The playAralon Forge and Flame Mod ApkStep 1 guide: Choose The WarriorOpen world of games is all about choice, but you want to start as a warrior here because the controls are much more manageable for beginners. Feel free to choose any of the starting races, but, for the purposes of this guide, we recommend you roll the warrior. Step 2: Rank Up Fury is a warrior-only ability, and that's the key to creating the strongest characters in Aralon: Forge and Flame. The text for this ability reads: Increases your effective strength for 19 seconds, which basically means that it multiplies all the power values on your character within 19 seconds. Step 3: Put all your stat points into effect with Fury activeWhen your fully aligned Fury ability is active by putting one point of skill into the power attribute equivalent to putting nine skill points into force. This means you can get 8 free power points every time you level up. By the time we finished Aralon: Forge and Flame, we had a Level 40 character with more than 200 power - a feat that would not have been possible without this build.
