Online and Offline - Elegant Music Player Powerful Equalizer provides an immersive experience for you, GIFs, wallpapers and stickers personalized, Funny, Download and share 【LIKE USA and STAY CONNECTED】 Facebook Twitter VK Instagram there are many ways to share videos, songs or photos from one device to another. Normally, I often use cables, USB, cloud computing technology or Bluetooth if you want to transfer any file to another phone. The cable is very annoying because you always have to carry it with you. USB has a lot of risks that you get malicious files. Bluetooth is a pretty good option, but if you want to share a large file size it will take a long time. In such cases, my SHAREit solution is the best file-sharing app today. The SHAREit Content Table is a data-sharing app developed by Shareit Technologies that allows you to stream documents, videos, music, photos, contacts, and many other files without the need for technologies such as Bluetooth or cloud computing. With this app, you can transfer Android documents to your Android device, Android on iOS or Windows Phone. Any device can be used as long as both of your devices are installed shareit and connected to the same Wi-Fi network or mobile hot spot. Flexibility is the most outstanding advantage of SHAREit. You can easily and quickly transfer a file from your phone to your tablet, your tablet to your computer, or your phone to your computer with a few basic steps. In addition, you can discover a store of music, images, GIFs and online videos with the highest quality. The simple interface, easy-to-use SHAREit interface is extremely simple and intuitive, which it's user-friendly. On the dispatch device, simply select the file to send and click the Send button. You need to wait for the app to scan the file in seconds. The receiving device can then confirm and the file you just shared. Please note that these two devices should be close enough to ensure that files are transferred smoothly. Some features Sales exchange rate is 200 times faster than Bluetooth, About 20M/sThe file does not degrade There is no limit on the size and number of filesFile sharing easily and quicklyMulti-platform support, transfer of files between different devices through the Wi-Fi networkIntuitive interface, easy to useThe user community up to billions of people Yongsur security while sharing filesSmall size, only 20MSupport 39 languagesmod featureNo AdsIn summary, SHAREit is useful, simple, easy to use the app for all. Thanks to this, you can share files anywhere, anytime easily and quickly. One billion users can't be wrong, use this app to save time on file sharing between different devices. You all know the difficulty of transferring large files from one phone to another or even from a mobile phone to your computer, so this process is often required for a very long time, especially if the video is large, for example, if you are shooting a video in Full HD and want to transfer it to a computer or another phone, whether it is Android or iPhone.Advanced Download Manager ProKshareit Android for iPhoneIt is just Shareit. This is one of the modern applications that has come to play a vital role: to speed up and improve transmission processes. It has become an effective and excellent alternative to a very slow Bluetooth service. Now you can transfer whatever you want from games, programs and apps to other phones and even your computer without the need for any wires. Received ShareIT data programs to very great fame worldwide and became one of the most apps downloaded in the Google Play store for Android stores, iTunes for iPhone, and Windows Store.Because shareIT Lite, the new version has provided the user a lot of time in file transfer and provided a user interface featured and easy. We will explain in detail many excellent features in this topic, where we will take you on a detailed tour inside the Shareit MOD applications for computers and mobile phones, including the method of use and some other information. Benefits of using file transfersIf you're still asking about the usefulness of Shareit, these lines will tell you about all that SHAREit can do and how you can make the most of the program. Here are the most important operations that SHAREit 2020 performs on mobile phones, phones, Or computers. File Sharing: The main function of SHAREit is to transfer files or file sharing at a very high speed, where you can send and receive all types of files of different sizes from other phones at a very high speed, sometimes reaching 100MB per second, and you can send more than a file at the same time. For example, you can send up to 450 images at a time, and the other side will receive it automatically and without having to approve each new image. All of this and the software are compatible with different systems. Computer Connection: You want a quick way to connect your phone to your computer to share files between your computer and your mobile easily, then here's the SHAREit program. Memory Optimization: In a recent Shareit update, the developer provided him with some additional tools that users need, and the most important of these tools is a waste-cleaning tool where many users forget the files that were sent to them, such as applications after they were installed, and remain stuck in memory and consume space without. So this tool checks all these files and determines which ones don't make sense for your phone, so you then clean up those waste and get more storage space. Game and App Update: If you access the Internet through limited use of packages, then it is inevitable that you can't update apps, software and games because they consume a lot of internet data, but it's not required that you can update your apps in one go by plugging a share on your device on any other phone on it. that there are new versions of programs and apps on another phone. The program will allow you to update the apps you have on this phone, and thus you will get new updates without having to download them. Other benefits: From time to time, the SHAREit program for mobile devices and computers also has some beautiful features. For example, you may find that the program offers you some special apps and games, and in addition to some new programs that SHAREit develops and invites you to use them and many other distinctive things. How it works for the WindowsSupports ShareIT laptop is software data on Wi-Fi technology, as explained in previous paragraphs, in particular, WiFi Direct technology has been integrated into modern phones, so that allows users to transfer files to Bastkhaddhma instead of using Bluetooth, which has become slow and inefficient. ShareIT Pro APK use the technology through integrating it into the program and making it one of the things he totally controls and then it gives an identification for your device and for all other devices on which. How to connect a mobile phone to your computerY also mentioned to you at the beginning that among the features and tasks SharEit is the ability to connect a mobile phone to a computer or laptop using Wi-Fi technology. In this paragraph we will explain to you how you can connect your mobile phone to your computer without using any cables or wires. In the beginning, you have to download the SHAREit app on your mobile phone and the SHAREit program on your computer and install them, of course, given the provision of a portion of Wi-Fi broadcast on your computer if your device does not support it. You open the SHAREit program over the phone and swipe from left to right to open the menu. Choose Connect To PC, which means connecting to your computer, as shown in the photos; then you open a computer program. After applying the previous step, the program will start on a mobile phone to search for any existing Wi-Fi networks created with SHAREit, and the same will happen on the computer. Let the search program until you find the name of your device appears in front of you. Click on it. The program will then ask you for approval through your computer. Okay.Now your device is connected to your computer via Wi-Fi and you can start transferring files from your phone easily via your computer. And once you're done, click the Disconnect button to disable the connection between your computer and your mobile phone, and if you want to transfer new files, repeat the same previous steps in order. Features that you get after downloading The Free Program: After downloading Shareit, whether for a computer or mobile phone, you get a completely free experience without paying anything, but some simple ads can be displayed. High Speed: You will be able to send and receive files from other phones very quickly and you will not find this speed in any other program that competes with the Shareit program. Wireless Connection: SHAREit 2020 will allow you to connect your phone to various other types of phones without cables or any other means of transmission, so all you have to do is run the program only. Continuous Updates: You will receive great and constant updates from the company that developed the SHAREit program to solve problems and significantly improve its performance over time. Solutions - Solve all the problems on Windows and AndroidI can not download Shareit: Shareit is not downloaded, be sure to click on the direct link below and follow the explanation in the video, which explains how to download, install and run. I can't connect to your computer: the way to connect your phone to your computer with the latest version of Shareit program is simple, and if you encounter any problems with it, really you don't have enough experience, we advise you to watch the video. ShareIT Apps doesn't work: If you're facing this problem, it's for one of the first, which is that which you downloaded is not compatible with your phone type, and the second reason is that you don't have The latest version of Shareit, so we recommend you download the program again from below. Download SHAREit APK 2020 for computer, Android and iPhone with a direct link to file transfer at a very high speed is the theme of today; Welcome to our dear followers and visitors to our Gameloop APK website.
