So I just got this for free at Best Buy and I was trying activation at home. I downloaded the google home app, linked it to my account, created settings, successfully connected it to my Wi-Fi and Bluetooth to my iPhone X. I managed to play music on it from my phone and (wrongly) time appeared shortly after I first hooked it up. Since then, voice commands have not been recognized and the screen has not shown time/temperature. The only thing that is displayed is SE t or bt when it plays music from my phone. Am I missing something? Any help would be appreciated. Model - NS-CSPGASP-GPage 2 11 comments
