Terms of Use: Terms of Use: Policy: January 15, 2021 Version 1.8.7 - Critical debugging repugger! I really like this app. It does what it has to do, and there really is no delay at all. If there were any complaints, the ads would be annoying considering you have to pay for the app, so you shouldn't see them. I had this app before when it was expressed, so at the time the ads didn't matter, but now that I had to pay for this app, I don't want to see them at all. Otherwise, it's a great app. This is by far my favorite app. However, why aren't the videos we reposted from the app automatically stored in my phone gallery like they used to? Is this how the updated version is, or am I doing something wrong? I remember a few months ago, even if I copied the link and reposted the video to Instagram, it would save for my phone, so I always have a video or I could repost later. It was so convenient. Now all I can do is share on Instagram and it won't save on my phone. Help? Sorry! Awesome app though;) It allows you to repost videos and photos with an annoying upload that says where the video is nice, but it comes with letters, subtitles, etc. I can remove it and just mark and give credit to the responsible owner in the caption, keeping the crystal clean imeage/video 📷▣ The developer, Sepia Software LLC, showed that the app's privacy policies may include data processing as described below.
