. As you start using the app you will read an article on how to use it. After that, you'll need to give examples of your handwriting in the app. Along with this, this app does this scanning and discover your paper notes and then turn it into a report on your phone. Also, if you see that the app has made a mistake, you can fix it yourself. However, according to the comments and claims, this app is very good at detecting words and putting them into sentences. In addition, all the texts you add to the app will be stored in a cloud service with easy input into it. What's more, you can use the app to detect your meeting diary, and the app will turn it into a table that you can sync with your calendar or other notes app. To sum up, if you want to get rid of old books by keeping data on it, a print pen is a good tool for that. Check it out! You can also like: 11 Best Day Planner Apps for Android and iOS back in the menu - The second app on the PenReader list. This is another application that can turn any handwritten documents into digital text. Let's start by looking at the main purpose of this application. First of all, this app can turn everything you write on your phone screen into a full document. In other words, when you spell a word, they should be placed on top of each other. After that you can add that word to the dictionary, and the app will remember that. It should be noted that goes very fast - it gets seconds to discover the word. In addition to this, the app has a spell check, so even if you made a mistake, the app will fix it. In case you still don't get the point of this app, it gives you the opportunity to start new notes right on the device's screen and it will be turned into digital text so you can read it easily. Once you've completed the file, you can save it as a document and share it with your colleagues. Along with this, the app is constantly updated, and now it works on small screens as good as with large ones. In addition, there is a tool that can detect and recognize a word, even if it is written in part. To sum up, if you write notes often, but don't always have a copy at hand, PenReader will be your savior. Try it won't disappoint you! Back to the menu - If you've ever searched an app to turn manuscript text into digital, you've probably heard about it. Google Handwriting Is an app that allows Android users to write on a phone screen and turn it into full text. Let's take a look at the original idea of this app. First of all, this app is a savior in situations where you need to record something quickly and you only have your phone handy. Given that not everyone can hit the keyboard fast enough, the ability to use the phone as a copybook can be very useful. Along with this, it's a full featured standalone app, so you don't need extra devices to write. In other words, the quality of recognition is so great that you don't need a stylus, even if you rule on a small smartphone screen. What's more, the app doesn't want to be a regular boring app, so you can also express your emotions to be converted into emoticons. It should also be noted that if you don't like how the app defined your theme, you can change it yourself. In addition, you can correct the words with errors and save it to the app to remember it. To sum up, if you want to use the device as a laptop, Google Handwriting is a good option for you. Check it out! Back to the menu - The Penultimate is another good manuscript to check out the app with a huge number of features. This app allows you to take notes about school and university lessons, at work, and mostly where you need to be. In addition, you can also draw a few pictures and write down your ideas in the most creative form. This app is a new form of pen and paper that will always be in your pocket ready for use. Along with this, it gives you the ability to use your phone more productive as you can switch to reminders that will tell you to send a specific document to a particular person. What's more, according to people's comments this app has a powerful

detection feature, so there won't be a huge spelling problem. In addition, there is an opportunity to enlarge the page, choose the color of the writing tool, and even choose it. In addition to this, this app syncs with Evernote so make sure to install it and make a user account. Once you do that, you will have a chance to keep it there. What's more, you can also organize your notes by separating the separation in compilations and thematic sections. It should also be noted that the app has a built-in spell check, so even if you made a mistake, the app will fix it. To sum up, if you want to go along with the development of technology and be able to write notes right on your phone, the penultimate is a good choice for you. Check it out, you won't regret it! Back to the menu - The name of the next app speaks for itself. The Text Scanner (OCR) is another app that scans your documents and converts them into a document on your phone. Let's take a look at how you can use this app. First of all, this app will destroy the problem when you need to write a long URL using only the keyboard. What's more, any phone number you see on the tabloids can also be scanned and stored on your phone in seconds. In addition, the app is also able to scan the faces of characters and recognize them (we can't be sure what you might need this feature for). Along with this, it has an incredibly fast reading speed, so anything you want to scan can be detected within seconds. It should also be noted that this app detects more than fifty different languages! Sounds impressive, but you should still see if your on the list (it's most likely there, but in case). In addition to this, it is capable of reading texts with different backgrounds, even if it seems impossible. What's more, the app can also detect handwriting, so if you want to turn your documents into a digital form this app is a good way to do so. You can also send your documents to your co-workers and upload them to your cloud service. To sum up, if you're tired of writing information using a keyboard, you can use the Text Scanner (OCR) app to scan. Try it, you won't be disappointed! Back in the menu - Handwriting Note is the easiest-to-use app that gives you the ability to handwritten on your phones. Let's start by considering how you can use this app. First of all, it is very intuitive because you write notes like you would on a paper sheet. You can use a special tool to make writing easier on the small screen, but it's totally up to you. It must be said, after a few attempts you will probably understand how to write without additional equipment. Along with this, the process of writing notes is fully customizable, so you can change the hue of your writing tool, saturation, and size. What's more, once you're done with your document you can zoom in to see all the details. It should also be noted that the app gives you a choice depending on whether you want lined up copybook or clean paper sheet. The tone and texture of the paper can also be adjusted. In addition to this, you can mix manuscripts and emoticons in your notes. Also a photo from your phone. What's more, you can organize your documents by dividing them into collections and categories of topics. In addition, the opportunity to share your notes in the messenger. To sum up, if you want to make original digital recordings on your phone, INKredible - Handwriting Note is a good choice to try. Check it out, you won't be disappointed! Back to the menu - The next app is very popular in this category. MyScript Nebo is an app that lets you create notes and turn manuscripts into digital text. Let's start by looking at the main purpose of this application. To begin with, this app has many options for organizing and customizing text. To be more precise, you can automatically divide the text into paragraphs, use headlines and different colors to mark the relevant information. As you download the app, there will be a tutorial on how to use it. Along with this, you'll also be able to use handwriting in text mode, which scans any paper text into the digital version of it. It must be said that this application has a very powerful identification feature that usually detects any text pretty well. However, if the app makes any mistakes, you can fix something yourself. In addition to this, the app can generate graphs and charts for you. All of these graphics will appear in the shape of an image, so you can also save it to the gallery if you need it. To sum up, if you want to quickly do paperwork, MyScript Nebo is a good option for you. Try it won't disappoint you! You can also over:11 of the best apps for sticky notes for Android and iOS back in the menu - It's a great note-taking app in all aspects. MetaMoji Note is a versatile laptop that you can use in a number of ways - you can save it as a business laptop or daily planner, or use it as a classic laptop and write things down there from time to time, or maybe you want to be an address book and so on. What's more, it brings a lot of opportunities for creative people - you can keep the MetaMoji Note as your diary, rather than just doing writing there putting a draw and inserting images right into the app. Here, you can capture your ideas at any time with quick voice recordings, advanced handwriting and handwriting recognition to convert text, or annotate Office and PDF documents. You can also use this app as a sketch, not just as an app that converts handwritten text into regular text. In MetaMoji Note, you'll discover a high-resolution album with an extensive wheel color palette, pastel colors and advanced calligraphy handles. In addition, the app has been awarded numerous prizes, for example, it won the Tabby Award for Best Personal Performance App - Silver Stevie® Award International Business - Appy Award Finalist for Performance - #1 Performance App in Japan, and this list is not yet complete. In other words, this app is created to quickly do all the manipulations with text without any extra hassle. The intuitive interface of the application will make it even more enjoyable. Back to the menu - Next app app OCR print pen. It's an app that can turn manuscript text into digital. Let's take a look at how you can use this app. Let's start with the fact that if your work is somehow related to paperwork, you need this application in your life. The app also has a quick mode that shuts down in seconds. In addition to this, the app will show you a tutorial on how to use it and will give you clues as you try new features. Basically, the main thing this app does is to scan and detect your paper notes and then turn it into a report on your phone. What's more, if you see that the app has made a mistake, you can fix it yourself. It must be said this app is very good at detecting words and putting them into sentences. Along with this, every document you make in the app will be collected in a cloud service so you can have easy access to it. Also, if you have a meeting program or calendar, you can use the app to turn it into a table that you can sync with the organizing app on your phone. To sum up, if you want a good app to refer to the manuscript to the text, Pen print OCR is a good app to try. Back to the menu - Handwriting notepad is another app that gives you the ability to take quick notes on the go. Frankly, this app is your digital memo pad that you can use to write where you want immediately. Another thing that makes this app very handy is that you can add a small button to our home screen and quickly click on it when you need a new note. What's more, there's auto-snatch mode, so even if you close the app in a hurry, you won't lose your records. Along with this, you can also add a few photos of your note if you have time for it. What's more, if you've saved a quick document and want to make it beautiful and manageable, you can make all the changes later. It also gives you the ability to use your phone more productive as you don't have to take the book with you anymore. In addition to this, this app has a powerful identification tool, so there will be huge spelling problems. In addition, you can also enlarge the page, and choose the tone of your writing tool. You can even make the background look like a lined book. What's more, you can organize your documents by dividing them into collections and thematic sections. To sum up, if you need a fast-running app to make quick but readable notes in a hurry, the Handwriting notepad app is good for you. You can also check out: 11 best speech apps for Android text and back on the menu - another cool app that can convert written text into regular digital. The app is only available for iOS. It really looks like the MetaMoji Note, however, it's a simpler option. If you don't want all that variety of features because they make the app heavy for phone space memory, then you can try this alternative app. Notes Plus is a gesture-based writing app for the iPhone and iPad that more than 50 languages and provides smooth handwriting capabilities, complete with ink effects, palm rejection, shape recognition, and close-up writing mode. It also includes a user-friendly interface design that all users will be able to handle. At the same time, Notes Plus also has many options, and just like in MetaMoji Note, here you can add images and drawings to your text - you can add handwritten or digital text. Combined with the MyScript engine, Notes Plus translates your doodle into text, accepts text typing, and exports notes as PDFs or images via email, Dropbox, Google Drive, and Evernote. It is noteworthy to mention the ability to make handwritten notes directly in the application that can be converted into text at the same time.
