For other uses see Stormtrooper (disambiguation). StormtrooperStar Wars charactersAll-lookingStar Wars (1977) Created byGeorge LucasIn-Universe informationSpeciesHumanGenderMale and femaleSoldentsIngrealityGalactic EmpireFirst Order A stormtrooper is a fictional soldier star wars franchise created by George Lucas. Introduced in Star Wars (1977), stormtroopers are elite shock troops/space marines of the Galactic Empire under the leadership of Emperor Palpatine and his commanders, in particular Darth Vader and Grand Moff Tarkin, during the original film trilogy (1977-1983). The prequel trilogy (1999-2005) determines their origins as Galactic Republic clone troopers, clones bounty hunter Jango Fett, used by Supreme Chancellor Palpatine to win Clone Wars and to take over the government and destroy the Jedi. Nevertheless, later stormtroopers are set up as employees; At the time of the original trilogy, only a few stormtroopers have clones, with the only known legion still being a significant number of clones in the 501st Legion, aka Vader's fist. In the trilogy (2015-2019), the improved stormtroopers serve first in order under the leadership of supreme leader Snoke and his commanders, in particular Kylo Ren, General Hux and Captain Phasma. The final film trilogy, Rise of the Skywalker (2019), introduces Sith Troopers, an upgraded version of the First Order's stormtroopers that sport red armor and serve in the Final Order, led by the resurrected emperor Palpene. The order of the battle of the Stormtrooper Corps is an unspecified Star Wars universe. Accompanying the Imperial Navy, stormtroopers can be deployed quickly and respond to states, civil unrest or riots, acting as a planetary garrison, and police areas of the Galactic Empire. They are displayed in collective groups with different organizational dimensions, from teams to legions, and for some, their armor and training have been transformed into special operations and environments. The development of Stormtroopers designs was designed to look terrifying, but also supercool, super clean, with helmets in highly stylized skulls. [1] At the beginning of projects in Star Wars and Ralph McQuarrie concept designs, stormtroopers had wield lightsabers and hand shields as common weapons not just jedi or sith. George Lucas, forming basic information in 1977, stated that women existed in the Stormtrooper Corps, although there were few deployed to the Death Star. He suggested that there are many other units. [2] [3] Performers While stormtrooper performers such as Michael Leader (Episode IV), [4] Laurie Goode (Episode IV), [4] Peter Diamond (Episode IV-V), Stephen Bayley (Episode IV), and Bill Weston (Episode IV) are usually uncredited film series, [quote required] there have been some exceptions. In Attack of the Clones (2002) and Revenge of the Sith (2005), clone troopers, serving as the basis for what could become an empire stormtrooper force, had computer-generated images and voiced Temuera Morrison, who played the motto hunter Jango Fett, a template for the clone army. [5] The troopers of the children's clones were played by Daniel Logan, who also played The Son of Yangon, Bob Fett, and the clones troopers when the young men played Boddy Taylor, who was cast for his resurgence with a younger Morrison. In Revenge of the Sith, Morrison also played Commander Cody, the only named clone trooper who is seen unmasked in the prequel trilogy. In The Force Awakens (2015), John Boyega stars as Finn, a former Stormtrooper FN-2187, who defects from the First Original and Gwendoline Christie portrays Captain Phasma, commander of the First Order of stormtroopers. Daniel Craig has a small, uncredited storm storm, which Ray tells to use the Jedi's trick of mind to allow her to escape captivity.[8] [9] and director J. J. Abrams also cast Alias and Lost composer Michael Giacchino as FN-3181, and radio producer Nigel Godrich as FN-9330. [8] The riot control stormtrooper who calls Finn a traitor during the battle for Takodana, portrayed by stunt performer Liang Yang and voice sds editor David Acord, has been identified as the FN-2199 aology book Star Wars: Before Awakening (2015) by Greg Rucka. [10] [11] The trooper, armed with the Z6 baton and dubbed the TR-8R by fans, quickly inspired several memes and fan art. [10] [12] Actor/director Kevin Smith also took a stormtrooper in the Takodana sequence. [14] In Star Wars Rebels, various voice actors have delivered the voices of stormtroopers, including David Acord, Dee Bradley Baker, Steven Blum, Clancy Brown, Robin Atkin Downes, Greg Ellis, Dave Fennoy, Dave Filoni, Tom Kane, Andrew Kishino, Phil LaMarr, Liam O'Brien, Freddie Prinze, Jr., André Soré Sogliuzzo, Stephen Stanton, Greg Weisman, Anthony Williams, Matthew Wood. [15] In Ralph Breaks online, stormtroopers on the Oh My Disney website have been voiced by Jesse Averna, Kevin Deters, Jeremy Milton, and Rich Moore. [16] Jason Sudeikis and Adam Pally play scout troopers in Chapter 8: Atonement, the 2019 pre-season almondium finale. [17] Against the backdrop of the Skywalker saga introduced in Star Wars (1977), Imperial stormtroopers serve as an army of the Galactic Empire, establishing imperial authority and put down all the rebellion. In the prequel film Star Wars: Episode II - Attack of the Clones (2002), the first clone troopers are cloned from bounty hunter Jango Fett, who is an army of Republics clone wars. [5] IN Episode III: Revenge of the Sith (2005), Chancellor Palpatine commands them to kill their Jedi generals in the Great Jedi Purge. After the change in regimes from the Galactic Republic to the Galactic Empire screed troopers who served the Republic became first generation stormtroopers, pursuing the imperial will as military units, and law enforcement, the police of the emperor's increasingly oppressive laws. [19] The Imperial Stormtrooper Corps swelled after Palpatine completely replaced the clones of recruiters and conscripted empires [quote required], although replacing clones with natural beings lowered the effectiveness of imperial soldiers. With the Empire firmly stabilized and the Imperial Army and Navy established, stormtroopers have integrated Palpatine's personal army and deployed Imperial bases and cruisers as well as a death star. As stated in The Force Awakens (2015), by Palpatine stormtroopers continue to serve under the factions that broke apart from the empire. With redesigned armor, they eventually serve under the guidance of the First or Extractor. [20] In the first order, an undisclosed number of storm troopers are kidnapped as young children, taking into account the serial numbers of words and spiritually conditioned loyal service. [21] Stormtrooper FN-2187, later known as Finn, plans his escape when his resistance to this conditioning puts him under reprogram. [21] In addition, Ray's goggles were based on scavenged stormtrooper lenses. [22] Another appearance in the Streaming series Mandalorian, which is set after the fall of the Empire, depicts stormtroopers as freelance mercenaries in the service of Moff Gideon, a former officer of the Imperial Security Bureau. [23] Star Wars Legends media, such as games and comics, has several specialized stormtrooper units. Marvel produced comics of the late 1970s and early 1980s featured Shadow Troopers. Other specialists have included commandos and troopers equipped to work in vacuum space, such as zero-gravity Spacetroopers depicted engaging in an additional vehicle battle in the 1991 novel Star Wars: Heir to the Empire, and its 1995 Dark Horse Comics adaptation. A different option known as Shadowtroopers appears in Star Wars Jedi Knight II: Jedi Outcast, wearing black armor that includes a lightsaber-resistant mineral called cortosis. As a project of the Dark Jedi named Desann aligned with the remnants of the empire, shadowtroopers themselves were immersed in the force nexus of Ruusan, temporarily empowering them with force sensitivity. This armor is a green synthetic gem that enters into a breasteplate that lasts an otherwise temporary effect in their Force option and combines with their abilities to make them almost invisible, with only a weak area of blue color change giving them away. Along with their Force attaches telekinesis, reflexes, and dexterity, Shadowtroopers are armed and trained to use mass-produced red lightsabers. Their combination of abilities allows them to lie to wait and trap an enemy that represents outrageous opponents of even trained Jedi, the most common match for Jedi hero, Kyle Katarn. Shadow stormtroopers appear in Star Wars: The Force Unleashed and wear exactly the same type of Phase III armor [clarification required] as normal stormtroopers but not white, but rather a mixture of silver, grey and red detailing. These troopers also possess an invisible function and use these tactics to trap their enemies, but only if stormtrooper officers call for support. In Lego Star Wars II: Original Trilogy, Speedo-clad and stormtrooper-helmet wearing Beach Troopers appear relaxing at the beach. In Lego Star Wars: The Complete Saga, they also wear life jackets. Description Under Star Wars Imperial stormtroopers are human men and women who have been recruited (or conscripted) at a young age to serve as disposable foot soldiers in the Empire, gradually replacing clone troopers as their accelerated aging forces them to retire. These staff are trained at the Imperial Academy to spread throughout the galaxy, where they undergo intense conditioning that instills fierce loyalty, strict discipline and ruthless efficiency while eliminating any sense of individualism or empathy. As the backbone of the imperial army, stormtroopers are afraid of their brutality by committing atrocities on the behalf of Emperor Palpatine, and their bigotry, engaging the enemy without taking into account the victims. Inevitably, some are using their position to make individuals get against civilians too terrified to resist. [24] [25] However, inconsistencies in the academy's standards led to a storm of different fighting skills and abilities. [26] After all the remaining separatist holdouts remain over from the Clone Wars, stormtroopers mostly serve as an internal security and peacekeeping force until the galactic civil war, where they begin to engage rebel alliances in large-scale battles. [24] [25] Unable to call in millions of soldiers to fill the ranks of their stormtrooper, however, unwilling to move back to using fast-produced clone troopers, First Order stormtroopers are bred, trained and indoctrinated from birth, raised their entire lives without any other purpose. First-instance soldiers and crews are constantly trained to fight war games and simulations, making them much more effective one-on-one than the endless waves of stormtrooper conscripts fielded by the Galactic Empire. First Order stormtroopers are regularly put through spiritual roots and propaganda programs to make sure they remain fanatically loyal and never hesitate or question orders. Being taken from their families at birth, these soldiers are not even given separate names for themselves, but only serial numbers such as the FN-2187. [27] Equipment standard imperial stormtrooper armor was white and had a utility belt and helmet. Vehicles Main Products: List of Star Wars air, water and land vehicles; List of Star Wars spacecraft; and list of Star Wars starfighters weapons main article: List of Star Wars weapons standard firearm Imperial stormtroopers is a BlasTech E-11 Blaster rifle, described in Star Wars sources, combining excellent range and firepower in a compact and rugged design. Features include telescopic range detection vision, accessory mounting rail, power control adjuster, three-point folding stock, magnatomic adhesive gun handle and advanced cooling system. Plasma cartridges provide enough gas for 500 shots, although the standard power cells that energies gas to produce Blaster bolts will last about 100 shots. [25] Papildus E-11, stormtroopers stormtroopers various weapons, as seen in Star Wars movies and other media. Examples include heat detonators, sniper rifles, crews serving heavy repeating blasters, and mortars. [25] [28] [29] Both firing and non-firing prop models on the E-11 were based on the Mk 4 Sterling submachine gun, with about 20 models built for the first Star Wars movie New Hope. The external modifications of sterlings transform them into blaster rifles differently based on parts available, but most were similar in design. This included the American Mk38 azimuth tank scope and the Hengstler industrial counter box attached to the upper and left side of the receiver respectively. Sterling will continue to serve as a base or inspire other blaster rifle designs in the rest of the Star Wars movies. [30] The basic literature explains how the first horde of storm-torn secretly armed subsidiaries of Sonn-Blas Corporation, BlasTech Industries and Merr-Sonn Munitions, set up to bypass the New Republic's disarmament treaties. Based on classic design templates, they are meant to possess greater combat accuracy, ammunition yield and operational life span. Examples include the F-11D Blaster rifle, the SE-44C Blaster pistol, and the FVMB-10 repeating blaster gun. For the weak civilians. First Order stormtroopers will also carry ballistic riot shields and riot control steppes. [26] [31] Armor Stormtrooper cosplay at Romics 2013, Italy As stated in the original Star Wars trilogy film, troopers' most distinctive equipment is their white combat armor, which fully embodies the body and is usually not individually distinguished by markings. According to the in-universe reference material, this armor was designed and manufactured by the Imperial Department of Military Research, and consists of 18 white plastic armor plates magnatomically attached to a black body glove. These plates are usually impermeable to most projectile weapons and blast shrapnel, and will protect against glancing hits on other blaster rifles with direct hit will penetrate. The armor also provides protection against a nested environment, including vacuum space for a short period of time. Their helmets are equipped with filtering systems for contaminated environments, with hoohooks that include an external atmospheric tank when working in space or filtering strong toxins. Helmets also include a built-in communication system and a multi-frequency targeting and acquisition system associated with in-lens displays that provide tactical information, protection from excessive brightness and visual modes to see using smoke, fire and darkness. [25] [28] Based on conceptual ralph McQuarrie, Liz Moore and Nick Pemberton mocking the design of a helmet, Brian Muir sculpted armor pieces in a stormtrooper costume. Muir, who was also the sculpting Darth Vader costume, worked from the Arts Department at Elstree Studios. The suit was molded and initially cast in plaster, with Muir sharpening the detail of the plaster stage. The plaster castings were then remolded and cast fiberglass used as tools for the vacuum-forming process. The suits were manufactured in the house of Tashy Baines, a resident of the vacuum former, but then the problem developed with the machine. As Shepperton Design Studios were already used to vacuum form helmets, fiberglass molds on armor were then shipped to them in vacuum form suits. By the end of production, two different helmets were produced; one common trick trooper and the second design close-ups. Fifty stunt helmets were produced in white painted HDPE and six hero helmets were manufactured in white ABS plastic. 10 000 000 000 000 000 000 000 000 000 000 000

000 000 000 000 000 000 [quote required] Copyright status armor design has been subject to legal problems. [32] Lucasfilm's 2004 lawsuit against one of the original support designers, Andrew Ainsworth, who sold copies of the helmet, confirmed that the design was a copyright infringement in the United States. [32] However, the 2011 UK Court of Justice's decision in favour of Ainsworth considered the costume to be an industrial design protected there for only 15 years. [32] This puts the design of armour in the public domain in the United Kingdom, and possibly throughout the European Union. [32] To distinguish first-instance stormtroopers from their former imperial counterparts, helmet and armor were transformed into the 2015 film Star Wars: The Force Awakens costume designer Michael Kaplan with the contribution of director J. J. Abrams. [33] Within Star Wars, in which, this armor is described as an improvement over previous iterations, including better shared design, greater flexibility, stronger betaplast armor cladding, and upgraded helmet communication and targeting systems. [25] [28] 501st Legion Details: Clone trooper § 501st Legion 501st Legion Elite Stormtrooper Unit, or Vader's Fist, is a stormtrooper unit from star wars movies and Star Wars Legends continuity. Commanded by the ruthlessly cunning General Maximilian Veers and made up of the best trained soldiers in the Star Wars galaxy, the Legion earned a fierce reputation for completing missions considered winnable or suicidal. 501. serves as a squadron of Darth Vader's personal death, which he directs for the Destruction of the Jedi. 501. Spearhead attack tantive IV consular ship, and capture Princess Leia. During the Battle of Hoth, 501 is instrumental in destroying the rebel alliance's base, and is almost a success in the Millennium Falcone. Most of the background story related to the 501st comes from star wars novels, games star wars: II and Star Wars The Force Unleashed. [34] and the TV show Star Wars: Clone Wars. [quote required] The elite 501 is resurrected by Grand Admiral Thrawn, who in the Thrawn trilogy is accused of defending the Hand of Empire's imperial remnants of force. Thrawn's 501st consists of aliens, humans and Jango Fett clones. The legion name is based on a fan organization of the same name; their inclusion in the official continuity was based on the world organization's dedication to Star Wars fandom. [35] Specialists in the Star Wars franchise have seen several types of stormtrooper units from a military occupation specialist. These include: Imperial variants of Sandtroopers first seen on the desert world of Tatooine during Star Wars (1977). They are trained to serve in an unholy environment and their armor is equipped with cooling units, anti-glare lenses, additional dosess and water supplies. Sandtroopers can be distinguished by their colored pauldrons, which indicate rank: black soldiers, white sergeants, and orange unit leaders. [36] [37] Sandtroopers that ride Dewbacks are known as Rasback riders. Snowtroopers, also known as cold weather attack stormtroopers, were first seen during the Battle of the Hoth Empire Strikes Back (1980). Their armor is insulated against cold weather and modified with polarized snow goggles, a heated breath mask, insulated belt cloak and ice boots. Battery packs can keep your system running for up to two weeks, while additional cold weather tools are carried, including grang hooks, ion flares and homing beacons. [36] [38] Scout Troopers first seen in endor return of the Jedi (1983). They are trained in advanced intelligence and with an unusual degree of independence so they can serve as scouts and snipers far from Imperial support. Their armor is lighter than standard stormtrooper suits, with protection only covering the upper body and head, but their helmets incorporate a boosted communication system and an improved macrobinocular viewplate will spot targets the remote. On Endor, scout troopers piloted swift 74-Z speeder bikes to patrol the area around the Death Star II shield generator. [36] [39] Shock troopers are clone Shock Troopers, the red armed clone trooper who first appeared in Siitha's revenge (2005). They patrol government facilities and serve as bodyguards for Emperor Palpatine and those closest to him. [40] Death Troopers are imperial intelligence elite soldiers who made their first appearance in Rogue One: A Star Wars Story (2016). Undergoing rigorous training and receiving top-secret expansion that increases their performance beyond human limits, death troopers are assigned to defend VIPs such as Director Krennic and Grand Admiral Thrawn and participate in other operations critical of the empire. Their classified armor biofeedback implants in their structures and can stimulate sensory organs to increase performance, features targeting systems far superior to standard stormtrooper versions, and is sprayed with polymers called reflex that warp electromagnetic waves to defeat enemy sensors. The origin of the universe in their name is that it was specially chosen by Emperor Palpatine to play on rumors of an Imperial project to revive dead tissue. [36] [41] [42] The Star Wars novel Death Troopers, part of the continuity of non-canon Legends, revolves around an outbreak of zombie viruses aboard the Imperial Star Destroyer. Shoretroopers, also known as coastal defender stormtroopers, are introduced to Rogue One, where they are seen patrolling beaches and bunkers in Scarif. They are described as uncommon stormtrooper specialists trained to fight in coastal environments in tropical worlds. Their armor is flexible and lightweight, designed to withstand corrosive aquatic environments and ward off excess moisture, and can be changed to operate under water. Shoretroopers usually sergeant rank or higher and command squads of other stormtroopers during cases of seaside combat. [36] [43] [44] Combat assault tank pilots and commanders, also known as tank troopers, operate in the empire's arsenal of armored repulsorlift vehicles, from the transportation of troops to the heavily armored hover tanks. Battle drivers are easily armored, relying instead on the thick skin of their vehicles to protect them in battle. The commander shall maintain contact with his crew and headquarters to keep up-to-date information on changing combat conditions. [45] This type of trooper was introduced in the 2016 Han Solo comic book series and debuted in The Dishonest One. Patrol troopers are execution base stormtroopers, usually located in large cities with special strategic importance when they take the place of local security forces. City colleague scout troopers, they drive speeder bikes much like them. Patrol troopers first seen Solo: A Star Wars Story (2018), where one such trooper briefly performed Han Solo and Qi'ra on Corellia. [46] Swamp Troopers, also known informally as mudtroopers, are Imperial soldiers assigned to fight in swamp, war-torn worlds, often as a form of punishment. They wear gas masks and goggles, as well as camouflaged armor and capes. They are not considered official stormtroopers. Swamp troopers were first seen on the planet Mimban Solo, with Han Solo having one such trooper during his service to the Empire. [46] Wet-weather gear stormtroopers, also known as Mimban stormtroopers (those stationed in Mimban), are trained to serve in a swampy environment. Their armor is that standard stormtrooper, but heavily tailored to allow optimal operation in the areas where they are sent. They can be distinguished by their grey, muddy armor and Capes. This type of stormtroopers is depicted solo. Range Troopers first seen Vandor Solo. Considered one of the toughest branches of the Imperial Army, this type of troopers are selected from the ranks of the most qualified Imperial soldiers and are usually assigned to protect valuable cargo, but can sometimes be lasso deployed to combat zones. The Range Trooper is equipped with snowtrooper-like armor, including fur lined cameas for protection against the cold environment, and magnetic boots. [47] Jumptroopers, also known as rocket troopers, are equipped with jetpacks. They are trained to act in unison, often swarming and overwhelming their goals. [48] There are several variants of jumptroopers, such as the Arctic Jumptrooper, deployed in cold environments, desert jumptrooper, deployed in neaculite environments, and Forest Jumptrooper, deployed in forested areas. Jumptroopers are featured in various Star Wars media, both legends and canon, with different designs. Dark troopers have made various appearances in Star Wars Legends material, often with different designs. They are usually depicted as dark armored cybernetically enhanced humans, or in some variations of droids, and are used in small amounts of empire. Dark troopers were restored to the current Star Wars canon through the mobile game Star Wars: Commander (2015), and made their live-action debut in the second season of Mandalorian (2020). Shadow Troopers, also known as black holo troopers, are elite special-ops troopers featured mostly in Star Wars Legends material. Granted to the Empire's mysterious Shadow Guard, one of their most prominent appearances is the video game Star Wars: The Force Unleashed, where they have shiny, reflective black armor that allows them to become invisible. Shadow Troopers returned to the Star Wars Battlefront, which reinvents them in the Star Wars canon. Lava Troopers are elite class stormtroopers stationed at Fortress Vader on Mustafar. They are equipped with heat-resistant black armor. Lava Troopers are featured in the comic book series Tales of The Vader's Castle. Forest troopers are trained to serve in forest environments. They differ with their camouflaged armor. Forest troopers are featured in the novel Aftermath (Life Debt). Seatroopers specialize in underwater operations. They are equipped with breathing tubes attached to a scuba backpack and underwater propulsion nozzles. Seatroopers was originally introduced in the Star Wars Legends Marvel Comics Star Wars comic book series, before later re-introduced the current Star Wars canon. Spacetroopers are stormtroopers trained to operate in zero-g environments. They resemble standard stormtroopers, but are equipped with a rebreather pack to survive the harsh conditions in the room. Two spacetroopers can be seen outside Death Star Wars (1977). They since then, speaking in some other Star Wars media. In Star Wars Legends material, various variations of spacetroopers with a bulkier look, called Zero-G Attack stormtroopers, are featured. Flametroopers specialize in the use of flamethrowers. They have appeared in various Star Wars media, with different designs. Incinerating troopers are equipped with flamethrowers and heat-resistant armor. They are highlighted by their red pauldrons and red signs on their armor. They are probably an improved variant of flametroopers. The combustion stacker is seen in season one finale of Mandalorian (2019). Mortar Stormtroopers are equipped with mortar and heavy armor. They differ with their yellow pauldrons and yellow markings on their armor, similar to the markings of Incinerating Troopers. In 2019, mortar Stormtrooper is shown in Chapter 14 of Alder (2019). Special Commando Advanced Recon Troopers, or SCAR Troopers, are elite class stormtroopers in the Imperial Special Forces Division. Most of these stormtroopers are unique in terms of armor design, equipment, and specialization, and are deployed in small groups within the empire to complete tasks that require their talents. One notable SCAR trooper team, working group 99, featured in the 2016 Star Wars comic book series. Storm Commandos, also known as shadow scouts, are elite stormtroopers, trained to perform tasks that a regular trooper is unable to accomplish. They operate in small groups and are equipped with silver scout trooper Armor to make them a less visible enemy. Storm commandos are featured in various Star Wars Legends material, and were restored to the current Star Wars canon through the mobile game Star Wars: Galactic Defense. Heavy Troopers are elite class stormtroopers who specialize in melee combat. They are equipped with electricis and special combat armor. Heavy Troopers have featured in Star Wars: The Force Unleashed, and were reused in the current Star Wars canon through Star Wars: Galactic Defense. Riot control stormtroopers specialize in melee combat. They are equipped with batons and sometimes a shield. Most rebel control stormtroopers are used as a security group tasked with dispersing and arresting insurgents participating in disruptive activities. Various variations appear in Legends game Star Wars: The Force Unleashed II, where they are equipped with electrostaffs and sport unique armor instead of standard stormtrooper armor. Rocket stormtroopers are stormtroopers equipped with rocket launchers. They usually have the task of destroying armored vehicles or buildings. Rocket stormtroopers have appeared in several Star Wars games. Demolition troopers are stormtroopers who specialize in the use of explosive weapons such as smart missiles. These are visible video games Wars: Battlefront (2015) and Star Wars: Battlefront II (2017). Heavy weapons Stormtroopers, also known as heavy attack stormtroopers, heavy troopers, or heavy machine guns, are stormtroopers who specialize in the use of large rapid fire blasters. Heavy troopers have appeared in various Star Wars media, with different designs. Stormtrooper snipers are equipped with snipers. They can be distinguished by their own visor and blue pauldron. The variant of the stormtrooper sniper, known as the Imperial sharpshooters, appears in Star Wars: Commander; This type of sharpshooters are drawn from the ranks of elite scout troopers and equipped with E-11s sniper rifles and gray variant scout trooper armor. Magma Troopers are stormtroopers using empires to crush rebellions on volcanic mining worlds such as Sullust and Mustafar. They are equipped with heat-resistant armor and a respirator connected to the backpack through the tube to protect them from volcanic ash and gases. They can be distinguished by their black pauldrons (colored officers) and extra armor on their feet. Magma troopers first appeared in Star Wars: Battlefront (2015). Variants of the first order Flametroopers are observed for the first time during the attack on the village of Tuanul in Jakku force awakens (2015). Often stationed alongside standard First Instance infantry, these specialized units flush out entrenched enemies with roaring sheets of flame from flamethrowers. They wear backpack-style propellant tanks, special helmets with slit-like lenses that reduce glare, and temperature control body gloves underneath their armor. [49] Megablaster heavy attack troopers, more commonly known as heavy troopers, have been introduced to Force Awakens. They carry a large FVMB-10 repeating blasters and internet gear loaded with extra ammunition. Riot Control Troopers were first seen during the Battle of Takodana in The Force Awakens. Although they resemble standard First Order stormtroopers, these specialized units excel riot control and are equipped with the farthest betaplast shields and Z6 batons. [10] [11] [50] Snowtroopers first seen in Starkiller base force awakens. They wear specialized armor and tools that allow them to operate effectively in icy conditions. Snowtroopers carry a backpack-style personal environment unit and wear insulated helmets with glare reduction slit lenses, gloves, kama, and a heat-resistant body glove underneath an oversuit wind-resistant fabric. Snowtrooper teams scouted the planet that once housed Starkiller Base, removing native life forms that pose a potential threat. [51] Stormtrooper Executioner, introduced in The Last Jedi (2017), is a branch of a military police specialist specifically founded to release the ultimate justice against stormtroopers who have been found guilty of treason. They are equipped with BL-155 laser axes used for execution and are distinguished by black markings on Armor. [52] Jet Troopers first seen in Pasaana rise skywalker (2019). They are equipped with near rocket packages that they use to soar to battle. [53] Jet troopers specialize in air and space operations. The proteksapeedera drivers are visible in Pasaana, which rise skywalker. Reminiscent of Imperial Scout troopers, they are equipped with lighter armor and specialize in riding speeder bikes; in this case, the 125-Z tread sucker from which they use their name. [54] Electropod troopers are featured in The Rise of Skywalker. They are equipped with electrical personnel called electricis, but are otherwise identical to standard First Order stormtroopers. Ryder, depicted in Star Wars Resistance, is an elite variant of first-card stormtroopers who specialize in hunting, especially relic hunting. They were mainly used by Supreme Leader Kylo Ren in search of relics of Sith. [55] SCUBA troopers, depicted in Star Wars Resistance, specialize in underwater operations. They are equipped with underwater blasters, flippers, and breathing apparatus. [56] Tech stormtroopers, depicted in Star Wars Resistance, specialize in mining, decryption, and analyzing data from droid memory cores or other sources. [57] Final Order variants of Sith Troopers are introduced to rise skywalker. Loyal only to Sith Eternal, resurrected by Emperor Palpatine's secret Sith cult, these elite stormtroopers make up the majority of the Final Order military. As the next development of stormtroopers, Sith Troopers were raised by Sith Eternal for Exego's perfect soldiers, and equipped with highly impact-resistant armor and better equipment than first instance stormtroopers. They differ with their bright red armor, which feature a slightly more textured pattern, although the overall design resembles past clone troopers. [1] Sith Troopers draw their strength and inspiration from the ancient Sith Or was, with their armor color meant to resemble Sith's red light and strike fear in the hearts of their enemies. Sith Trooper officers are trained to command squads of Sith Troopers. Their armor is equipped with advanced sensor technology. Sith Jet Troopers are equipped with jet packages. They closely resemble First Order jet troopers, but are equipped with red armor like standard Sith Troopers. Sovereign Protectors serves as the resurrected Emperor Palpatine's elite bodyguards for Exegol. Equipped with red armor and full-body capes, they resemble the old Imperial Royal Guard, but carry two-pronged blaster rifles instead of force pike. Within Star Wars Legends material, Sovereign Guards is the most elite variant of the Imperial Guards. Cultural Influences also see: The cultural influence of Star Wars Stormtroopers has become a cultural icon, and a widely recognized element in the Star Wars franchise. [58] In The Imperial stormtrooper helmet from Empire Strikes Back, which was supposed to sell at auction for \$92,000 [59] sold for \$120,000. [60] In 2019, a team of biologists named a new Colombian spider genus Stormtropis after the storm storm, showing spiders like fictional soldiers, are very similar to each other, with some ability to mask but with unskilled movements.
