Notes[[edit the editing source] Assault Rifle SP suffers from 100% damage loss durability problems (e.g. if the maximum attack is 322, it will have 161 attacks at 50% endurance). It is best used as a defensive or expeditionary weapon, as it loses too many attacks for normal use. (this no longer seems true and has not been for some time) An assault rifle combined with Stingshroom can easily execute Coen of the right level, especially if combined with a Shooter class fighter. Mastery Levels[[edit source] Meijin Tip Full-Auto!! Do you have an assault rifle weapon? Fire it at any range! Full Auto: Assault rifles are no longer limited to firing mode. I can fire continuously, as long as the trigger holds up and the bullets are loaded. L1/R1 Move: Attack Smash. This is a weak crowd attack that consumes durability if it strikes. Comments Share Bread and Butter firearms in Tower Barbs, KAMAS-A1 is a rifle with respectable ammunition capacity, damage and accuracy. At a cost of 1 rage bar, the fury move is excellent value against harder targets or crowds, at the cost of a good piece of weapon durability and/or eyebrows close by. It is located primarily on floors 11-20, but can remain useful for the rest of the game. ★★★★★★★★★★★★★★★★★★ MASTERY RANKS 6 ATK 1: FULL AUTO Unlocked Full Car Mode. 10 ATK 2: SKILL ASSAULT SMASH or Weapon Mastery Level Click here for Mastery Ranks Community Universal Content available under CC-BY-SA unless otherwise stated.
