We do every effort to ensure that our powerconversion products will give you a long and reliable service to your renewable energy system. As with any manufactured device, repairs may be required due to damage, misuse or unintentional defect. Please note the following guidelines regarding OutBack product warranty: Any and all warranty repairs must comply with the warranty. All OutBack equipment must be established in accordance with their accompanying instructions and guidelines with specified protection in order to maintain their warranty. We recommend insuring your package when delivering. Packages that are not packaged securely may incur additional damage without a warranty, or cancel warranty repairs. There is no charge or refund for the work of the installer or user or the travel time required to disable, maintain or reinstall the damaged component (s). Deliveries outside the U.S. will be sent cargo fees. In the event of a product malfunction, OutBack may not be liable for the associated losses, costs or damage to other components. 1 2 3 4 5 6 7 8 9 10 11 12 14 15 16 Content Table 17 This charge controller uses MPPT technology that will increase the current charge with peak operating efficiency! The MX60 this model has been replaced by the FlexMax 60 - click here for more information the MX60 is on the cutting edge of the charge controller design. The active MPPT (Maximum Power Point Tracking) OutBack system ensures that your solar panel is running at its peak, regardless of age, shading or environmental conditions. A maximum operating efficiency of 98% maximizes the performance of the pv array. The MX60 wide range input DC and 60 DC amplifiers release the current ranking for 12, 24 or 48 volt DC systems provides unrivalled wiring flexibility as well as the size of your solar panel. The ability to lower high-voltage solar panels to an even greater range Low-voltage batteries can save money by reducing the size of the required wire and making installation easier and faster. All MX60 status information is displayed on a large built-in 3.1 (8 cm) LCD screen, and the exclusive OutBack system network allows the MX60 to communicate with many other OutBack products for full integration and high performance. Monitoring the performance of your solar battery investment is easy with a built-in data registration system or with MATE software and an optional PC (available separately). This charge controller will support up to 150 VDC open circuit voltage at the solar panel input (call us with any questions). This MPPT solar charge controller is the best choice when you require a high performance, efficient and customizable charge controller for your advanced solar power system. Full guarantee for 2 years. This model has been replaced by FlexMax 60 - click here for more information MX60 Call (877) 297-0014 for more information or to order. Order.
