Approximately 172 grams (including battery) The size of the product, the weight of the product and the associated specifications are only theoretical values. Actual measurements between individual products can vary. All specifications are subject to the actual product. Black Sapphire Blue Platinum Gold Size: 6.3 inches Color: 16.7 million Colors Color Saturation Speed (NTSC): 85% (typical value) Tyle: TFT LCD (LTPS IPS) Resolution: FHD 2340 x 1080, 409 PPI EMUI 8.2 (based on Android 8.2.1) SNE-LX1: 4GB of RAM and 64GB of SNE-LX2 PM: 4GB of RAM and 64GB of SNE-LX3 PM: 4GB of RAM and 64GB of MICRO SD card slot: support up to 256GB (non-standard configuration) Due to limitations in processor processing power, Memory, used by the operating system and pre-installed applications, The actual space available to users may be less than the stated memory capacity. The actual memory space may change due to app updates, user operations, and other related factors. Rear camera: 20 mega-pixels (color) - 2 mega-pixels (color), Aperture F/1.8, supports autofocus (PDAF and contrast focus) Frontal camera: 24 mega-pixels (color) - 2 mega-pixels (color), diaphragm F/2.0, supports fixed focus length.Photo pixels can vary depending on the mode of shooting. 3750 mAh 9 B/2 Charger Typical value. The actual capacity may vary slightly. This capacity is the nominal capacity of the battery. The actual battery capacity for each individual phone may be slightly higher or below the battery capacity par. Frequency range: SNE-LX1 (Single SIM) 4G LTE FDD: B1/B3/B7/B8/B20 3G WCDMA: B1/B2/B4/B5/B8 2G GSM: B2/B3/B5/B8 SNE-LX1 (Dual SIM) 4G LTE FDD: B1/B 3 / B7 / B8 / B20 3G WCDMA: B1 / B2 / B4 / B5 / B8 2G GSM: B2 / B3 / B5 / B8 Secondary SIM card: 4G LTE FDD: B1 / B3 / B7 / B8 / B20 3G WCDMA: B1 / B2 / B4 / B5 / B8 2G GSM: B2 / B3 / B5 / B8 SNE-LX2 (Single SIM) 4G LTE TDD: B38 / B40 / B41 4G LTE FDD: B1 / B3 / B5 / B7 / B8 / B18 / B19 / B28 3G WCDMA: B1 / B5 / B6 / B8 / B19 2G GSM: B2 / B3 / B5 / B8 SNE-LX2 (Double SIM) 4G LTE TDD: B38 / B40 / B41 4G LTE FDD: B1 / B3 / B5 / B7 / B8 / B28 3G 3G WCD AMA: B1 / B5 / B8 2G GSM: B2 / B3 / B5 / B8 SNE-LX3 (Single SIM) 4G LTE FDD: B2 / B4 / B5 / B7 / B12 / B28 / B28 3G WCDMA: B1 / B2 / B4 B5 / B8 2G GSM: B2 / B3 / B5 / B8 SNE-LX3 (Двойная SIM) 4G LTE FDD: B2 / B4 / B5 / B7 / B12 / B28 3G WCDMA: B1 / B2 / B4 / B5 / B8 2G GSM: B2 / B3 / B5 / B8 B8 Double SIM version, slot for any card can be installed to accommodate primary or secondary SIM card. The functions available on the live network depend on the situation with the operator's network and related deployment services. 802.11a/b/g/n/ac, 2,4 ГГц и 5 ГГц Bluetooth 4.2, BLE, HWA, aptX и aptX HD Type-C, USB 2.0 3.5 мм Гарнитура Джек PC Синхронизация данных SNE-LX1: Поддержка SNE-LX2 / SNE-LX3: Не поддерживается датчик ambient Light Proximity Sensor Gyroscope Датчик отпечатков пальцев Аудио формат: mp3, mp4, 3gp, ogg, ogg aac, flac, midi Video File Format: 3gp, mp4, webm, mkv HUAWEI Kirin 710 Octa-core и i7 микропроцессор 4 x Cortex A73 2,2 ГГц и 4 x Cortex A53 1,7 ГГц Мали-Гц - G51 1 ГГц GPS, ГЛОНАСС, BeiDou (только при поддержке некоторых SNE-LX2 продается в Азиатско-Тихоокеанском регионе), AGPS Телефон x 1 Встроенный аккумулятор x 1 Быстрый Старт Руководство x 1 Зарядное устройство x 1 Гарантийная карта x 1 (по желанию) Гарнитура x 1 выброс контактный x 1 Тип-С кабель x 1 TPU Защитный корпус x 1 (необязательно) TP защитная пленка x 1 14.04.2020 10:39 Марк Лэффлер Эти продукты были оценены испытательным центром CHIP. For more information. Huawei Mate 20 Lite works well in the test, with one exception. The phone is mid-range, looks chic and comes in a sleek and modern glass-to-metal case. We like performance, equipment and, above all, battery life. Only the quality of the photo leaves much to be desired with an introductory price of about 400 euros. Designed by AdvantagesFancy - Good craftsmanshipSive displaySadvantageSBad low light shootinga camera features a flimsy apple trend started with the iPhone X not stopping even before the Huawei Mate 20 Lite. In the cut at the top of the display there are two cameras as well as headphones. If you're concerned about the look, you can hide the display cut with an option in the settings. Fortunately, the tendency not to use a 3.5mm connector can't prevail at the bottom. In addition to the headphone jack, there is also a USB 2.0 Type-C slot and speaker. Under the slightly serving dual camera on the back, there is a fingerprint sensor to unlock the phone conveniently and quickly. As usual for glass backs, this reflects very strongly and it is very susceptible to fingerprints. The Huawei Mate 20 Lite doesn't offer an OLED screen like the top model of the P20 Pro, but the limitless 6.3-inch LCD display still leaves a good impression in the test. All the contents are displayed clearly and the display is bright enough to be visible in the sunlight. In numbers, this means 2340 x 1080 pixels, 409 ppi, 19.5:9 and a maximum brightness of 458 cd/m2. Huawei Mate 20 Lite is made with a mid-range Kirin 710 processor that delivers good Brings. It is supported by 4GB of memory. In practice, the device works smoothly and quickly and has no problem with more demanding applications. In addition, the teams were implemented quickly and directly. The download time of our test files is also nicely fast. In order for users not to have to worry about too short battery life, Huawei relies on a 3750 mAh battery. In practice, the device works for up to two days as usual. In the test lab, we came up with 11:12 hours of continuous use in the online run time test - that's a very good value. The Mate 20 Lite also uses fast charging technology so that the device can be fully charged in about 2.5 hours. Huawei equips the Mate 20 Lite with dual cameras at the back and front. One of the two front-facing cameras has a resolution of 24 megapixels, it is supported by another lens with 2 megapixels. The rear end uses a 20-megapixel camera, which is complemented by a 2-megapixel lens. Auxiliary cameras are responsible for the bokeh (background blur) effect, which looks very solid on the images. Compared to the competition, the second camera cannot be selected individually, as they are pure auxiliary cameras and are not wide-angle or zoom lenses. We expect a lot from the quality of the cameras' photos, but we were pretty disappointed with this in the test. The photos create a good impression as long as it is bright enough. However, once the lighting conditions become a little more difficult, the camera gets a clear problem. The quality of the pictures then reduces noticeably, one recognizes the clear noise and the details are no longer reproduced firmly. We would like the night mode of the P20 Pro, but this remains a feature for the top models. Huawei also advertises with your AI function in the camera. It is designed to identify different scenarios. Some examples include blue sky, beach, flower or even antique buildings. Scene detection is designed to force the camera to create the best results. In practice, this has not always worked smoothly. The widely advertised AI feature partially recognizes the scene well and accurately, but at other points it doesn't recognize it at all. The problem is that the images don't get much rating depending on the scene. The results are often oversaturated with color or simply greatly softened. Huawei Mate 20 Lite comes with Android 8.1 and the EMUI 8.2 user interface, which brings with 17 unnecessary apps such as various games. The device runs more than 802.11 ac Wi-Fi, Bluetooth 4.2 and LTE at up to 450 Mbps. Internal of Mate 20 Lite is 64 GByte, of which about 51 Gbytes are freely available. For users who need more memory, the device can be extended to 256GB using an SD micro card. However, if you insert a micro SD card into the device, it is no longer possible to insert a second SIM card because the device only has a hybrid dual SIM card. After all, both SIM cards spark in the LTE network, provided that the tariff provides for this. You can use a fingerprint sensor or facial recognition to unlock. Huawei has made some pretty practical gestures for the fingerprint scanner. For example, it can trigger a camera or lower the Infocenter with a swipe gesture. In practice, it worked very well and quickly. The facial recognition unlock worked reliably in bright conditions, but the device got some trouble detecting the face at dusk. Huawei Mate 20 Lite will be available in Sapphire Blue, Black and Platinum Gold from September 7 for about 400 euros.
