AcceptAccept Home Service - Support frequently asked questions Install your own combination Locks A: To install a combination on a Set-Your-Own combination of lock models 175, 176, 177, or 178, follow these steps: Open Castle with factory set or earlier set combination. The lock must be configured to the current combination, or you can't reset it. Note: shackle should be in an open position to reset the combination. Insert the reset tool (contained in the package) into the hole on the side of the lock. Click reset the tool and rotate 90 degrees (in either direction). The reset tool automatically stays in this position. Set the wheels to the desired combination. Turn and remove the reset tool. The lock is now set up for a new combination. Build a new combination in a safe place. A: Here are the instructions for changing the combination on your 1523D/1524D/1534D/1534DBBR/1534DWH/1534DBLU/1534DBLK/1534DPNK Combined Lock: Open Castle and Take Off shackle. Pull out the spring loaded with a metal end lid. Remove all 4 or 5 combined wheels. IMPORTANT: Make sure the red labels remain aligned with the Master logo. Set the wheels to match the Master logo. Attach the metal end of the lid back to place. (Note: If the final cap will not be mounted properly, check the wheels to make sure they are right up.) Close the shackles and scramble the wheels to block. Protect your new combination in a safe place as you are the only one who knows what it is! A: Here are instructions on how to reset the combination on the lock of the backpack (which is pre-installed in the factory to open for a combination of 0-0-0): Align the dials to the preset combination (0-0-0). When you press a button at the bottom of the lock, turn the dials onto any combination you choose. Button only after you've finished choosing a combination. The castle is ready for use. To change the new combination again, dial the combination and repeat the steps 2-3. Don't forget to write down the combination and keep it safe somewhere! A: Here are the instructions for changing the combination on the 643D lock. With dials at 0-0-0-0, pull pull out shackle. Turn the shackle 90 degrees (1/4 turn) so the notch on the shackles is aligned with the cutout in the lock case. Tap and hold the shackles down. Set the dials on your own combination, lining up in the middle of the numbers with a red stripe. Lift and return the shackle to a closed position. Scramble dials to block. A: Here are the instructions for changing the combination on the 643DWD lock. This lock is pre-installed at the P-L-A-Y plant. Decide on your new combination of 4 letters - choose from sentences or create your own. With the dials on the P-L-A-Y (the middle of the letters should be aligned with the red stripe), pull out the shackle. Turn the shackle 90 degrees (1/4 turn) so the notch on the shackles is aligned with the cutout in the lock case. Tap and hold the shackles down. Set the dials to the desired combination by lining up in the middle of the letter with a red stripe. Lift the shackles, return to a closed position and keep the shackle down while scrambling the letters to lock. To reopen the lock, set the dials for the combination and lift the shackles. Don't forget to write down the new combination as you are the only one who knows it! A: Here are the instructions for changing the combination on you model 653D lock.
