'Mismatched section size' ALGUNAS CAPTURAS: How is the root of the Moto G double sim (Indian version) that is updated to 4.4.2? There are three simple steps only 1. UNLOCK LOADER 2. FLASH CUSTOM RECOVERY (I USED CWM) 3. FLASH SUPERSU DONE YES... You don't need to downgrade your loader, which is a very risky Procedure 1. UNLOCKING BOOTLOADER: - I think its already explained well on various sites and the Motorola website as well - I used this Moto-g-unlock-download-loader-and-root guide just to unlock 2. FLASHING CWM RECOVERY-You need 3 things (a) Motorola USB drivers (download from here )b) ADB drivers (download from here (c) Custom Recovery (download from here ) I used cwm without touching Real Procedure:- 1. install Motorola usb drivers2. remove adb drivers anywhere in your computer3. copy recovery.img I renamed it only for recovery in the tool folder adb4. download your phone in fastboot mode by pressing the volume down the key and pressing the power key simultaneously, and then releasing the power key .5. When you press the hard-pressed key, click the right click and click here !7. type fastboot flash recovery.img and click enter DONE just press the volume down and then volume before downloading in cwm 3. PUT IT IN INTERNAL MEMORY PROCEDURE IN CWM CHOOSE TO INSTALL FROM SD CARD THEN CHOOSE SUPER SU ZIP FILE, THEN DONE EDIT: THINGS TO IGNORE 1. 'Несоответствия размер раздела' ПОСЛЕ ПОСЛЕ RECOVERY2. It will ask the root is broken when rebooting from CWM. CHOOSE YES Easy Root and install CWM on Moto G XT1033 Double Sim Review Arun Tom at 8:36 AM Rating: 5 I have Moto G 2013 (XT1033). The device is not loaded successfully - only shows the logo and then just shows a blank screen. So I tried to install Cyanogenmod hoping that it might work. I unlocked the loader. I tried to install the TWRP Recovery Image (3.0.2.0) from the official TWRP website using the \$fastboot team to erase the recovery erasure recovery... (loader) To erase allowed in unlocked state OK (0.046s) is finished. Total time: 0.046s \$\$\$0.000 GOOD (0.331s) spelling recovery ... GOOD (0.175s) is over. Total time: 0.507s And the device shows the following text: cmd: getvar:partition-type:recovery cmd: erase:recovery cmd: getvar:partition-type:recovery cmd: getvar:max-download-size cmd: download:00944000 cmd: flash:recovery partition It displays an unlocked loader warning, then a blank screen for 2-3 seconds, and then an image of a resting android bot with a red exclamation over its belly, with a No Command signature. There is no TWRP recovery screen. I then pressed the Vol UP and Power button for 2-3 seconds and that displayed the Android aborted Cyanogenmod mail file is not damaged, since the sha1 hash is the same as in Cmodyan. Please help me install Cyanogenmod on Moto G (XT1033). What is TWRP? To quote: Team Win Recovery Project 2.x, or twrp2 for short, is a custom recovery built with ease of use and customization in mind. It's a fully touchscreen user interface - no more volume rocker or food for mashed potatoes. The GUI is also fully XML driven and completely theme-capable. You can change the std\_disclaimer.h'gt; std\_disclaimer.h'gt; o каждом аспекте внешний вид. Все должно сработать.
