\$29.99 Take up to 12 months to pay no interest and no late fees. Pre-qualification now. You don't have a powered router over Ethernet? Do not worry. Turn on PoE for your Doorbell Elite video with power over the Ethernet adapter. Simply plug the adapter into the Ethernet network and a nonstop power outlet and a reliable connection that you can trust. Includes poE injector, AC adapter and three-foot Ethernet cable size and color power and connection installation Total Power Over Ethernet (PoE) is a protocol that transfers data and power simultaneously to network devices, which significantly reduces installation and maintenance costs. This allows the placement of devices such as the Ring Up Cam in areas without conventional power supplies. This article will explain the power over Ethernet and answer some of the most frequently asked questions about it. As Power Over Ethernet (PoE) works power over Ethernet is produced by a device such as a network injector, network switch or router that has PoE built-in capabilities. PoE allows you to deliver energy to a network device using the same cable that transmits data. If you have one, it will automatically detect when it's connected to a poE-capable device, such as the Ring Stick Up Cam Elite, and power the device. This means that you don't have to connect your device to a standard power outlet to make it function. Note: Ring PoE devices need CAT5 cables or higher. Do PoE devices, such as Stick Up Cam, work with standard (non-PoE) devices such as routers? Yes. If you connect a non-PoE router to a PoE device, such as Stick Up Cam or PoE router, to a non-PoE device, it will provide the network as normal, but the device will have to connect to another power source to work. Can you mix PoE and non-PoE devices into your network? Yes, although non-PoE devices will need a separate power source. How do you know if your router is capable of producing PoE? You will need to check the router model number against the manufacturer to tell whether your device is capable of producing PoE. If your device is more than a year or two years old, however, it is most likely not capable of producing PoE. Are there any risks when using PoE with my Ring device? No. PoE can be used with any ring devices that are supported by PoE, such as the Ring Stick Up Cam Elite. All modern and future Ring products with PoE capabilities are designed in accordance with IEEE 802.3af and 802.3at standards. If you can connect the network You don't have to have any difficulty connecting the device to the PoE production switch or router and having it attract power. Does the PoE connection require any special electrical knowledge? No. You connect PoE at the same time as connecting network cables to both power and data via the same cable. PoE Wherever you need ItThe Ring Power over Ethernet (PoE) Adapter is perfect for homes without poE option, the adapter provides power over Ethernet for your Doorbell Elite video or Stick Up Cam Wired. You don't have a powered router over Ethernet? Do not worry! Just plug the AC adapter and Ethernet cable to the PoE adapter and you'll get power over the Ethernet for your Stick Up Cam Wired.Model - 8EALS80000 includes PoE injector, AC adapter and three-foot ethernet cable running with Stick Up Cam Wired dimensions: 3.25 inches X 3 inch X 1 inch. Power input: 110 - 230 Volt AC (AC Adapter included) Power: 12 Volt DC, 15.4 W Power Connection: AC Adapter or Cat-5/Cat-6 PoE Setting Requirements: Ring Compatible Video Doorbell Elite and Stick Up Cam Wired 1 Year Limited Manufacturer Guarantee. Guarantee.
