High quality media player support USB audio DACs and HiRes audio chips High quality media player support USB audio DACs and HiRes audio chips found in the latest phones. Play up to any resolution and sampling speed that DAC supports! All popular and less popular formats are supported, including wav, flac, mp3, m4a and DSD. THE USB Audio Player PRO is a must for every audiophile, bypassing all the audio limits of Android. Whether you're using our custom USB audio driver for USB DACs, our HiRes driver for internal audio chips or the standard Androi driver, this app is one of the best quality media players around. USB AudioPlayer PRO Features: - Plays va-wa-va-port/flac/ogg/mp3/DSD/SACD/aiff/aac/m4a/ape/cue/etc. files (even 24-bit and 32-bit). Supports USB audio DAC, connected to the otG-cable (if your Android device supports USB host mode) - is played in the native language up to 32-bit/384 kHz or any other speed/resolution that supports YOUR USB, completely bypassing the Android audio system. Other Android players are limited to 16-bit/48 kHz, even on Android 5 and above. Uses HiRes audiochips found on some high-end phones (LG V10, V20, V30, Samsung S6, S7, OnePlus 3, Fiio X5/X7, Pioneer XDP, etc.) to play HiRes audio on 24-bit without re-sampling! Bypasses the limitations of android resampling! Using the HiRes driver, MSA can now be deciphered by the hardware on the LG V30 and DSD-over-PCM and native playback DSD and DSD-to-PCM conversion if DAC does not support DSD (.dff/.dsf files) - Toneboosters MorphIt Mobile: improve the quality of headphones and mimic more than 160 brands and models (App Purchase Required) - Folder - UPnP/DLNA - UPnP-media render (e.g. stream from Google Music in conjunction with BubbleUPnP) - UPnP content server - network playback using Samba shares (must work with Windows and NAS) - streaming audio from Google Music, Tidal, zobuz and Shoutcast - Play Gapless - Bit Perfect Playback - Replay Gain - Transforming The Sampling Factor (if your DAC does not support the sampling speed of the audio file, it will be converted to a higher sampling speed if it is available or the highest if it is unavailable) - 10-band equalizer (can be turned off) - No required root! Software and hardware volume control (when applicable) - Upsampling (optional) - Last.fm scrobbling For Android audiophile users having a decent audio player app is definitely a must. But most of the time, the quality of play still disappoints your sharp ears. As a result, many of you will need this amazing mobile from eXtream software development, as it will help you enjoy an absolutely mesmerizing playback experience from your high-quality music files, now using external USB audio DACs. And at the same time, USB Audio Player PRO also improves quality Audio files and supports listening with useful features. Feel free to use the app to connect to DAC via the OTG cable and enjoy much better quality music. Play high-quality audio files with a frequency of up to 32bit/384 kHz or surpass them with advanced DAC equipment. Fully use your smartphone audio chips to further enjoy the amazing musical experience.
