Follow the latest daily buzz with buzzFeed Daily Newsletter! If your Excel work book has a large number of sheets, it can be difficult to find a specific sheet. Sorting the tabs of the sheet in alphabetical order would make it easier to find what you're looking for. ANSWER: How to rename sheet tabs in Excel In addition to arranging sheet tabs by applying colors to them, you can also sort them alphabetically or alphabetically, as long as you have applied custom names to your sheets. Unfortunately, sorting sheet tabs in alphabetical order is not built into Excel, but you can add a macro to your work book that will allow you to sort tabs in order of lifting or descent. We'll show you how to add a macro available on Microsoft's support site to your Excel workbook, which will sort the sheets tabs. Click on alt-F11 to open Microsoft Visual Basic for Applications (VBA) editor. Then go to The Insert zgt; Module. Copy and paste the next macro from Microsoft into the module window that displays. Sub Sort_Active_Book () Dim i As Integer Dim J As Integer iAnswer As VbMsgBoxResult' tell the user in which direction he wants to 'sort the sheets'. ' iAnswer - MsgBox (Sorting sheets in Ascension Order? - Chr (10) - Clicking No will be sorted in descending order - vbYesNoCancel - vb'question - vbDefaultButton1, Sort Worksheets) for i q 1 To.Sheets For j . ' If iAnswer and vbYes, then if UCase $(sheets (j). Move After: Sheets (j No 1) End If ' If the answer is not, sort in descending order. ' ElseIf iAnswer - vbNo if UCase$(j) Name) qlt; UCase$ (Sheets (j and 1).Name then sheets (j). Move After:'Sheets (j No 1) End If the next j Next i End Sub VBA Editor automatically names each module with a number at the end such as Module1, Module2, etc. you can just adopt the name of the module by default. However, if you plan to add other macros to your work book, it is a good idea to rename each module so you know they are there. We will rename our module to show you how. To rename the module, select the text in the Name field for the module under the properties in the left glass. Enter the name of the module in the Name box and click Enter. Please note that the name of the module cannot contain spaces. The name of the module changes in the list of modules according to the project in the left panel. Now we're going to run the macro to sort our tabs. Click Alt-F8 to access the list on the Macro dialogue field. Select the macro in the list (in our case there is only one macro) and click The Runy button. You'll see the following dialog, which lets you choose whether you want to sort the sheets in ascending or descending order. We want to sort them in ascending order, so we press the Yes button. The tabs of the sheet are now arranged in alphabetical order. The macro you've added is now part of your work book, but when you save it, you'll probably see the next dialog. This is because you have kept your work book as a .xlsx file, which is a normal Excel work book format that does not include macros. To include macros in your work book and be able to run them, you must keep your work book as a work book with macros or a .xlsm file. To do this, click No in this dialog field. Save as the dialog displays. Go to where you want to keep a macro-enabled work book if you're not in that folder yet. Select Excel Macro-Enabled Workbook (No.xlsm) from Save as Type. Click Save. If you don't save your work book as a work book with macro-removal (.xlsm file), the added macro will be removed. You can remove the .xlsx version of the work book so you don't forget to use the .xlsm version if you want to add more tabs of the sheet and sort them again using the macro. You can always save the work book as a .xlsx file again if you don't want to use macros anymore. The last update on October 12, 2020, the success of our day depends largely on the quality of our planning. In order not to miss anything in their affairs, some people prefer to list upcoming tasks in a laptop, while others have long started using digital technology solutions. Calendar apps are some of the main tools that are worth using to organize our lives and plan your time carefully. Many people have switched to specific tools; however, there are still some who don't use calendars on a daily basis. They may find some apps inconvenient to use, non-functional or expensive. In this article we are going to check out the best calendar apps to help you stay organized. Before downloading, as you are no doubt aware, there are all kinds of calendar apps available. Instead of sifting through hundreds of them, we've selected the 10 best calendar apps you can get. In addition to rave reviews from each of them, we've covered the following aspects when creating this list: The user interface - How you move the app should be smooth and simple. The buttons on the app should be clear, obvious and easy to navigate. Synchronization - whether it's with other apps or with other apps, app synchronization should be easy and improve overall experience with the app. Additional Features - Because there are so many options for calendars, many of these apps offer additional features. Functions. features distinguish apps from other apps and give you a unique experience. 1. Any.do CalendarThis has direct integration with the to-do-Do List Any.Do, giving you a unique tandem of two apps. In addition to advanced functionality, Cal Calendar is easy to use. Creating events is very simple and fast. Moreover, depending on the event name, the app automatically adds contacts and geolocation data to the login description. You can even import your lists and entries from Any.do.Any.do calendar is a great option for any type of user. This is very convenient and does not over-complicate the display mode. Another good thing is that this tool is available for free, so you can use it without spending a dime on the software. Download the Any.do calendar here!2. The Google Calendar Calendar Calendar is the official calendar for Android devices that has been tested by many users around the world. If you are now trying to get away from it, consider changing your mind. Since this app is installed on most Android devices by default, many users think that there is nothing special about this program. They're wrong. Google has been updating its calendar for quite a few years now, and now it comes in Material Design with advanced event features, direct integration into other Google services (such as support reminders and Google Now), and comes with Exchange support. The program is super easy and won't cost a dime for you. That's good, isn't it? Download Google Calendar here.3. CalendarCalendar is a relatively new app. It works as a web app for both iOS and Android devices. It's an intelligent application that recognizes your contacts, schedules, and tasks. It will also help you plan and organize meetings according to your available time intervals. The good thing about the calendar is that it allows you to sync with other calendars you use, such as the Apple Calendar and Google Calendar. So you can manage all the calendars that you have in one place. The calendar also gives you an analytics of your meetings, giving you a clear idea of how you can improve time management. Download Calendar: Meeting and Planning here.4. CalendarBusiness Calendar's business is aimed at people who use their calendar for business purposes and planning. It offers different modes with a wide range of configuration capabilities. The app provides the default view mode by month, and events can be marked in different colors. Display/sorting modes can be adjusted to your needs (month, day, year, or event). You can also set a multi-day viewing mode to see how everyone for the next few days. Scrolling up and down moves you by month, and if you check for a few days, they will be shown in more detail. The daytime display mode offers hourly planning, and schedule mode provides a detailed schedule for a single event. Business Calendar Business Calendar tool for planning/planning cases, tasks and events. There is support for repetitive events that can be configured in just a few clicks. By purchasing software, you can use it to import and export other calendars, delete, copy, or move multiple events at the same time. The Android Business Calendar app may seem a bit chaotic, but it works fine and easy to work with if you've been playing with it for a while. The full version of the app is available for $4.99, but you can also find a free version for the test drive app. Download the business calendar here.5. aCalendaraCalendar opens our collection of the 10 best calendar apps available on the market today. With its eye-catching design, easy navigation and great functionality, this is one of the most popular calendar apps on our list. Some additional features include color schemes for each case type (48 colors to choose from), different types of demos, different widgets, moon phases, and more. Given its functionality, aCalendar is a reliable calendar app that has an easy-to-navigate interface with three display options. Scroll from side to side allows you to switch between month, week, and day display modes. When you scroll down and up, you move through the calendar at intervals according to your chosen display mode. In addition to the time scheduling feature, aCalendar syncs photos from contact lists or social networks to remind you of birthdays, anniversaries, or any other special dates. The program also supports data transfers through NFC and full-screen widgets, making it easier for you to work with any data. The program is available for free, but you can also get even more features if you buy an advanced version of the software for $4.99.Download aCalendar here.6. The DigiCal Calendar Calendar calendar is very similar to Cal Calendar in that the app focuses more on design than on its functionality. However, this does not mean that the application does not serve a purpose. With this calendar app, you can sync all calendars and view them in different ways. Along with the main features, this program comes with support for Google Calendar, Outlook, and includes some unique and interesting features. You can match keywords with the image or customize a dark theme. The app can even show you the weather forecast for three days. SolCalendarSolCalendar can be called a universal application. It claims that an all-in-one digital solution having the basic functions of combined with some other advanced features, such as a day-to-day weather forecast. The app supports Google Calendar as well as tasks, widgets, lunar calendar and even Foursquare.Those search search An application to cover just everything in its functionality, SolCalendar is a program to consider. There are many interesting things in this app; program does an excellent job working in all-in-one mode. SolCalendar test - the app is available for free. You can check it out without buying the service. Download SolCalendar here.8. IRL Event Social NetworkOne of the most unique apps on this list is the IRL Events Social Network app. As you can guess from the title, the main focus in this social networking app. Unlike other social media platforms, you can assume that this platform functions similarly Meetup.com. This is a site where you can connect with other people in your area who share a similar interest. IRL is that while at the same time providing a convenient calendar for you to plan activities and plan your day. Although it's a secondary focus, you're missing many of the synchronization aspects that other apps have on this list. Even

so, because of this huge social function, it's worth considering for those who want to make more connections. Download IRL Events Social Network here.9. Today CalendarToday Calendar is one of the most hip and edgy calendars on our list. The decision was one of the first to really adopt the material design and remains one of the few that adhere to a neat style. The calendar app offers bold colors, simple controls and great functionality. It's not as heavy an app as many others; It won't eat the entire memory of your device. If you're not looking for something complicated and overly functional, today's calendar is what you need. You can always test the app before you pay for it - the program is available for free. Download Today's Calendar here.10. TimepageTimepage is an intuitive calendar app that will manage your time in a way that other calendar apps can't. It offers the same features that you would expect from other calendar apps: the ability to record events, notifications and reminders, weather, and driving the duration of a particular event. However, the app goes beyond these features in two ways. The first way is that while the app sends you notifications, it also has reminders for you for what goes on. This little extra time can allow you to prepare and make adjustments to your day if necessary. The second feature - more importantly - is a heat map when you go to see the full view of your calendar. This heat map shows which days you are most busy on, and other days when you are freer. This heat map provides a quick look to determine widely which days are good, add more events and other tasks. Download Timepage here. Our VerdictSearching for the right application to manage different calendars and plan your busy day can sometimes turn into an obstacle course. Most of us need flexible applications that can easily used to manage our rigid schedule. The app should have all the necessary time planning features and be intuitive. Stylish design and limitless compatibility also matter. It is not always easy to find such a program. The aforementioned digital calendar solutions fall into the cost of use category. They are modern, multifunctional, light and light. Choose the one you like! More performance apps for better time managementPopular photo credit: Unsplash through unsplash.com unsplash.com
