Paid more than advertised and have a top 5 percent loan. It was said to take 30 minutes, both pre-fertilized, etc. and out of business for lunch; took more than 5 hours and made it such a kid home alone etc, it was a terrible experience. I should have left. But he didn't. Never will do it again!

Pros: The seller was awesome. Their denials, etc. are terrible! I thought I did everything to get there! So I wasn't a bit please with all the upwelling rubbish. I just went to sign the papers. Cons: All upwelling, guilt-free outages, pushed purchases and inflated pricing. Never bought here for a reason and because of the emergency made and cost a lot more financial and emotional. The Chevrolet Traverse line has been well received since its first introduction, although it has since undergone several notable redesigns. Two years after the last renovation, the 2020 Chevrolet Traverse has seen various tricks and changes, many of which should attract a special amount of interest from many SUV enthusiasts. Like many of the previous generations of the vehicle, there are quite a few finishes to take advantage of. While the choice should mean that drivers will find a model that suits them, the number of options can be a bit overwhelming for many potential buyers. This may be because there are quite a few features available as standard with each trim level, meaning that there are a number of differences to know about. Perhaps the most notable of these is that the 2020 edition sees the removal of an additional engine upgrade, a four-cylinder turbocharged version that was previously available with an RS finish. As a result, each of the 2020 Chevrolet Traverse finishes use a V-6 3.6-liter engine. While it offers an impressive 310 horsepower and plenty of torque, the lack of additional engine upgrades can leave many buyers somewhat underwhelmed. Despite this, there are a number of differences Each of the finishes that should help influence the choice of the person which one to buy. Compare the 2020 Chevrolet Traverse L Vs LS Trim Levels. What's the odds? Given that the 2020 Chevrolet Traverse L is the base trim SUV, it is naturally the most affordable among each of the options. This does not mean that the brand has not delivered a significant number of features in the car. Instead, there are quite a few notable ones to take advantage of. One of the most notable of these is the lumbar support system in the driver's seat, which makes it quite convenient for driving long distances. Along with this are several other features focused on maximizing the amount of comfort that is available with trim. The first is a two-zone climate control system for the front of the vehicle, while there is a separate setup for the rear of the SUV. One of the last notable features that focus on comfort and maximizing space is the third series of the 2020 Chevrolet Traverse L class, which includes a 60/40 split for large families to take advantage of. Along with this is a fabric that is used for each of the places. Although it is not the most comfortable fabric for a high-quality SUV, it may not be the most attractive feature. However, there are a few other features that drivers will be able to take advantage of. Many are focused on the infotainment system that comes as standard with the vehicle. The largest of these are the front-row monitors on; While many SUVs include one with their base model, there are two available here. Alongside this is a seek-scan radio that includes both FM and AM stations. The 2020 Chevrolet Traverse L trim also consists of a keyboard system on all doors, allowing remote access and input, which can be a very noticeable advantage. Abs and drive traction control system helps round up many of the features that are included as standard with this trim level. For those who want to take advantage of them, heated mirrors are also included, though how profitable it may depend on personal preference. While many potential buyers expect that the 2020 Chevrolet Traverse LS trim will include a number of additional benefits, there are quite a few. Perhaps the only noticeable difference between the two trim levels is that the LS has the choice of either FWD or AWD, while the base model has only the FWD capability. Compare the 2020 Chevrolet Traverse LS Vs 1LT trim. What's the odds? With the disappointment that many drivers may have in the differences between the 2020 Chevrolet Traverse L and LS, one would expect that there are a large number of them with the next trim upgrade, 1LT. While there are a few notable There aren't as many as some people will believe, despite another big price increase. Despite this, there are several significant differences, differences, people might want to take advantage. One of the biggest ones is the upgrade of the entertainment system, with seek-scan radio now having access to SiriusXM and satellite radio on top of the AM/FM, which was available with each of the other lower end finishes. Alongside this is the addition of fog driving headlights that slightly alter the look of the front of the vehicle. There are also a few minor look settings for the 2020 Chevrolet Traverse with 1LT trim, although it's not as noticeable as many people might expect. In addition, there is no other big difference between the two trim levels. Compare the 2020 Chevrolet Traverse 1LT Vs 3LT Trim Levels. What's the odds? After a few minor differences between previous trim levels, potential buyers will notice a large number of additions from the 2020 Chevrolet Traverse 3LT. Compared to the jump in features available as standard in previous finishes, there's a lot more note on offer here. As a result, this may be one of the most recommended options, especially given that there is no such large price difference between these and the lower models. While there are a few tweaks and changes to the exterior of the SUV, most of the differences that people will see are focused on the interior of the 3LT. They primarily focus on increasing the amount of comfort that is on offer, there are also a few notable tweaks to vehicle performance and safety features that many people may want to use. Perhaps the biggest of these is the inclusion of a parking assistance system that is focused on the back of the SUV. Given how big the 2020 Chevrolet Traverse 3LT is, this can be quite useful for most drivers. Other than that, however, there are no other additional additions to boast of when it comes to improving functionality. Even so, there is plenty of extra comfort on offer with 3LT trim, which is primarily due to several new systems included as a standard. The first is the heating system for the front passenger and driver seat, with this taking a heated seat and heated pillow function. They should ensure that the front row is quite comfortable during the trip. Along with this, both of these places have lumbar support, which should prevent any discomfort, such as back pain, when moving for a considerable amount of time. One of the only notable changes between the 2020 Chevrolet Traverse LS and 3LT trim is that the higher-end model has leather seats as standard. It adds quite a lot of style with the upgrade, and helps promote a certain sense of luxury. Despite this, there is a relatively other changes in appearance and interior design that can be relatively disappointing for many potential buyers. Compare the 2020 Chevrolet Chevrolet 3LT Vs RS Pruning. What's the odds? The 2020 Chevrolet Traverse RS may be one of the most disappointing finishes available this year, with much of this driven by the removal of additional engine upgrades. As a result, quite a large number of people can be somewhat left off by the decision. However, there are several reasons why drivers might want to consider it. One of the most notable of these is the addition of an onboard navigation system, which none of the previous finishes was available. As a result, quite a large number of people should be able to take advantage of a significant number of systems that come along with this. While this won't be the most attention-grabbing feature, it's something that can come in pretty handy. Alongside this, several modifications of the exterior of the 2020 Chevrolet Traverse, with the RS trim looks a little more elegant than many of the previous finishes. While much of this will be determined by the minor tweaks that can be seen, there are a few great adjustments that many drivers should notice right away. Perhaps the most notable of these is the changing wheel, with the RS having a 20-inch wheel compared to the lower version of the 18-inch. While each trim level has aluminum wheels as standard, the RS is the first to have them painted, which could help enhance the stylistic appeal of the option. Outside of this style update, there are relatively few significant differences between this and the 3LT option. Compare the 2020 Chevrolet Traverse RS Vs Premier Trim Levels. What's the odds? With relatively few changes that have had between most 2020 Chevrolet Traverse trim levels, potential buyers shouldn't be surprised that there are relatively few upgrades seen here either. This is primarily because there are almost no changes between the RS and the prime, other than further tweaks and improvements to the LOOK of the SUV. However, many people won't guess this from the price increase that is associated with the finish. As a result, quite a large number of drivers may find that there are not many reasons to consider an update. Even so, there are a few minor tweaks and adjustments that can be seen. Perhaps the biggest of these is the fact that the wheels have been changed once again. Although they are still 20 inches and made of aluminum, they are now shoeed, and feature painted accents. While this is not a significant change, it helps to add to the 2020 Chevrolet Traverse Prime sports feel, especially when combined with other design changes that are offered. Compare the 2020 Chevrolet Traverse Premier Vs High Country Trims. What's the odds? Given that High Country is the highest-end finish available for the 2020 Chevrolet it is, of course, the most expensive. However, this may not mean that it provides as much value for money as both most buyers might expect. As many would expect based on each of the previous finishes, there are relatively few major updates for the SUV beyond external differences. While it may be more visually appealing from the available finishes, it may not justify the big price increases that comes with it. This is primarily due to the fact that the only big difference in the exterior of the SUV comes with wheels, although it may not be as significant as some suggest. The most noticeable reason for this is that the wheels remain the same size as the previous finishes, and are made of aluminum, although they are polished rather than painted. This can be considered as either an update or a downgrade, depending on the buyer's preferences. Along with this, the 2020 Chevrolet Traverse High Country sees just another noticeable change in overall design. This will be primarily seen with the inclusion of a hatch that has several prominent controls. Some of the most significant ones include tilting glass and expressing open/close functionality. Like each of the relatively few other changes that are visible, this may not be too much of an attraction for many buyers. However, it can be a kind of attraction if they are looking for a well thought out SUV that is out of the styles of many others in the class. Purchase Tip: To avoid overpayment on a new car, shop prices online first. Get front pricing before you walk into the dealership. We recommend the following free services; Car deals, CarsDirect and MotorTrend. These free services will offer you the lowest prices and supply you with several competing price quotes. You will know the best price before you visit the dealer. Which finish to choose? Given that there are relatively few differences between each of the 2020 Chevrolet Traverse's finishes, many potential buyers may believe that the base model will be most cost effective. There's a lot of truth to this, primarily because each of the higher-end finishes doesn't have a lot of extra features outside of the upgrade style. However, a 3LT finish can be just as well recommended as an option. This is primarily because it offers a fairly delicate balance between style and functionality, as well as providing a certain amount of value for money. As a result, this may be a recommended choice for buyers who are looking for a more luxurious finish but don't want to splurge on a high country option. Even so, the decision on which 2020 Chevrolet Traverse trim to choose can depend significantly on how much attention a person puts on luxury and style. Even so, however, the LS trim, seems to be the most underwhelming options available, especially given the lack of noticeable features it includes from the previous finish. Trim.
