Android Auto gets a number of promising new features, including wireless connectivity, group messages and the built-in Google Assistant service. But it's not all in the long run that could fundamentally change the way Android Auto looks and interacts in future models. Along with announcing that Volvo will be including an assistant, maps, and Play Store on its future vehicles, Google has demonstrated its vision for the future Android Auto interface at the Google I/O 2018 Automotive Session. The plan seems to give car manufacturers more control over the look and feel of the front of the car. Google's latest concept allows manufacturers to create a theme for a specific car with Android Auto, including colors and unique ergonomic details. The layout of the menu and details are also very adaptable to different screen sizes and resolutions, and Google's design has demonstrated several elements of the app on the screen at the same time, including map navigation, Spotify management, and assistant reminders. We took a look around the Dodge Ram 1500 Concept on B/O for a closer look at this new configuration design. Volvo is the only confirmed partner for the latest Auto features so far, so Google is equipped with Dodge itself. The user interface is a more interactive car dashboard, not just a blown version of the Google app. There's a Play Store support on board, but the whole system is more closely integrated with Android Auto here too. The new Android Auto supports more fundamental interactions with the car, making it brain, not just an extra body inside the car. The assistant can be used to control the non-Google part of the vehicle, so this is a very new take on the formula. For example, Google Assistant can adjust the AC temperature up and down using voice commands. In the future, you might ask how far until I need to refuel and use other bits of information from more tightly integrated automotive systems. In general, the concept makes it easier to view information, simplifies interactions with it and makes it more accessible with voice, and this can make Android Auto safer to use. In addition to long-term concept ideas, Google will also make changes to the way messaging and media apps are displayed in Android Auto. This requires some tweaking on the part of the developer, but this change is designed to provide a more consistent user experience in the growing portfolio of messaging and multimedia applications used in cars. To improve application compatibility and functionality, you should switch to a template architecture that is closely related to finding agile components interface that automatically organizes content. For developers, they fall under the new MessagingStyle and MediaBrowse API. Read: All the key ads from Google I/O 2018Google are the latest effort to improve Android Auto's consolidating design and features to create a creation consistent user experience. But the company is clearly experimenting with more customized designs for its vehicle partners. Nothing is set in stone at this early stage of the concept, but Android Auto may end up looking a fair bit different in a few years. Source: Android Central Distracted Driving is one of the most dangerous things you can do while driving. This puts you and everyone else on the road in danger, and while it has to go, let alone obviously something we don't condone. However, there are times when you need to stay connected, even when in your car. If you follow in turn by navigating, making a loud phone call, or managing music while on a long road trip, having a device to do all these things is a must. Google knows this and that's why it created Android Auto. Android Auto is the software that is available on your phone and in your car and it gives you a way to do all the things mentioned above as safely as possible. Ready to learn more? Keep reading! Raise your Android Auto experience If you have an old car that doesn't native support Android Auto, consider this third-party model from Sony. With a 7-inch touchscreen, physical media control and a built-in microphone, you have everything you need for a first-class driving companion. Source: Android Central released in March 2015, Android Auto is a special Android interface designed for use in your car. There are three main features of Android Auto, including take turns navigating, phone call support, and music/podcast playback. You can run Android Auto directly on your phone's display, or if you have a supported car, on its infotainment system (more on that below). You'll need an Android Auto app to get started, which can be downloaded for free from the Google Play Store. If your phone runs Android 10, Android Auto is built right into your phone and doesn't need to be downloaded. You can use Android Auto directly on your phone Source: Joe Marining/Android Central there are two main ways you can use Android Auto, the first of which is directly on your phone display. Just open the Android Auto app, and the car user interface is ready to use right there and there. Android Auto on your phone is quite easy to navigate. Your home screen shows recommended places to ride, any music or podcast that is currently playing, and call/text notifications as they come in. Page. If you have multiple maps or media apps (such as Spotify and Pocket Casts), you can tap the icon twice to see a list of all the apps available. Source: Android Central You'll also find a menu icon in the top left corner to set up Android Auto, as well as a microphone to access Google Google The best part about launching Android Auto on your phone is that it brings a secure, distraction-free interface to your car, regardless of whether it's made and the model. Just take the car mount so you can support your phone loud, run the Android Auto app and you're ready to rock and roll. The best universal mountain car in 2020 Dodge Ram 1500 is even better directly in your car Source: Andrew Martonik / Android Central Alternative, Android Auto can be used on your car's infotainment system. Whether you have a Google-approved model or a third-party head unit compatible with Android Auto, it helps you integrate the user interface more seamlessly with your car. Assuming that your car is supported, android Auto works in it quite simply. Open the Android app on your phone, connect the USB cable between your phone and the infotainment system, and Android Auto will start working on your car's display. Some phones also wirelessly with head units from JVC, Kentwood and Pioneer, but you'll probably need a wired installation. Once you get Android Auto running in your car, you'll notice that the user interface looks different than it works directly on your phone. Google updated the user interface in May 2019, and if you ask us, this is the best way to use Android Auto. It's easier to navigate, there's a legitimate app drawer to view all available apps in one place, and you can control the entire user interface using your car's physical handles/buttons if you never want to use its touch screen. Check out the links below for a guide on how to use Android Auto in your car and for a small review explaining its various perks in more detail. Google Assistant is on Android Auto Source: Android Central We mentioned it above, but it's worth calling again - Android Auto gives you quick and easy access to Google Assistant. Whether you're using Android Auto on your phone or in your car, click the microphone button to have instant access to Google's digital assistant. You can use an assistant for almost anything, such as asking about the weather, sending text, playing a specific song, etc etc. etc. assistant is incredibly useful outside of Android Auto, but it feels especially at home in an environment where you can't afford to do something else with your own hands. Whether you hit a microphone icon or just say: Hey, Google is truly hands-free access, this is an important addition that makes the Android Auto experience that much better and safer. Android Auto supports a bunch of your favorite apps Android Central Over the years, Google has done a great job of ensuring Android Auto relies on support for just about every major app you might want in a car. We won't list each one, but some of the highlights include: Google Maps Waze Spotify YouTube Music Amazon Music Apple Music Tidal Pandora iHeartRadio Audible Pocket Caste Facebook Facebook Telegram WhatsApp Skype Новый дизайн Android Auto подходит к вашему телефону - в какой-то момент Источник: Android Central В мае 2019 года Google объявила, что она будет заменять Android Auto на вашем телефоне с так называемым Google помощник режим вождения. Это та же основная идея, с там быть легкий доступ к навигации, музыке и громкой связи. По сравнению с текущим интерфейсом телефона Android Auto, Google Assistant Driving Mode делает гораздо лучше при обработке уведомлений, имеет более простой макет, и в целом чувствует себя более интегрированным с вашим устройством. Google не сказал, когда помощник режим вождения будет доступен, но мы надеемся, что это в ближайшее время. Практический режим Google Assistant Driving, который заменяет Android Auto на телефонах Поднимите ваш Android Auto опыт Если у вас есть старый автомобиль, который не родной поддержки Android Auto, рассмотреть эту стороннюю модель от Sony. С 7-дюймовым сенсорным экраном, физическим управлением мультимедиа и встроенным микрофоном, у вас есть все необходимое для первоклассного вождения компаньона. !функция (f, b, e, v, n, t, s) - если (f.fbq) возвращается; n q f.fbq - функция () n.callMethod ? n.callMethod.apply (n, аргументы) : n.queue.push (аргументы); если (!f._fbq) f._fbq n; n.push n. n. n. n.version - '2.0'; n.queue - q; t. b.createElement (e); t.async - 0; t.src - v; s - b.getElementsByTagName (e); s.parentNode.insertBefore (t, s) (окно, документ, 'скрипт', '//connect.facebook.net/en_US/fbevents.js'); fbq ('init', '174181139752304'); fbq ('track', 'PageView'); fbq ('trackCustom', 'ViewedVehicle', «год: '2019', сделать: 'Toyota', модель: 'RAV4', отделка: 'LE 4dr передний привод');> (функция ((s,o,g,r,a,m))'GoogleAnalyticsObject':i;r'r'g функции () (i'q'q'q (Аргументы)), i'r'l'new Дата ();a.s.createElement (o), m's.getElementsByTagName (o),a.async 1;a.src'g,m.parentNode.insertBefore (a,m)))(окно, документ,'скрипт','/www.google-analytics.com/analytics.js','ga'); ga ('create', 'UA-71479133-1', 'авто'); ga ('set', 'anonymizeIp', true); ga ('set', 'dimension1', '2019'); ga ('set', 'dimension2', 'Toyota'); ga ('set', 'dimension3', 'RAV4'); ga ('set', 'dimension7', 'полезность'); ga ('set', 'dimension8', 'make-model'); ga ('set', 'dimension9', 'видео'); ga ('set', 'dimension10', 'SUV');ga ('send', 'pageview');> (функция (d, t) «var a» d.createElement (t), s.getElementsByTagName(t), a.parentNode.insertBefore (a, s); (документ, сценарий)); > (функция (d, t) «var a d.createElement (t), s.d.getElementsByTagName(t); a.src » : s.parentNode.insertBefore(a, s); (документ, сценарий)); > Скрипт));> 2020 rav4 android auto update
