There are vidoes on Youtube to help you with formatting it. The tablet works perfectly, the touch responds, but don't expect it to work as a high end product. I didn't find any flaws, the screen is good. Scran can be replaced - discovered that when my 2 year old decided to step on it. Called lview, \$40 to replace the cracked screen. This is not worth it, given that it is not so noticeable and does not interfere with normal activities. WiFi connection is great, the apps work wonderfully. I use mine through hdmi to watch movies on TV. In general, the price and its functionality - it's a good product. ©2020 Walmart Stores, Inc. STAY AWAY !!!! I bought two at the same time and neither are working now. Helpful? Is the perfect size for taking when you travel has good graphics and a good memoryHelpful size? December 12, 2018Oc. I had it run very slowly from time to time and actually jump out of the program it works on. But I'll be good for Facebook or Twitter, but the game can be a fuss. Helpful? September 22, 2019Cut from you have to connect the charger to get it back onHelpful? November 20, 2019 is nothing but garbage, \$40.00 down the bottom again because the screen is cracked and because of that I can't do anything with it and further more it runs android 8.1 as a description saysHelpful? November 10, 2019Un actually Android 8.1. The devices will show up with Android 7.1 and there is no way to update them. You can also hear the components slide around as you moved deviceHelpful? July 14, 2019 Don't buy this item it doesn't work that goHelpful? May 18, 2019wrong version in the description says 8.1 Android Go Edition is only 7.1 nougatHelpful? February 27, 2020bought 2 of them for my kids Christmas and they lasted about 2 weeks. They were very slow and eventually went white screen and then nothing, horrible even for the money RCA pills just a little more works better than this!!!! Helpful? January 3, 2020Thesy product quality. If you don't spend time waiting to download it, you're spending on the restart because it crashed. Too slow for games. Too slow for video. Too slow for social media. It's This. good press weight. Spend extra money on better quality products. Helpful? Products.
