Okay, who doesn't like music here? I'm sure everyone in this world loves listening to music and enjoying it their own way. Today I'm here to introduce to you guys an app that is the first of its kind in the Android market that works as a professional application for MJCing DJ. Yes, there is an app for it and it is called Cross DJ Pro APK. Many of us don't know this app and the capabilities of this app. I will explain each feature this app contains screenshots. MIXVIBES is a company that has been making software since 1999 and are the developers of the Cross DJ Pro App. Most DJ apps are designed for PCs and are very difficult for a casual user to connect with it, but being an android app and still very easy to use the Cross DJ Pro app. Given Cross DJ Pro and Cross DJ Free on the same line. We have a set of different features supporting in the professional version of this app (Cross DJ). The design of the app is simple and can be easily used and understood by any user, regardless of the experience he/she has with Android mobile phones. The controls are pretty awesome, convenient and easy to use. Other features provided are also interesting, and they are sure to make the user use the app more and more to mix audio or music out of their own interests. Download Cross DJ Pro APK Features Support Cross DJ Free Scratch and Feel the Music You Are Designing on Deck with two tables at once. Various panels are available n swiping tabs.loops and hot signals are automatically set to the music rhythm. A wide range of customizable step range. Optimized for small screens with large buttons. Crossfader with three modes: normal, autofade, cut. Cross DJ is compatible with AAC, MP3, FLAC, etc. Pro Features Is Supported by Cross DJ Accurate Music Detection, up to the last decimal in the room system. The new synchronization option will never allow the tracks to exit the phase. Make any track on deck sync properly. loops and hot signals automatically in a musical rhythm. A wide range of customizable step range. Progressive as well as hand-bending step. Listen to the music tracks we're working on before mixing them up. Realistic sounds just like real tables. The player reacts instantly to the actions you've done on deck. Lots of samples to play with (72 samples), synchronized with the main player to start mixing. Have an idea of your own sample? Then be prepared to create them and add to the working samples. Share your work on any of the smes or social networks. Automatically set the track base levels and then automatically synchronize. Supports sound on marshmallow-controlled devices. About Cross DJ Pro Cross DJ Pro is a professional version of Cross DJ in which we provide a number of new and cutting-edge things used in mixing your favorite music on deck. How to use Cross DJ Pro Download Cross DJ Pro APK from here - Download Cross DJ Pro Let me explain this screenshot first for you. We can work on 2 tracks at the same time in Cross DJ Pro. Click the top left button to add or view music from your device. There will be a list of music or audio files. Now select the desired audio file, the file will be automatically loaded into the deck (Left side deck). Now to load the sound on the right side deck you have to follow the same procedure followed when adding the file to the left side deck. Now after adding your favorite music to the deck now it's time to mix it with your creativity. Play music with a play button that is in the middle of the two buttons at the bottom of the screen. If you want to sync both songs playing on deck, you can use a feature called synchronization, which is provided at the bottom of the screen next to the play button. You can also control the tempo of the music on the deck with special special draggable buttons next to the decks. You can control the volume of the decks with a horizontal draggable button placed in the bottom middle of the screen We have a separate equalizer designed for Cross DJ. If you want to use this equalizer, then click the button that is in the middle of the screen and located between the FX and repeat buttons. There is approximately 16 FX in Cross DJ Pro, which is rich in quality and good luxe for everything you work with. Ok! Everything is ready, now, how to record the work you completed on deck? We can record the music you composed on deck using the built-in voice recorder and export it to other places. There is a special feature that adds more creativity to your music. Yes, at the bottom of the equalizer button there is a button that gives us a short menu on both decks you can call them as special sound effects and are very good at using and embed in your music collection. As we talked about the pros let's discuss the pros. There are some copyright issues in the app and others apps, and they are not a big problem, but they reduce the reputation of the application. Overall this app (Cross DJ Pro) is good to try every music lover's app to create your own mixing and impress others with these mixes. Thank you for reading this article and Us. If you have any questions or doubts about this topic, please feel free to contact us through the comments section. Stuck somewhere? Don't worry, comment on your problem and we'll get to you to clear your doubts. Stay tuned to latestmodapks for cooler apps like this. This is.
