When I was a boy, I dreamed of traveling the world by plane. I can fly anywhere, to any country on my plane. In Merge Plane MOD APK (Unlimited Money), you can do more than that. This is the latest Merger Games game, free on both iOS and Android. In this game you are the boss of a large aviation company that owns several planes and manages hundreds of flights a day. Idle game is always a lot of loved people because of the fun, unique gameplay that doesn't require too many players stuff. In previous games, I imagined you used to manage the honey factory in the Bee Factory, owned by the company in the game Dev Tycoon, now let them try this game! Table contents

Players start developing their airline with just a few rudimentary aircraft that seem old. On the screen are the airport and elliptical simulation of the flight path. Take one or more of your favorite planes and let them complete the flight. These aircraft can carry cargo or passengers. When they catch the flight and return to their original location, you will get gold. In the first days I actively made flights, earning money by buying new aircraft and upgrading existing aircraft. But after a long time, I feel that this game is repeated and there are not many new things. To overcome this situation, Merge Plane has added many features, many things of attraction in the store to encourage players to make money to buy them. I understand that you don't need to play this game continuously. Once you've made the flight, you can close the game and continue your work and then you can get paid the next time you open the game.
