The study of MaterialBooks - NotesJEE/PMT SHARE The most prestigious medical entrance exam in the country - AIIMS MBBS is scheduled to take place on May 25 and 26, 2019. Getting a place at AIIMS College is a true dream for every novice medical student. This exam not only tests your conceptual understanding of physics, chemistry and biology with its variety of subjects (MC's AR), but also examines your awareness of current affairs. The AIIMS MBBS 2019 exam will consist of 200 objective questions. This includes 60 questions (40 MC's questions and 20 ADR questions) from each physics, chemistry and biology, as well as 10 MC's on ability and logical thinking and 10 of general knowledge. The Approval of Biology and Mind section is more difficult because it is difficult to find the right choice. Approval and reason are two statements that may or may not have anything to do with each other and may be correct or wrong. It is taxation to understand whether these two statements are related and the reason gives the correct explanation of the statement or not. Any wrong answer consumes your hard earned points from part of the MC'S. But, GOOD practice of this section can save you from such a terrible situation. To help you master The Approval and Reason type questions for the AIIMS exam, we run quizzes from each subject viz, physics, chemistry and biology. Here you can access the AR Biology quiz, which offers you the most up-to-date questions about the AIIMS Biology 2019 exam. So, don't hold back, participate in this quiz if you really want to get an MBBS seat in AIIMS College! Let's start the quiz! APPROVAL : Endoplasmic cyticulum helps in the export of proteins. REASON : RER is actively engaged in protein synthesis. a) Both ENERGY and REASON are true and REASON is the correct explanation of APPROVAL b) As the statement and REASON are true, but REASON is not the correct explanation of THE ASSERTION's APPROVAL truth, but REASON is false d) Both APPROVAL and REASON are false. APPROVAL : Sexual reproduction always needs meiosis. REASON : Conjugation is not an ideal type of sexual reproduction. a) Both ENERGY and REASON are true and REASON is the correct explanation of APPROVAL b) As the statement and REASON are true, but REASON is not the correct explanation of THE ASSERTION's APPROVAL truth, but REASON is false d) Both APPROVAL and REASON are false. APPROVAL: Active water absorption by roots requires metabolic energy. REASON : Passive water absorption by roots occurs in response to transpiration. a) Both ASSERTION and REASON are true and REASON is the correct explanation FOR APPROVAL b) As the statement and REASON are true, but REASON is not the correct explanation of THE ASSERTION's) but REASON is a false d) Both APPROVAL and REASON are false. APPROVAL : The efficiency of the C4 plant is greater than that of the C3 plant. REASON: C4 plant plants effective in collecting CO2. a) Both ENERGY and REASON are true and REASON is the correct explanation of APPROVAL b) As the statement and REASON are true, but REASON is not the correct explanation of THE ASSERTION's) APPROVAL truth, but REASON is false d) Both APPROVAL and REASON are false. APPROVAL : Fermentation is an incomplete oxidation of glucose into lactic acid or ethanol. REASON : Fermentation occurs in anaerobic conditions only in prokaryotes. a) Both ENERGY and REASON are true and REASON is the correct explanation of APPROVAL b) As the statement and REASON are true, but REASON is not the correct explanation of THE ASSERTION's) APPROVAL truth, but REASON is false d) Both APPROVAL and REASON are false. APPROVAL : The small intestine is the main organ for the absorption of nutrients. REASON : The absorption of water, simple sugars and alcohol, etc. occurs in the small intestine. a) Both ENERGY and REASON are true and REASON is the correct explanation of APPROVAL b) As the statement and REASON are true, but REASON is not the correct explanation of THE ASSERTION's) APPROVAL truth, but REASON is false d) Both APPROVAL and REASON are false. APPROVAL: Respiratory gas exchange occurs through osmosis. REASON : Respiratory gas comes from a low partial pressure area to a higher partial pressure area. a) Both ENERGY and REASON are true and REASON is the correct explanation of APPROVAL b) As the statement and REASON are true, but REASON is not the correct explanation of THE ASSERTION's) APPROVAL truth, but REASON is false d) Both APPROVAL and REASON are false. APPROVAL: Pulmonary circulation consists of a stream of deoxygenic blood from the right ventricle to the lungs and an influx of oxygenated blood from the lungs into the left atrium. REASON : Systemic circulation consists of a flow of oxygenated blood from the left ventricle into all parts of the body and deoxygenic blood from different parts to the right atrium. a) Both ENERGY and REASON are true and REASON is the correct explanation of APPROVAL b) As the statement and REASON are true, but REASON is not the correct explanation of THE ASSERTION's) APPROVAL truth, but REASON is false d) Both APPROVAL and REASON are false. APPROVAL : Additional oxygen consumption in the human body is known as oxygen duty. REASON : Additional oxygen is required by the body to oxidize the accumulated lactic acid produced during a training session. a) Both THE AFFIRM and reason are true and REASON is the correct explanation OF APPROVAL b) As the statement and REASON are true, but REASON is not the correct explanation of THE ASSERTION's) THE APPROVAL of the truth, but REASON is false d) Both APPROVAL and REASON are RELATED: The image focused on fovea is seen most accurately. REASON : Fovea retina contains numerous photoreceptor rod cells. a) Both APPROVAL and REASON are true and REASON is the correct explanation of THE ERIC b) Both and REASON are true, but REASON is not the correct explanation of THE ASSERTION c) APPROVAL truth, but REASON is false d) Both ENERGY and REASON are false. ADR Biology (day-5) March 18, 2019 Gaurav Gupta Approval-Cause Issues are the most tedious part of the AIIMS exam. They require not only an understanding of the statements, but also a correct and accurate conceptual justification. The Bank of Issues on Approval of Causes in AIIMS Biology provides a full set of questionnaires in addition to learning from NCERT textbooks. The book contains, in total, 2000 questions with 95% - explanations. This book is designed for students to overcome the difficulties they face in trying Approval and Mind issues. This will help them refine their concepts and come out successful in various competitive medical entrance exams. This whole book consists of chapter-wise questions in accordance with the NCERT curriculum. At the end of each chapter, detailed solutions were provided to help students with self-esteem. The uniqueness of this book lies in a new set of issues that provide coverage for the entire NCERT curriculum. Stay tuned! We'll be here soon. Delivery Associate will place the order on your doorstep and step back to keep the 2-meter distance. Customer signatures are not required at the time of delivery. To pay for delivery orders, we recommend paying with a credit card/debit card/netbanking via a paid link sent via SMS at the time of delivery. To pay in cash, place the cash on top of the delivery box and step back. Amazon directly manages the delivery of this product. Tracking the delivery of an order to your doorstep is available. Types of approval reasons are often asked on the AIIMS exam, with nearly 60 questions (physics 20, biology 20, chemistry 20). The vast majority of students find it quite difficult to answer this question of the type of reason for approval for AIIMS. Students often find it difficult to connect facts and find solutions to issues. Before we learn the traits of how to try approving reasoning issues for AIIMS, let's have some of the basics of things cleared in our mind. Be clear with the basics: Get these concepts well fixed in your mind before deciding: What is the statement? And, what are the elements in approving the reasoning questions? Approval simply means a confident and decisive affirmation of fact or faith. Elements: Candidates are provided by STATEMENT. The statement provided an opinion, fact or comment. Another statement is REASON. STATEMENT and REASON form a couple that may or may not have a relationship between them. How Is The Attempt To Approval Reasoning Matters? With this little understanding of the above elements, here's how to try to affirm reasoning questions for the AIIMS exam: THE STATEMENT IS, and REASON should be STATEMENT or be the immediate cause for it. This is a common mistake to avoid. This should be kept in mind: REASON should or should be the correct explanation for THE RIGHT. It's important to note that both STATEMENT and REASON may not have the same theme, but it doesn't matter. Practical Tips: There are strong concepts of knowing the theory of each curriculum theme Read all chapters of the NCERT line by line, learn each concept and the reasons discussed in it. This will help you clarify difficult issues by finding solutions, as it is difficult to find out whether this statement is the cause of the first one. These are some of the key points that should be kept in mind when trying to resolve the statement of reasoning based on questions for AIIMS. The ability to distinguish between a statement and a cause, or to find a connection between them will give you a chance to score full estimates in this segment of the question pattern.
