I hope you managed to learn more about LightKeeperService.exe file and how to remove it. Also, share this article on social media if it helped you. Let us know in the comments below if you face any other LightKeeperService.exe related questions. While this is certainly uncommon today, there are still people who rely on dial-up connections or similar broadband services that are prone to decline. Internet service providers that still offer this kind of connection often drop them when they don't see network activity or when terminals only work chastely after a while. This is what has led many people back in the day to experience interruptions to their service for no apparent reason. Don't worry now, because solutions like Connection Guardian exist precisely to prevent this species from the events. Installing this simple program will greatly improve your life if you are on dial-up and need to connect at any time without hassle or annoying waiting periods expecting to reconnect services. It works by simulating online activity, thereby avoiding automatic shutdown from the ISP. The utility uses your own page visit log and compiles a list of sites, making it an increasingly consistent browsing pattern than visiting random pages to stay connected. The ruse behind this software may not fool all internet companies. Connection Keeper is licensed as freeware for a PC or laptop running Windows 32 bit and 64 essential operating system. It is in the bandwidth category and is available to all software users as a free download. The process known as LEDKeeper belongs to MSI MysticLight or LEDKeeper software from Micro-Star Int'l Co. (www.msi.com.tw). Description: LED .exe not necessary for Windows and will often cause problems. The LEDKeeper.exe file is in the C:\Program File (x86) subset (typically C:\Program Files (x86)\MSI\MysticLight\). The known file sizes in Windows 10/8/7/XP are 1,068,688 bytes (17% of all occurrences), 1,037,472 bytes, and 22 other variants. The program is not visible. LEDKeeper.exe is not a Windows file system. The file is trusted by a trusted company. The program listens to or sends data on open ports to the LAN or the Internet. Therefore, a technical safety rating is 49% dangerous; but you should also compare this rating with user reviews. Recommended: Identify LEDKeeper.exe related errors Important: Some malware is camouflaged as LEDKeeper.exe. Therefore, you should check the .exe on your PC to see if it's a threat. We recommend the security task manager to check your computer's security. This was one of the best picks to download The Washington Post and PC World.
