You can transfer your WhatsApp data to your new phone by recovering from Google Drive or local backup. Restore google Drive to successfully recover your Google Drive backup, using the same phone number and Google account used to create backup. To restore backup: Delete and reinstall WhatsApp.Open WhatsApp and check your number. When you request, click RESTORE to restore chats and media from Google Drive.After the recovery process is complete, click NEXT. Your chats will be displayed when the initialization is complete. WhatsApp will start restoring your media after the chats are restored. If you install WhatsApp without any pre-backups from Google Drive, WhatsApp will automatically recover from your local backup file. Recovery from your local backupIf you want to use a local backup, you'll need to transfer the files to your new phone using your computer, file researcher or SD Card.Note: Your phone will store until the last seven days worth of local backup files. Local backups will be automatically created every day at 2:00 a.m. and stored as a file in your phone. If your data is not stored in a folder /sdcard /WhatsApp/, you can see folders of internal storage or main storage. Restore a less recent local backupIf you want to restore your local backup, which isn't the last you'll need to do: Download the file manager app. In the file manager app, go to sdcard/WhatsApp/Databases. If your data isn't stored on an SD card, you can see an internal store or main store instead of a sdcard. Rename the backup file you want to restore from msgstore-YY-MM-DD.1.db.crypt12 to msgstore.db.crypt12. It is possible that an earlier backup may be on an earlier protocol, such as crypt9 or crypt10. Do not change the amount of crypt extension. Delete and reinstall WhatsApp.Tap RESTORE on request. Related: How to back up Google DriveCan't create or back up Google Drive Restaura tu historial de chat desde una copia de seguridad en iCloudPara asegurarte de que exista una copia de seguridad en iCloud, ve WhatsApp qgt; Configuraci'n zgt; Si puedes ver cu'ndo se crea la copia de seguridad m's reciente, elimina y reinstala WhatsApp.Despu's de verificar tu n'mero de tel'fono, sigue los pasos para restaurar tu historial de chat. Nota:Debes iniciar sesi'n con el Apple ID que usas para acceder a iCloud Drive.Debes tener espacio suficiente en tu iPhone y iCloud para crear la copia Security. You must have ONE available space of at least 2.05 times the size of the backup on both your phone and your iCloud account.To restore a backup, you must use the same phone number you used to create it. It is possible to restore the chat history of another WhatsApp account.Because the backups are linked to Individual phone number, you can have backups for multiple WhatsApp accounts stored in the same iCloud account.Related Resources: Does this useful article have aqest? Page d'inici de les PMF While you can't directly transfer WhatsApp from Android to iPhone by backing up, there's something else that can be done. WhatsApp allows us to email conversations about any contact. So you can email some of the selected conversations and keep a backup. While this won't allow you to recover the same chats on WhatsApp, you'll be able to access them on your new iPhone. Here's how you can send WhatsApp messages from Android to your iPhone using this native feature. Start WhatsApp and just open up any conversation you want to keep. Click more options (three point icon) at the top and select email covers. You are asked if you want to include or delete the attached media files. In most cases, we recommend deleting it because the mail servers have 20MB as a mail limit. This will open the Gmail home track interface with a text file attached that will have your WhatsApp chats. Just type in your own email ID or save it as a project. Later you can access the same email account on your iPhone and download chats to view them whenever you want. Please note that you can only view chats on your iPhone as a text file and they will not be available on WhatsApp as usual. In addition, this method is only recommended to save a small number of conversations and not to move all WhatsApp data. Tip: What do you need to know before moving WhatsApp from Android to iPhone? Below are some expert tips to help you move WhatsApp from Android to iPhone. While you can't directly recover android backups on your iPhone, it's best to keep a backup anyway. This ensures that you always have a copy of your WhatsApp chats. Later, you can use WhatsApp's backup extractor to view chats on the system. A local backup of WhatsApp chats is stored in the storage of whatsapp's data database. If you wish, you can access the file at any time and move it to any other store. While there are several tools that can transmit WhatsApp chats from Android to the iPhone directly, only a small number of them (such as MobileTrans) are genuine. Be sure to read the user's feedback about these tools before testing, that you use el mismo phone number on both devices. Si no es as, yn la funci'n de cambio de n'mero de WhatsApp. Esto nos lleva al final de esta extensa gu'a sobre c'mo transferir los chats de WhatsApp de Android iPhone. Como puedes ver, la soluci'n nativa no darlus los resultados an expected para motion tus datos de WhatsApp. On the other hand, MobileTrans - WhatsApp Transfer turns out to be la soluci'n perfecta to transfer mensajes from Android to iPhone directly. Adem, Tambian puede utilizarse to perform seguridad copies y restore WhatsApp, Viber, Line, WeChat y chats Kik. Por lo tanto, puedes tener la herramienta a mano, ya que te ayudar a transferir tus contenidos sociales y chats importantes de un dispositivo a otro sin problemas. Pruabalo free Pru'balo free Do you want to transmit WhatsApp conversations on Android on iPhone? Thanks to the incompatibility of the backup features used by the two versions of the messenger, there is no native way to do this, but there are third-party applications that can solve this annoying little problem. Transfer WhatsApp conversations on Android to iOS As WhatsApp uses Google Drive to back up time messages on Android, and iCloud on iOS (iPhone), it is clear that the two versions of the messenger are incompatible with each other. So you can't back up data time, usually on Android, go to the iPhone and download it, or vice versa. To do this, you need to use third-party apps to collect messages and transmit them directly from Android to the iPhone, and vice versa. One of the most practical is the wondershare dr.fone (Windows, macOS), which greatly simplifies this process. To transfer WhatsApp messages from Android to iPhone, do the following: download and install Wondershare dr.fone; Open the program and connect your iPhone and Android phone to your computer with USB cables; On the home screen, click The Recovery social app, WhatsApp, and finally, whatsapp messages; The program will detect cell phones and display the screen above. Check if Android has been shown at the source and the iPhone is at its destination. Otherwise, click The Flip button. Click the Transmission button. The transmission of messages between Android and iPhone will happen automatically, and just wait for the end of the process. And that's it. Remembering, dr.fone can also be used in reverse, which is to send messages from the iPhone to Android. And you should have both phones at hand and running. If you've lost or been robbed, it won't work. Export Messages If this solution doesn't please you, know that you can also export WhatsApp messages via your email account. How to Export and Save WhatsApp Chat History This Procedure Allows You to Send You give on 40,000 mensagens sent, sem photos, videos, music ou arquivos attached, ou as 10 thousand mais last, it's voc scolher send tudo. Of course, or resource - limited capabilities of each mail client, and it may not be mais elegante das solu'es, but it also works. No doubt, of all the apps that we have installed on our mobile phone, one of the most important when it comes to switching mobile WhatsApp, as most users do not want to lose their messages when switching from Android to iOS. The transfer of WhatsApp messages from Android to iOS The truth is that the messaging app itself allows us to back up the time of all our messages and files shared via WhatsApp. A copy that when we install an app on another terminal can be easily restored if we are in the same environment, that is, we move from one Android mobile to another also from Android or we switch from one iPhone to another. However, the problem arises when we switch platforms because, WhatsApp's backup system on Android is stored in Google Drive, while in the Apple environment it is done in iCloud. This means that we will not be able to recover the backup of the Google disk from the WhatsApp version for iOS. In this situation, one of the options offered by the messaging app is to export messages and files of those chats that we do not want to lose. That is, we will be able to send conversations to those contacts that we do not want to lose in the mail to them later on the iPhone and be able to read them, even without having to have WhatsApp installed. To do this, all we have to do is go to each of the chats that we don't want to lose, and once inside, we click on the menu button, click on the more option, and then click on the export chat. Then you'll see a window in which you ask if you want to add shared media files in this chat and finally you can choose how to share it with yourself. This time, it's best to send us WhatsApp chats via email so that we can browse and read them whenever we want from our iPhone. Apps for transmitting WhatsApp chats If what we want is to be able to transmit all WhatsApp messages from Android to iPhone and be able to recover them in the messaging app ourselves, then we need to take care of one of the third-party apps that allow us to do this kind of task. Tenorshare WhatsApp transfer: Transfers all data to the new mobile phone Tenorshare WhatsApp Transfer allows us to transmit Messages and Investment WhatsApp, including videos, images and documents, from Android to iPhone, and vice versa, as well as between mobile phones with the same operating system. You can back up Time WhatsApp messages from your iPhone to your computer for free and easily. It outperforms official solutions by offering a simpler and faster approach to backing up WhatsApp messages without restrictions, being very useful for restoring WhatsApp backups to iPhone, iPad or Android. Simply plug in your target iOS or Android device and select a backup file. At this point, WhatsApp data will be easily and quickly restored on the new device. Dr.Fone Without a doubt, the most popular and used is dr.fone, software available for Windows and Mac, which we can download for free from the same link and which was designed to allow users to transmit WhatsApp messages from Android to iOS and with iOS on Android in complete comfort. It also allows you to recover messages and messages from other social networks. Once dr.fone is installed, we run the tool on our desktop, click on the Social App Recovery option and then on WhatsApp Message Recovery. Next we connect both mobile phones to our computer and click Transmissions. Automatically, it will start a process that will transmit all WhatsApp messages from Android to iOS. Sending messages as a text file Famous messaging app offers us another option of sending WhatsApp messages from one Android device to another with the iOS operating system. Well, actually, the option we're going to mention allows us to open these messages on any device, regardless of the operating system. We mean WhatsApp offers to send a copy of the chat in a simple text format. This is not a recommended option if we want to transfer all our chats from one mobile to another, but the truth is that it can be very useful if we want to just transfer a chat or a few conversations from our Android device to another mobile or even a computer without having to have a messaging app installed. Here are the steps to export WhatsApp chat in a simple text file: We open the app on our mobile phone. Let's go to the chat in question. Click on the menu button and select the More option. Then click on the export chat option. We choose whether we want to export with media files or not and wait. Once the file is created, we will be asked which app we want to share the file with. So you can send a chat via email, for example, and you can open it on another device. Now, all we have left is to go to the device in question where we want to access this chat, either iOS or from PC or Mac, download the file and open it with a tool that allows you to view simple text files.
