Budget Tracker App Description of Spending Management the way you want with Budget Tracker. Create a budget, assign categories for this budget, and then track it down! You have complete control over how you want to track and visualize your spending! Budgets: by grouping your spending into budgets and categories: assign different categories to the budget to break down costs by budget: set how often you want each budget to update the multi-currency: use different currencies for each budget and for each transaction : Currency Exchange: Automatic Currency Conversion when Switching to Different Currencies: No hassle of entering transactions for just a few taps ---- You can go to a premium account to access premium content and unlock all features by subscribing to a premium account: Monthly premium for \$3.99 each month is an annual premium for \$14.99 each year Choosing a free trial will allow you to try out all premium features for free for the specified period. At the end of the free trial period, you will automatically sign in, and your iTunes account will be charged the above amount; if you don't cancel 24 hours before the end of the trial period. After the subscription, the subscription will be renewed automatically if the automatic extension is not switched off or you cancel at least 24 hours before the end of the current billing period. Any unused part of your free trial period will be cancelled after you buy a subscription. You can manage your subscription and disable the automatic update from your iTunes account settings. NO SUBSCRIPTION: Don't like paying subscriptions? You can also unlock a premium account forever with a Lifetime Premium at a time from payment: Lifetime Premium for \$9.99 times Note: Higher prices for U.S. customers. Prices in other countries may vary, and fees can be converted into local currency depending on your country of residence. Terms and conditions: Budget Tracker App Screenshots Budget Tracker App Reviews App is good, but a decimal button. So my budget is not accurate because I can't add cents This app would be great if I could actually choose a date. For a one-time budget, you can't choose a future start date. And for repetitive applications, you can't change the start date or recycling date. I get paid every two weeks. And this app would be great, but no matter when I start the budget, it resumes on a set schedule. So it resumes on Friday I don't get paid. No matter when I set him up. There is no flexibility with this app. Ugh. I wanted to like it. Loved the app until it opened today. It needs to be updated with STAT, I could keep track of all my budgets. I rely heavily on this!! Edit: The bug has been resolved for several weeks and now the problem is over again. My good budget went from \$125 that I had leftovers and and up to more than \$2,000 per night. Two thousand dollars. It's annoying. I rely on this app to keep me honest. I paid \$10 for the app. Come on guys!!!! This app is exactly what I need! The only thing I miss (and my friend to whom I recommended the app) is the ability to set up repetitive payments. Hopefully that can be added in the next update! I'm a college student - I work and save most of my income over the summer and then transfer a certain amount of my savings every week during the school year. Every other budget app I've tried relies on tracking bank transactions and not registering transfers from savings as income, making them virtually impossible for those without a stable income to use. Having manually signed up for each transaction is a little less convenient, but it's worth it to be able to quickly and easily check how much money I left for the week. One of the features I would like to see would be the ability to add recurring payments for bills and subscriptions. Right now, I

calculate the monthly cost of all my bills and subscriptions, divide it into 4, and subtract that from my weekly budget, but that means I have to transfer my entire budget every time that amount changes. Being able to add bills and subscriptions, as well as see upcoming payments, would be very helpful. The app looks good and the categories look nice. But either it is very limited, or extremely unintuitive. There is no way to add a score. I need an app to keep track of what I'm spending, but this app can't do it. There is no tutorial or other help to help you enter costs. It doesn't cost anything. Almost perfect!! Aesthetically pleasing and easy to use. But there is no way to share the budget with your spouse. Still great though! Unfortunately, it hasn't worked in the last 24 hours. The app won't even open. The app won't open again from 2020! This is my favorite app, or any system, for that matter, sorting my monthly budgets and it doesn't ask to be contacted by your bank account, which is always a bit suspect for me. Also, I had a glitch with my phone and I contacted the developer and they not only came back to me within hours but also actually solved the problem! I've downloaded a lot of apps and it hasn't been my experience in the past. Get the latest version of the Tracker App game from Entertainment for Android. Games Tracker is an app where you track all the games that you are interested in by tracking them, you can mark your game status on tracked games. This allows you to check ahead,... Download and install a free android apk file for Games Tracker. 5 stars: This app has done what no other app or website can do for me. Sort my games by rating! Devs are amazing, responsive and extremely talented. I've tried all the other apps on Google Play and web based and no one is clean and user-friendly like this. Well done guys! Thank you again. 5 Stars: The app is exceptional in its Wee design and release tracking. The recommendations are amazing and I will use them to decide my choice in games from now on. 5 Stars: Its a great app to track you games... have some trouble searching for a while, but this app is great overall... Recommended 5 stars: This is a great app. However, a few things that I recommend to them developers can improve. - search game developers (Team Ninja, Retro Studios, etc.) - a link to DLC extension if the game has DLC - filter options for my list of games (genre, year, etc.) - more sort of game options for my list of games (sort by rated) - metacritic ratings would be better, although the current is pretty close to meta rating 4 stars: The app is amazing and good but you have to add a couple of descriptions like the playing option, but never finished and want/do not want the option , DLC should not be considered a game, if it is a standalone dlc , It would also be a good idea to add consoles or generation categorization I would also appreciate if you add a list of company 5 stars: I do not know where to start , this application is really very good. I try all similar apps but this one has so much polish. It looks like Games Tracker 1.13.72020-10-09What is new: Games Tracker APK Bug Fix and Application Development.
