Review: Flux White theme for Substratum is designed with pixel perfect precision and ui material to give your phone a whole new modern look! With high quality vector graphics and full features, you'll enjoy using your phone! There is also a version of Dark Flux available here: works with Android 7.0/7.1.2 with OMS support and all DPI sizes! It also works in a warehouse/legacy of rums as well, but some icons may not be themed. (Oxygenos and Samsung are not supported). Be sure to appreciate and share, if you like Flux, enjoy!👉 frequently asked questions /HELP - the battery icon may not be thematic in the qs panel. You can move it as a 7th badge so it doesn't show in the front row. Some drives don't have the latest patches of substrate and rom devs have to turn them on for the battery to show properly. If you use LineageOS to keep in mind, it does not support OMS so Flux will not work properly and you may encounter bugs/problems it is not possible to fix. Are some of your settings settings just blue circles or invisible? - This is because the drive you use does not include the latest patches for icons that will be themed. You can contact your rom dev to include the latest substrate patches. Having trouble with notifications that don't show up incorrectly? Reboot and disable the dynamic notification color in your settings if you have this option. Rebooting your phone after each update is highly recommended. Beta software is not supported, even if my theme can work with them. Is your phone stuck in a download cycle? - Go to your recovery and flash rescue lightning located in the Substratum folder.
